## Preface.

1-15 (1) 55

The declensions and conjugations in Pali are very simple, and may be more readily acquired than either the Latin or the Greek. The principal difficulty, in reading Pali, is found in the numerous changes that are made in the roots, in the formation of new bases for declension and conjugation, in adding many and various particles to form derivative words, and in the permutation of words when combined into sentences.

The roots consist of one or two consonants, but the second is most frequently lost in the changes that occur, and occasionally the first also, so that not a vestige of the original root appears in the derivative, §246.

These changes are sometimes greater in Pali than even in Sanskrit. Take for instance, the word  $g_{OOS}$  *nigban*, which has been adopted into Burmese. The root is O va, TO GO, TO BLOW, and g ni, is prefixed in the signification of oUT, the word thus signifying TO GO OUT, as a fire or light. g na is affixed to make the verb a noun, g 256, and n is added to put it in the neuter gender, g 90.

When S ni is prefixed, the following consonant, v, is required to be doubled, § 75, but a double vv, is changed to a double bb, § 303. Thus the neuter noun from ni and va is  $S \cong s$  nibbána. The Burmese write the second b, p, pronounce the first g, and cut off the last syllable an, thus making the word nigban. In both the Pali and the Burmese word, all appearance of the original root is lost, but in Sanskrit, when the v is doubled, it remains unchanged, and the Sanskrit preposition corresponding to ni in Pali, is nir, so the Sanskrit word formed on the same base as the Pali is **Facing** nirvvána.

N. .

Д

It has been a prominent object in the following pages, to make these changes readily understood, and thus facilitate the acquirement of the language. The changes to which letters are subjected are recapitulated at the commencement of each letter in the Vocabulary, that the student in looking up a word, may recognize readily the root from which it is formed.

The Vocabulary furnishes the definitions of many more words than appear in the list, because on the pages to which reference is made, many derivatives will be often found defined. And to make it useful to persons imperfectly acquainted with the grammar, uncommon forms are sometimes introduced with references to where explanations of them may be found. Many verbs have two or more bases, § 210, and while one only would be given in ordinary dictionaries, all will be usually found in this Vocabulary.

There is a great need of a full and accurate Dictionary of the language, but that is in good hands. Our present Chief Commissioner, Col. Fytch, announced the preparation of a Pali Dictionary several years ago, and we have the best authority for stating, that so soon as he can obtain leisure, he fully intends to finish, and publish the work.

This book will not be found free from typographical, and other errors, though it is believed there are none of a very serious character. While carrying it through the press, the writer was teaching Biblical Exegesis to a large school, with Land, Surveying and use of instruments in the field, had to correct Karen Trigonometrical calculations, was writing a work in Burmese on Materia Medica and Pathology, was printing an Arithmetic in two Karen dialects, and writing and printing an elementary work in three languages, besides the care of seventy, or eighty churches, their schools, and teachers, involving, incessant applications, and interruptions. It is not remarkable thenthat oversights occasionally occur, as on pages 119, 120, where declined is read on the running title instead of conjugated.

In writing, a similar book in Sanskrit, the assistance of a learned pundit could be obtained, to relieve the author of much of the labor involved, but from Tavoy, to Toungoo, and from 1830, to 1868, not a single native has been found, whose asssistance in such a work could be of the least value. Mapy, of the priests can repeat large portions of Kachchayano's Grammar, and yet of the principles of grammar they seem to be totally ignorant.

Bishop Bigandet says: "Phongyies are fond of exhibiting their knowledge of the Pali language, by repeating from memory, and without stammering or stumbling, long formulas and sentences; but I have convinced myself that very few among them understood, even imperfectly, a small part of what they recited."

It is an interesting fact that the Pali, which has the oldest alphabet in India, has been printed by Karens whose own language is among the last reduced to writing. Some of the earlier forms show their inexperiance, but the general character of the work has been commended.

The Deputy Commissioner in his official report to Government, dated 23, Oct. 1867, wrote: "The Printing department of the Institute I consider a great success. Dr. Mason has learned the printers' art, and taught three Karens to print. The Pali Grammar, a copy of which I shall send you with a separate letter, has been printed by these men, and I think reflects great credit on Dr. Mason and his pupils."

The Rev. E. B. Cross writes: "I wrote you a hasty note on Saturday, which did not fully answer my purpose. I ought first of all to have expressed my ADMIBATION of your printing in all the characters and languages which it represents, for it is certainly very neatly and BEAUTIFULLY done."

### In omnibus gratias agite.

David rex benedixit Domino coram universa multitudine et ait, Benedictus es Domine Deus Israel patris nostri ab æterno in æternum.

Tua est Domine magnificentia et potentia, et gloria, atque victoria, et tibi laus. Cuncta enim quæ in celo sunt et in terra, tua sunt. Tuum Domine regnum, et tu es super omnes principes.

Tuæ divitiæ et tua est gloria, tu dominaris omnium. In manu tua virtus et potentia, in manu tua magnificare et fortificare omnia. Nunc igitur Deus noster confitemur tibi, et laudamus nomen tuum inclytum.

Quis ego et quis populus meus ut possimus hæc tibi universa promittere? Tua sunt omnia, et que de manu tua accepimus, dedimus tibi.

Peregrini enim sumus coram te et advenæ, sicut omnes pa-

tres nostri. Dies nostri quasi umbra super terram, et nulla est mora.

Benedictus Dominus Deus Israel, qui fecit mirabilia solus. Et benedictu nomen majestatis ejus in æternum, et in seculum seculi, et replebitur majestate ejus omnis terra. Amen, at amen.

### INTRODUCTION

"The Buddhist traditions in Ceylon." wrote Prof. Cowel. "all agree in calling the author of the earliest Pali grammar Kachchaya. no, and although this is said to have perished"—"The Hon'ble G. Turnour, late Colonial Secretary of Ceylon," says Mr. Alwis, "drew attention to some of the Pali works formerly extant in Ceylon, and amongst them, to Kachchayana's grammar, which he then regard. ed as extinct.'—The Rev. F: Mason says: "The grammar reputed to have been written by Kachchayana, still exists. I had a copy made from the palm-leaf, on small quarto paper, and the Pali text occupies between two and three hundred pages, while the Burmese interpretation covers more than two thousand. I made a compendium of the whole, Pali and English, a few years ago, on the model of European grammars, which might be printed in one or two hundred pages, and convey all the information contained in the two or three thousand in manuscript."\*

This "compendium" was submitted to a committee of the Bengal Asiatic Society, and approved for publication in 1854, and Mr. Alwis writes that he obtained a copy in Ceylon in 1855. The existence then of Kachchayano's work was first brought to notice from Burmah.

Many will ask: "Who was Kachchayano?" The commentators on his grammar say he was one of Gaudama's disciples, selected by him to write a grammar of his discourses; not a grammar of the entire language, but of that part of it used by Gaudama, bearing the same relation to the whole language that Winer's Greek Grammar of the New Testament writers, does to the whole of the Greek language.

From Sanskrit sources we learn that there was a Kachchayano, or Kakatayana, who composed a Sanskrit grammar about the age of Gaudama. Dr. E. Buhler has shown from manuscripts recently discovered, that Panani "The father of Sanskrit grammar,"

<sup>\*</sup>Alwis, page ii

quotes from Kachchayano as his predeces sor, and has borrowed from him many of his grammatical terms. This establishes his antiquity, and Dr. Buhler adds: "I believe that Kakatayana was not a Brahman, and should not be at all astonished, if it were established by additional evidence that he was a follower of Sakyamuni."\*

The name however is not conclusive as to the authorship, for there are other writers of the same name. There were two Sanskrit grammarians of the name, and the Chinese pilgrim, Hiounthsang who was in India A. D 629-645, sojourned in a monastery founded by Asoka in which a Kachchayano composed a theological work three hundred years after the death of Gaudama. Still the fact that the older grammarian was not a Brahmin, goes far to sustain the Buddhist tradition.

Mr Alwis says there can be no doubt but this grammar was written in the days of Kachchayano, but the natives prefer no such claim. They say it was preserved by oral tradition for 450 years after the death of Gaudama, when with the sacred books it was committed to writing A. C. 93. Indeed there appears to have been no books in India any where in the days of Gautama, though the people were acquainted with letters.

After Alexander came to India, the Greeks wrote that the Indians were illiterate, and though letters were used for inscriptions on mile stones, yet "Their laws were unwritten, and that they administered justice from memory."<sup>+</sup> There is no good reason then to suppose that the gran n ar was committed to writing before A. C. 93, and if the greatest of poems, the Illiad, has reached us by oral tradition, for it is now admitted that the Greeks had no letters in the days of Homer, there is nothing incredible in a small grammar being transmitted in the same way.

The condition of the manuscript accords with the later date of writing, but with the earlier it would contain anachronisms. Book II. Part 3rd. Aphorism 17, contains the following example:

## ကွ ဂါတော သိ တွံ ဒေဝါနံပိယ တိုဿ

kwa gato si · twan devánanpíya tissa "Tissa, beloved of the Devas, whither art thou going?"

"Now Tissa beloved of the Devas" was the king of Ceylon who was contempory with Asoka, so the work could not have been written much before the date assigned by tradition.

\*Journal of A. S. of Bengal, No. II. 1864. +Ibid. No. II 1859.

Kachchayano's grammar carries with it internal evidence of having been composed with special reference to being committed to memory. It is first written in brief aphorisms which contain the kernel of the work, and though they occupy but twenty pages of manuscript, they contain all the grammatical principles in the book. These aphorisms are next written in paraphrase to make them more easily understood, filling fifty pages, and following this stratum is a third consisting of examples, of somewhere about one hundred pages, and outside of this again are exceptions with occasional annotations. Here the commentator steps up with a paraphrase on Kachchayano's last remarks, to make all things plain.

In fact Kachchayano built his grammar precisely like the edifice of the Paris exhibition. He laid down the germ of his grammar in the centre, and then described around it several concentric circles, each containing all the things of a kind, and then struck out some seven hundred radii, crossing these circles, from the centre to the circumference, on each of which may be found every variety in the book, aphorism, paraphrase, example, exception or annotation, and commentary. The following is an example from B. 6, P. 4. A.3

### Aphorism.

Ghatádınan vá

ဃဋ္ဌ၁<sup>ဒွ</sup>နံဝါ

"Sometimes of Gata et cetera."

### Paraphrase.

ၿားခုာဗြန်ဓာတုန် အသိယောဂန္တာနံဝုန္မဟောတိဝါ ကာရြတ ghutad nun dhátuman asanyogantánan vuddhi hoti vá kárite

"On account of a causal affix, when not ending in a compound consonant, the vowel of the root ghata et cetera is sometimes lengtlened."

<b>Examples</b> .							
ဃာင္ရေတိ	ဢင်ပလ	စာ၃ရကတ္ပ	စာရိက္လထု	ဃာဠာပေတိ

	"	He causes to	unite."				
Exceptions.							
ၿာဥ၃၁ဒိန္နဓိတိ ကိမထ္ထိ ကါရေတိ ghatádínamiti kimatthan káreti							
"Why ghata et cetera?" "He causes to go."							

### Introduction.

Commentary. ဘောအာစရိယ ဃင္ရာနမိတိ ပဒံ ကိမက္ကံ အါစရိယေန ဝုတ္ပြံ bho á hariya ghatánumiti padan kimuttan áchariyena vuttan ဘော သိဿ ကားရေတီ ဇ္ူတိ အား<sup>ဒွ</sup>သံု ဥနာဟရဏေသု kár∧ti ádisu bh, sissa iti ud**áh**ara**nee**u သတိဒိ ကာရိတာ အသံဃာဂဂန္ဘဿ ဓာတုမွ သေဒုခုနှံ kárite asanyogantessa dhátuh mi ghatádinan satini အဘာဝ ဗ္ကမိနာ သုတ္ကေန ဝူန္မ နဟောတီ abhává iminá suttena vúddhi nahoti

"O Teacher ! why was the aphorism 'ghatádánan, et cetera,' spoken by the teacher?

"O Pupil! Ghata et cetera, though of roots not ending in compound consonants, [lengthening the vowel] on account of a causative affix, yet by this aphorism no lengthening may take place." "He causes to do' et cetera are also among the examples."

The language of the commentary indicates a spoken rather than a written work, and it is note worthy that while the grammar is a unity as a whole, it contains three small grammars, each complete in itself. (1.) The aphorisms, which are sometimes written together in a separate volume. (2.) The paraphrases, which might be writen out alone, when they would form a grammar by themselves, independant of the parts that precede and follow, and (3.) The examples, which written out consecutively, would form a mass of material, from which all the grammaticle principles might be deduced in the previous parts. Nothing could be better adapted for a memoriter work than Kachchayano's grammar.

But on the other hand it may be said there is internal evidence that the book was originally written. When two short vowels meet they are combined into one long vowel; and Kachehayane's language, with the following example is:

တကြ အယ် tatra ayan "There this."

"Separate the consonant from its vowel."

"In the place of the consonant put the vowel."

"Put the separated consonant below."

တ — \_ ာ ယံ တ ာ ာ ာ ယံ တ ာ ာ ပရံ တြ

"Erase the first vowel."	တ —— ာ ယံ
	8
"Lengthen the last vowel."	တ — — ါ ယံ
	Ø
"Unite the consonant with the vowel."	ග

In following out these instructions in the Kyoungs, the example is written over six times, as exhibited step by step above in the Burmese character. Kachchayano's pupils must have used the styus, but it does not necessarily follow that the whole grammar was written out.

The work is also divided into eight books treating on different subjects, as below:

Book	I.	The alphabet, permutation, and combination.
	11.	Declension-nouns, adjectives, and pronouns.
•••	<b>III.</b>	Government
•••	IV.	Compound words.
	V.	Noun derivatives.
	VI.	Verbs.
	VII.	Verbal derivatives.
•••	VII <b>I</b> .	from Uhnádi affixes.

Each book is divided into several Sections, each containing from twenty to fifty aphorisms. The copy found in Ceylon by Mr. Alwis sets down the whole of the aphorisms at 687, but the copies in Burmah say there are 710.

It is probable that we have substantially the work that was composed by Kachchayano, but if books that have been watched over like the manuscripts of the New Testament, have their alteratians, and interpolations, it would be marvellous if Kachchayano had come down to us intact.

The book is said to have been brought to Burmah A. D. 387, by Buddhaghosa, and the Burmese translation and commentary are ascribed to him. Whoever the translator was, he was certainly a Sanskrit scholar, for Sanskrit sounds not in Pali are sometimes represented. Thus: "HE CROSSES," in the text is *tarati* On S but *taraiti* 

တရင္ဆတိ in the commentary, from the Sanskrit root tri तू

### Introduction.

A Pak grammar was published in Ceylon in 1834 by the Rev. Benjamin Clough of the Wesleyan Mission, but the writer sketched out the present work before he knew of its existance, and he did not see a copy till he obtained the loan of one while in London through the kind efforts of Dr. Hoyle, Secretary of the Wesleyan Missionary Society; which was in 1854, after his manuscript had been approved for publication by the Bengal Asiatic Society.

It appeared however on examination that Mr. Clough's grammar was not Kachchayano's, but a translation of Mogallano's, a writer who lived A. D, 1153—1186.\* Still it contains the substance of Kachchayano, and Mr. Clough's was accompanied with a large vocabulary by the same author. Mr. Clough's book is very accurate, and its value is proven by a new edition of his Vocabulary, with inconsiderable alterations, being printed in Ceylon in 1865 with all his English definitions, but without one word of credit to Mr. Clough!

In 1863 there was published "An Introduction to Kachchayano's Grammar-by James D'Alvis." This is an exhaustive work on the subject, and is indispensible to every Pali scholar. It contains also a literal translation of Kachchayano's Book on verbs.

This work differs essentially from both of those named.

(1.) It takes the facts of Kachchayano's grammar, and re-arranges them in the order of cf European' grammars, incorporating such additions from the author's Pali readings as seem apposite-Kachchayano's grammar is herein written like Asoka's rock-cut document:

asti ma sankitena asti maihamena asti vistatene

"By epitome, by amplitude, and by a middle course."

(2.) The differences and resemblances between Pali and Sans skrit are indicated, which will be appreciated by an increasing class of readers.

(3.) To make the work as easy as possible for students, the introduction of new grammatical terms, which so often encumber Sanskrit grammars, has been carefully avoided.

(4.) To make the book intelligible to European scholars, it is printed in the Roman character throughout.

\*Alwis, page xii.

### Introduction.

(5:) To facilitate, the study, of the language in Burmah, the Pali is written also in the Burmese alphabet.

In Burmah Pali is interwoven with the vernacular much more than Latin is in English. In the Kyoungs a boy has to learn the multiplication table in Pali, and his first reading lessons are half Pali and half Burmese. Dr. Judson studiously avoided the use of Pali words, unless absolutely necessary, yet were the Pali words in the Burmese Bible printed in colored letters, every page would be a piece of mosaic.

On opening the Bible at random, there were counted in the first paragraph read, I Cor. 13: 1-8, *nineteen* Pali words in *eight* verses. Some of these are repetitions. but there are *ten* different words. To exhibit this to the eye, the passage is here reprinted in English with the words that are, whole or in part, Pali in the Burmese Bible printed in Antique:

"Though I speak with the tongues of men and of angels, and have not charity, I am become as sounding brass, or a tinkling cymbal And though I have the gift of prophecy, and understand all mysteries, and all **knowledge**: and though I have, a I faith, so that I could remove mountains, and have not charity, I am nothing. And though I bestow all my goods to feed the p for, and though I give my body to be burned, and have not charity, it profiteth me nothing. Charity vaunteth not it self, is not puffed up, doth not behave itself unseemly: seeketh not her own, is not easily provoked: thinketh no evil; rejoiceth not in iniquity but rejoiceth in the truth; beareth all things, believeth all things, hopeth all things, endureth all things. Charity never faileth; but whether there be prophecies, they shall ta.l, whether there be tongues, they shall cease; whether there be knowledge, it shall vanish away."

To those then who ask Cui boni? We reply: it is hoped that,

(1.) The work will be useful in the study af Burmese books. A gentleman recently called on the author with a chapter of inextricable difficulties in one of the books used in passing examination, and nearly all arose from unexplained Pali words and phrases.

(2.) It will be useful in translating Burmese books. Burmese books have been translated into English by competent Burmese scholars, but which are inaccurate in the Pali extracts. See for example page 165, and Gaudama's sermon. (3.) It will be useful in translating English books into Burmese. The Burmans are yet to have a European literature, and those who furnish it must know how to use the Burmese language with its admixture of Pali accurately.

(4.) It will be useful to all who wish to know what the founder of Buddhism actually taught. The religious books of more than three hundred millions of people, a third of the human race, written in a highly finished language, rivaling Latin and Greek, cannot be a matter of indifference to us, and to understand them, a Pali grammar is a necessity.

It can scarsely be said there is no Pali literature in the face of the king of Burmah's Pali Bible at Mandalay, written on both sides of 729 marble slabs, containing, it is said, 131,220 lines, and 15,090,300 letters. Moreover the king of Burmah has only about half the Betegat, as it exists in Ceylon, where it is estimated to contain 29,368,000 letters, or about ten times as many as are in the English Bible. And this is only a single book !

Nor is a knowledge of Sanskrit sufficient. Take a small specimen, for instance, from Asoka's Pali inscriptions:

פיעטד דַיר איַא ס.אריןיַידַדָ: פַאָ דּיִע םר' ָ+ יעטרַיַי

"Sirs,

I desire instruments of the Law, how many soever there may be, those who are mendicant priests and those who are mendicant priestesses."

Wholly misunderstanding its purport, the most distinguished Sanskrit scholar of his age rendered the clause:

"I desire them to be regarded as the precepts of the law and that as many as there may be, male and female mendicants may hear and observe them."

And finally, a Burmese scholar of repute writes the Author: "I feel extremely obliged to you for the portion of your invaluable Pali grammar. Irrespectively of creed or persuasion, when the work has been published, you will have no doubt conferred a great boon upon all that would enter the arena with the Buddhists."

# PALI GRAMMAR.

### CHAPTER I.

### THE ALPHABET.

When Europeans first came to India, they noticed several remarkable stone pillars, scattered in different parts of the country with inscriptions cut on them. In some instances, inscriptions were found in three various characters. In the process of time, the languages of two were discovered, but the most ancient characters defied every attempt to decypher them.

Five centuries ago, a Mahometan sovereign assembled a number of learned Brahmins to decypher the inscription on the pillar at Delhi, but their efforts were fruitless; and a native historian wrote of it : "Round it have been engraved literal characters which the most intelligent of all religions have been unable to explain."\*

Early ignorant European travellers reported the pillar at Delhi to have been erected by Alexander the Great, and the writing on it to be Greek.\*

From the days of Sir William Jones, the eyes of all antiquarians in India had been directed to these inscriptions, but they were directed in vain. As late as 1833, one savan wrote of the characters : "They may be of a numerical or astronomical character, as hidden to our knowledge, as are the Egyptian hieroglyphics, for the square, triangle, circle, and Mercury are to be frequently met."

The first attempt to render any part of these inscriptions was made by a Bombay scholar, who, in 1834, translated the first thirteen letters :\*

\*Journal of Asiatic Society of Bengal, July, 1837; Supplement 1864; October 1854; and March 1838.

1

ہ کہ ل ل ل ل ک ہ ہ ج ل ک ک ک ک ک ک ب "In the two ways (of wisdom and works?) with all speed do 1 ap-

proach the resplendent receptacle of the ever-moving luminous radiance."

In 1837, James Prinsep walked up to the inscriptions, and read them off to a wondering world, with as much apparent ease as Daniel did MENE, MENE, TEKEL, UPHARSIN, to the bewildered Babylonian monarch. Then we learned, that the first fifteen letters, so sublimely rendered above, read;

"Thus said King Devanampiya Piyadasi."

Prinsep deciphered the alphabet as follows:

Combined with consonants the vowels were found more fully developed, as:

In his remarks on the alphabet, he says: "There is a primitive simplicity in the form of every letter, which stamps it at once as the original type whereon the more complicated structure of the Sanskrit has been founded. If carefully analyzed, each member of the alphabet will be found to contain the elements of the Canouj, the Páli, the Tibetan, the Hala Canara, and of all the derivatives from the Sanskrit stock."\* And he says, what has never been controverted, "I consider it the primeval alphabet of the Indian languages."\*

\*Journal of Asiatic Society of Bengal, June, 1837.

### ORIGIN OF THE PALI ALPHABET.

All the ancient alphabets west of the Indus have been satisfactorily traced to the Phœnician, and all east of the Indus, as shown by Prinsep above, have been derived from the Pali.

The Phœnician characters were orginally hieroglyphics, and were probably formed on an Egyptian basis. The origin of the Pali is not so clear. Prinsep says, that all the consonant characters may be reduced to the following element s:

+ 9 ( 5 T P S I S Y

The question next arises, whence did these elements originate? If we turn to the Rosetta stone, we find every one of these characters in the Enchorial, or Demotic portion of the inscription.

There are twenty eight lines in the Enchorial character, and a careful examination of a fac-simile has shown, that the Pali characters are found in the different lines as noted below :

+	k	in line	2, 24, 27.
Р	ch		4, 5, 28.
(	ţ	•••	1, 2, 4, 9, 11, 14, 15, 27.
μ	ģ	•••	5, 8, 14.
T	n		2, 3, 7, 8, 15, 26, 28.
Ն	p	•••	9, 21, 24, 29.
8	m	•••	11.
1	r	•••	1. and often.
δ	v	•••	2.
λ	8	•••	2.

Besides the above ten elementary characters, twelve others are found on the stone:

า	kh	in line	1, 9, 16, 25.
٨	g		1, 21, 24.
Ę	ng	•••	2, 25.
3	j	•••	2, 5, 6, 12, 16, 22.
۲	jh		13, 17, 20, 24, 25.
-	ţh	•••	1, 2, 3, 5, 27.
Y	t		5, 10, 13, 18.
2	d	•••	26.
6	ph	•••	11, 24.
Դ	y	•••	12, 14, 15, 16, 21.
٦	l	•••	1, 3, 15, 16, 20, 25.
ե	h		2, 8.

The characters are not always erect on the stone, as in the Pali alphabet, and they may have represented different sounds: for when new alphabets are formed from old materials, a new power is often given to an old character. The Pali  $\bigcirc$  th furnishes an example, for in the Talaing alphabet it is used for b, and when the Red Karen language was reduced to writing, it was made to represent v; as in Etruscan, a sound not found in Burmese, Talaing, or the written Karen. There are points of resemblance between this alphabet and the Bactrian, but the forms represent different sounds. Thus  $\xi j$ , is read n; and  $\bigwedge g$  is read j; and rt, of the same alphabet, has almost the identical form of kt in a Pali inscription found in the Malayan Peninsula.\*

So in a published alphabet of Hieroglyphic Inscriptions, several have the same, or nearly allied forms, as the Pali letters, but they often represent different powers, and occasionally have the the same form in a different position. Thus:

۶i	n the Hieroglyphic	s represen	nts $k$ ,	but in	Pali $d$ .
نار ا	•••		n	•••	d.
9			$\boldsymbol{k}$		chh.
և	<i>l</i> is nearly identi	cal with t	he Pali	-J l,	and
×	k is the same fig	are as he	ə Pali	+ k	but in a differ-
ent posi	tion.				

It is impossible for two sets of characters, so nearly alike to have originated independantly of each other, impossible because here is no parallel in history They must have had a common origin, and since the Enchorial character is Egyptian, we are shut up to the conclusion, that the Pali letters have had an Egyptian origin.

The fact seems improbable, but it is not so improbable as it at first appears. It is no more improbable that one portion of the Pali speaking people should use an alphabet derived from Egypt, than that another part should use one derived from Phœ. nicia; but the nineteenth century has disinterred an abundance of monuments and coins, which prove that the inhabitants of Bactria and the Cabul valley wrote Pali anterior to the Christian era, in an alphabet formed on a Phœnician basis.

Under the name of "The cave character", Dr. Wilson writes of Asoka's alphabet: "We now see clearly that the great trouble taken with the adjustment of the cave character would have been

<sup>\*</sup>Compare Journal of Asiatic Society of Bengal, July 1848, Plate IV; with Journal Royal Asiatic Society, Vol. XX, Plate IV.

unnecessary, if we had noticed sufficiently early its correspondence with the Phœnician and Greek alphabets, from a combination of which it is manifestly derived."

An Egyptian race is supposed to have had rule in Nineveh at a period anterior to authentic history. Mr. Thomas, the distinguished archæologist, wrote of certain Assyrian inscriptions: "These inscriptions afford at any rate monumental evidence of the contact of an Egyptianized race, far beyond the confines of the mother-country, with foreign nations, whose habitat lay, in one case certainly, eastward.—We have now to note what were the people who, as Sir Gardner Wilkinson says, 'at a very remote period' occupied India in connection with the ancient inhabitants of the Nile valley."

That Egypt was not unknown to India, even in the days of Asoka, we bave indications from his inscriptions containing the name of Ptolomy king of Egypt, and Magus, son-in-law of Ptolomy Soter.

### SIMPLICITY OF THE PALL ALPHABET.

The Pali alphabet is perhaps the simplest of all known alphabets, ancient or modern. Professor Williams gives, in his Grammar, "the elements of the Devanágari character," and writes down forty. All the Pali characters are formed from

A straight line | r, A<sup>c</sup> triangle  $\triangleright e$ , A rectangle  $\Box b$ , A circle  $\bigcirc th$ , A dot  $\circ$  which may be regarded as a small circle; or some parts of them, or some combination of their parts. Thus we have formed of right lines:

I	r		L	u		-L	1	ú	+	${k}$	Ľ	•	ng	
Ι	<u>n</u>	•		b		Þ	(	9	٨	g	Y		t	
ł	ġ		۲	$_{jh}$		հ	n	y	Ч	bh	2	I	d	
T	n.			An	d all	$\mathbf{the}$	vo	owels	when	folle	wing	co	nsonar	ats.
$\mathbf{Fr}$	om	the	cir	cle,	great	and	s	mall,	there	e are	made	;		
0	ţh		(	0	th	(	(	ţ	8	m	1	5	j	
•	i			0		a t	fin	al n o	r m.					
•											1. a			

A right line with a circle, or its parts, forms,

b v b cch d ch D dh H a

A perpendicular with a curve furnish 3;

א b p b y b s b gh

The same figure with the termination capped by a horizontal line, or a curve, affords;  $-J \ l \ b \ h \ b \ ph$ 

More than forty alphabets may be seen, placed for comparison on a single sheet, all taken from ancient inscriptions; and if the inventor of the Pali alphabet were acquainted with the whole, he must have been a giant in intellect compared with his for y predecessors, if they did precede him, to form, from such a chaos of material, a system of such order and symmetry, as the Pali alphabet developes.

But the skill of the inventor is seen less in the forms adopted, than in the system that prevails throughout the alphabet.

The letters were manifestly formed with regard to the organs that enunciated them. Hence the cerebals and dentals appear to have been made to correspond with each other. Thus:

$\bigcirc th$ , was the	cerebal :	$\bigcirc$ th, the	dental
μ ở		ት d	•••
b đh	•••	$\int dh$	•••
Ι <u>n</u>	•••	$\perp n$	•••
The nasal $n$ , is	varied from	a commo	n form thus :
The gutteral w	as [ng	The pala	itel h ny
The cerebal	<u>I</u> n	The dent	tal ⊥ n

Prinsep remarked; "There is a remarkable analogy of form in the semivowels  $r l y \mid \neg j \downarrow$ , which tends to prove their having been formed on a consistant principle. The  $h \mid \neg$  is but the  $l \neg j$  reversed."\* He observes again, that the aspirates and the smooth mutes have been mainly formed from .each other; and it is worthy of remark, that the aspirate, when formed from the vnaspirated letter, always take an addition, Thus:

d ch takes an additional half circle to form b chh. So also (t ... b p takes a true at its extremity to make b ph. From ) kh appears to have been made irregularly b gh.

\* Journal of Asiatic Society of Benge', June, 1857.

The mode of denoting vowels, when following consonants, was incomparably more simple and definite, than the mode adopted in any of the westren alphabets. A consonant alone, had a short q understood. To make a long  $\acute{a}$ , a line was drawn to the right,

As:  $\Im kh\dot{a} \in t\dot{a}$ To mark e, the line was drawn to the left, As:  $\bigwedge qe$  -( te

Both lines were used to denote o,

As:  $\int gho \int yo$ 

A perpendicular line was drawn on the top of the letter to make short i, and two for long i, As:

∫ pu ∫ phú ☐ bu ⊥ yú

Occasionally u was made by drawing the line horizontally, instead of perpendicularly; and both modes may be sometimes seen in the same line, as:  $\bigwedge tu \not au$ 

### AGE OF THE ALPHABET.

Nothing is known of the time when the alphabet was invented, but it is certain from all tradition that it was in use before the days of Gaudama. On the other hand, it appears probable that it was formed after letters were in use in Assyria, for the inventor seems to have been acquainted with a square or rectangular alphabet that has been called the "Nimroud Enchorial", of which Mr. Thomas published an inscription\*; for the general appearance of the character is much more like Pali, than any other anterior to Asoka's edicts. The following specimens are identical:

## Το⊼ς ∓ιΓεπ

But other forms show a decided affinity with the cuneiform character, so the Pali alphabet must have originated after the formation of the cuneiform charactor, but not later than the sixth century before the Christian era.

\* Journal of Asiatic Society of Bengal, January, 1850.

### MODERN ALPHABET.

Like the Phœnician, the Pali letters seem to have been soon subjected to change; but the changes are few of them improvements. Prinsep has given an instructive plate, showing the changes that had been made in the character at different periods, from the alphabet of Asoka's edicts to the modern Sanskrit, and square Pali of Burmah.\*

The oldest form of the alphabet that has been found on the eastern side of the Bay of Bengal, is in an inscription on a rock at the month of the river at Singapore, but it is so illegible that nothing can be made out of it beyond a few letters, and that the letters are not more modern, than the forms in use in the second century of the Christian era.

The oldest legible inscriptions were found by Col. Low: one in the northern part of Province Wellesley, and the other south of this, east of Penang. + Prinsep wrote: + "The style of the letter is nearly that of the Allahabad No. 2." It seems to be of the same age as that of the Amravati inscription. Both are characterized by a small curve over the letter, which appears to have been soon changed into a straight line, as in the Allahabad No. 2.

This may be regarded as the character in which the Buddhist literature was introduced to the Eastren coast; and is the origin of the present Burmese and Talaing alphabets. It was in use, according to Prinsep, in the fifth century, anterior to a new form which prevailed in the seventh century; and which was carried with Buddhism into Tibet.

Buddhaghosa, according to Burmese authorities, brought the Pali books to Pegu in the fifth century, at the time this alphabet was used in India, and having been found actually engraven on rocks near the borders of southern Burmah; the evidence harmonizes.

The forms of the Burman and Talaing characters afford further testimony to the fact, for they are more easily traced to the alphabet of that age than to any other. At the time the Amravati inscription was made, the short i, when following a consonant, had been changed from a straight line to a circle; and the long i

<sup>\*</sup>Journal of Asiatic Society of Bengal, March 1833, Plate XIII +Ibid, July 1848 plate IV; and Vol. IV,plate III. ‡lbid, July 1843 §Ibid, March 1837, plateXI.

Burmese Alphabet.

9

was designated by a circle with a dot in it; both of which have been retained in the Burmese and Talaing to the present day, while they ceased to be used in the Sanskrit before the seventh century. In pike manner, the e, the  $\acute{a}$ , and the o, were changed to curve<sup>4</sup> down the side of of the letter; the way they are now written in all the alphabets on the Eastern coast.

In the modern Sanskrit, an oblique straight line is drawn under a consonant, to indicate that the inherent vowel is destroyed, and the consonant is final. At the time the Amravati inscription was made, the same thing was denoted by a slightly curved stroke above the letter, turning to the right; and this is precisely the prosent Barmese mode of thating, or killing, the vowel of a tinal consonant. So also the symbols representing r and y when, combined with a preceding consonant, were nearly the same in Amravati that they are now in Burman.

In the Amravati, the long arms of several of the letters were cut off so as to bring them very near the corresponding Burmese character. Thus:

became w became u became u became o 20 0 0 00 0

Several other Burman letters are merely the rounded or other wise slightly varied forms of Asoka's characters, as:

∧g	Γ ng	or the design of	E j	E dh	þ∂	D dh	[] b	: <i>r</i>	du. 8
0	С	$\mathfrak{D}$	ଡ଼	ຍ	3	Q	6	ବ	သ

It may be affirmed then without fear of contradiction, that there is no modern alphabet which approaches the old Pali character so nearly as the Burness, and that there is therefore no character in which Pali is now written, so well entitled to be called the Pali character, as the square Pali of Birmith.

The age of the Amravati inscription has not been accertained, but the letters bear a strong resemblance to the character on copper plate grants dated at the close of A. D. 400. Prof. Dowson on these grants,\* and Mr. Thomas on the coins of Kranander,+ have both shown that different forms of writing existed contemporancously, but since this date synchronizes nearly with the date of the introduction of Budhism into Burmah, they confirm each other.

<sup>\*</sup>Jour. Royal Asiatic Society: N. S. Vol. I. page 247. †Ibid 447

### Pali and Majalha.

### THE PALI LANGUAGE.

According to some of the Pali books, the Magadha language is the language spoken by the people of Magadha, the Sakata<sup>\*</sup> by the people of Saketa<sup>†</sup>, or Oade, defined by native interpreters as Sanskrit, while Pali is not the language of any tribe of men but the language of the Buddhas.

As the last Buddha was a native of Magadha, Pali and Magadha are usually regarded as the same language, and it is often ealled Pali-Magadha: the some of the books make a very marked distinction, representing Pali as the original language of the Gods, or Buddhas, and Magadha as the original language of men.

In one book<sup>4</sup>, Gaudama goes back to the origin of the universe before the first Buddha had appeared, and he represents the creator tor as a female, who, after she had created animals, and appointed them their several abodes, gave them names. Nine of those names are given, which are all Pali, and it is added that this language, without giving it any name, was the first language spoken, and when Buddhas subsequently appeared, they every one in succession preached in it.

After animals were created, this divine personage, or Goddess created three human beings, a male, a female, and a neuter. The neuter was neglected, and it killed its brother, the male, through envy; but three children were left bohind, and to these three were born seven sons and six daughters. The parents brought different animals to their children to play with, and the several words that the children uttered on beholding them, became the names of those animals, and they are, Gaudama says, in the present Magadha language, the words in common use to designate those animals. The following are specimens:

Pali.	Magadha.	•	Pali.	Magadha	
Sasa	Mo	a hare.	Assa	Sangd	a horse
သသ	ငမာ		ತಾಯ	သငါ	
Supava	San	a monkey	Su <u>n</u> a	Sach	ક dેg
သဂဝ	သန်		သူ <b>ဏ</b>	သစ်	
Kuku	Ro	a fowl,	Byakkho	Yí	a tiger,
ကုက္	କେର୍ପ		ၛႍႍဢၟၣ	ග්	
	*သကဋ္	toom	ຊ <sup>‡</sup> ບົງດ	8000	ပြင်သူတဲ့မှု။

In harmony with the above representation, Jina-vachana, "the larguage of the Jiva" or Euddha, is every where found in the Pali texts, for what is denominated by the interpreters *Fali*. Pali is never found in the old texts, but is used like a vernacular word to define Jina-vachana whenever it occurs in the texts.

### DERIVATION OF THE WORD PALL.

The derivation and signification of the word *Páli* has been a matter of no little controversy, since it was first brought to Europe by Laloubre, who was Envoy to Siam for Louis XIV. in 1687 and 1688.\*

A class of writers, following the found, have referred the word to Pelasa, an ancient Sauskrit name of Behar or Magadha, to Fali a vilage, to Pali a tower or fort, to Palestine, to the Palatine hills, and to Pehlve. The best modern Pali scholars reject all these derivations, but they differ among themselves as to the true one.

Turnour defined Pali by "Original text, regularity." Alwis controverts this statement, and says: "Nor does it mean root or original.-The word Pali originally signified a line, row, range." The two definitions are not incompatible with each other. Both may be true.

Tursons was undoubtedly well aware that the etymology of the word was *line*; but etymology does not always give the significauion of a word, or the meaning of *tragedy* would be "a song of a goat"; that is determined by the usage.

Judean in his Burmeze Dictionary, defines pátt, Pali ráthat, "An original text or reading"; and the translator of a Pali book soil to be Buddhaghosa, defines pátha by Pali. When a word is repeated in the Pali text, he cays: "It is in the pátha or Pali". Although the word is undoubtedly Pali in modern usage, yet it would not be Pali in the usage of the writer, unless it were found in the pátha, or original text. Turneur then is well sustained in his definition by Buddhaghosa, and Dr. Julsen.

Pali, in its present usage, appears to have originated with the Buddhist interpreters, after the original writings were translated into the verneculars; and was made to denote the original text, just as exceptical writers in English, use "Original" and Original  $L_{inequality}$  in their notes, when referring to the Greek and Hebrew Scriptures. A somewhat parallel case is found in the word Peshito which etymologically signifies simple, but which is constantly used in the signification of the Syriac language.

It may be objected to the modern origin of this usage of Pali that the word is found in Asoka's inscriptions. Alwis writes: "He-VAN CHA BEVAN CHA ME PALIYO VADETHA. "Thus, thus, shall ye cause to be read my Páliyo or edicts."\*

This however is not the reading of Aseka's inscription, but the reading of Spiegel's Sanskrit transcript.<sup>†</sup> There is no me or map in the text, no long  $\dot{a}$  after the p, or v, the vowel after d is not v but  $\dot{a}$ , and it is altogether uncertain about the character -J being  $l_{-}$  It may be  $r_{-}$ . The sentence is from the inscription zround the shaft of Ferez's Lut and, reads:

04416463464

Hevan cha kezan cha pariyovadátha.

Pariya, in Pali, signifies the end or termination.

Vada, is the verb to speak, here in the third person plural, but with the proposition ava. changed to o in composition, it signifies to teach. The two written in full, would be *pariya ovadátha*<sup>‡</sup>, but by the rules of Permutation the initial vowel of the second word is combined with the last of the first word, and the whole is written: *pariyovadátha*.§

The rendering given above is substantially the same as that first given by Princep: "In such wise do ye address on all sides the people united in religion."

It remains to be noted, what seems to have escaped the attention of previous writers, that the native lexicographers trace the etymology of the word Pali back of the derivative noun pdi 'a line', to the verbal root pd 'to preserve, take care of', and say that this is the signification of the word Pdli, and is applied to the Pali

\*Alwis' Pali Grammar page IV.

language, because in it are preserved the discourses of the Buddhas. They write:

Atthan ráti rakkhati iti tasmá páli. အက္တီပါတိရက္ခတိ ဆူတိတသ္မ္မာပါဠီ

",'The signification, it guards preserves, so on this account Pali."

### EXTENSION OF THE PALI LANGUAGE.

At present Pali is a dead language found only in Bud linet books in Ceylon, Farther India, and China; but inscriptions in dialects of Fall, dating back to the third century before the Christian era have been found in Orissa, Behar, Ailahabad, Delhi, the Punjab, Guzerat, and Afghanistan; and the kings of Baetria used it on one side of their coing, while they inscribed Greek on the other.

In north-western India the language was written contemporaneously in two widely different alphabets, one Aryan and the other Shemitic. The coins of Krananda, who reigned in Palibrotha, at the time, it is surpoled, that Alexander came to India, are found in great numbers with Indian Pali on one side, and Shemitic Pali on the other in a character nearly allied to the Phœnician found on bricks from Nineveh. Thus it is certain that some two thousand years ago, Pali was used from Calcutta to Cabul, written side by side now with Greek, and anon with Phœnician.

The inference has hence been drawn, that Pali was once the vernacular d alect of all northern India, from the Bay of Bengal to "the Gulph of Cutch; and from Cuttack to Cabul. But this is quite incredible, for that wide region, from the earliest historic times, has been inhabited by many different tribes, speaking widely different dialects.

We must resort to some other hypothesis to account for the extensive use of Pali in official documents intended to be read by the people. For the lack of more, trustworthy materials, we may take, as having a probable foundation in truth, a myth related in the Buddhist' books. Gaudama found the truth of the adage, that a prophet has no honor in his own country. When he first preached to his relatives in their vernacular language, they derided him, and said the preceding Buddhas had always preached in Pali, while he could speak to them only in the vulgar tongue; from which they drew the inference that he was no Buddha.

"Then Gaudama thought again, and said 'Taking altha sansakila pakáragá" the learned Senskrit lock or writings, to nalo them of no alcount, I will teach in the long age of an iquity, that is to say in altha páll sansakila pakarapat the longuage of the learned Pali-Sanskrit bocks'-Thus having determined, he preached in the language of the Sanskrit Lock or blocks, cancalita pakáragá. But those who heard found it very difficult to understand."

According to this tradition, Pali-Janshrit was an old, or dead language, in the days of Gaudama; and if Gaudama used a language imperfectly understood by the people, but popular with the multitude because a learned language, why may not Asoka have done the same thing? The difference between the language of the Insertptions and that of the Pali books may be concensions to the dialects then spoken in different localities, while the Learned Fall Sansakita was substantially retained. The use of the monitish Latin in the Middle Ages is something parallel.

### THE FIRST PALL GRAMMAR.

The difficulty that Gaudama's hearers found in understanding the *Páli-Sansakita* in which he preached, is represented as the occasion of the formation of the first Pali Grammar. When the people complained of not understanding the signification of Gaudama's discourses, Kachehayano one of his favorite disciples, after meditating on the subject, came before his associates with the proposition, that subsequently became the first Aphorism of his Grammar:

Attho akkhará sanyáto.

### အက္ကောအက္ခရာသညာတော

"The signification is known by letters."

Gandama finally appointed him the Fali Grammarian, saying to the assembly:

"Priests, from among my clerical disciples, who are able to simplify in detail that which is spoken in epitome, the most eminant is the Great KACHCHAYANO."

ီအထ္ထသံ**သ**က်တပကၥ**ုဏာ** †အက္ကပါလီသံသကိတင္ကကာင္ (ကာ

### NUMBER OF LETTER3.

§ 1. After saying that the signification is known by letters, Kuchchayano proceeds to state that the number of the letters is forty one; thirty three consonants and eight vowels, which he gives as below:

ယခဂဃငစ္ဆဖစ်သြင်းဦဒီခံစာ**ယာလာထ** क खगघडु च छ ज झ ज ट ठ ड ढ ग ম ्य k kh g gh ng ch chh j jh ny t th d dh  $\underline{n}$ t th ေခ့န္ပဖဗၥာမယရ္လဝသဟဒုိ दधन पफ ब भ म य र ल व स इ d dh n p ph b bh m y r l v 8 h l an အေအာဆူဤ ဥဦး သြေ श्व छा इई उज र झे। á i ź ú 21. е 0

§ 2. There are no dipththongs in Pali, and no representatives of the Sanskrit letters:

रे .	च्चेा	च्छा प	कृ	ন্থ	ॡ	য়া	ष.
							sh .
m	<b>n</b> . •	T 11				• •	

§ 3. The Bactrian Pali with the Phœnician alphabet, has three sibilents, as in Sanskrit; and they have representatives in the Burmore Square Alphabet, but they are modern additions, and have no place in the books.

§ 4. On the other hand, there is an additional l in Pali not found in common Sanskrit writings; nor met in Asoka's inscriptions. It appears to correspond to the Vedic l which Benfey says is used for d in some Vedic works. In some instances, the Pali j corresponds to d in Sunskrit; as in the numeral solasa\* 'sixteen', which in Sanskrit is *shoducunt*. This is confirmed by the form of the letter, nearly that of a reversed d. A distinguished Sanskrit Scholar writes: "About the letter l in Sanskrit, strictly speaking there is only one; but in Bengales, and to some extent in Hindee, the palatal d is very frequently p ronounced somewhat like l

े घोड शन्

\*သောခ်ဆ

oscillating between that and r." This is probably the sound represented by the second l in Pali.

§ 5. Clough gives a character, a substitute for r, equivalent to q, final r, 'placed on the top of a consonant but pronounced before it'." No such character and no such compounds exist in Burmece Pali. It corresponds to the Sanskrit  $\degree$  and appears to have been introduced from the Sanskrit into Singalese Pali, since the Pali books were brought to Burmah in the fifth century. According to Alwis, Meggalleyana's Grammar, which Clough translated,  $\dagger$  was written in the twelfth century, seven hundred years after the Pali books had been brought to Burmah.

§ 6. The following Sanskrit finals are not found in Pali:

## ङ् ग् न् म् क् ट त् प की र्ट त् पै

ng n m k t t p rk rt rp§ 7. In Pai no word ends in any final consonant but °, the nesal symbol called *niggahitan*, and in Sanskrit anuswara.

§ 8. The aspirate h, and the semi-vowels y, r, and v, when united with a preceding consonant, are written by a symbol; as:

Kanho, t black. Anyo, s another.

Prichchhá, scorpio. Twán, thou.

The symbol for h, on the Inscriptions, turns to the right, while in books it turns to the left; as:

Samájahmi, \*\* "in an assembly."

§ 9. Consonants when compounded with other consonants, usually retain their normal forms, but d preceded by  $\underline{n}$ , is written in a peculiar manner under the  $\underline{n}$ ; as dandd', ++ a pilgrim.

§ 10. The double s is denoted by a peculiar character, as: tassa  $\ddagger1$  to him. The same character, in modern Pali, is made to represent the Sanskrit sh, c, and shy. In the Asoka Inscriptions this character is supplied by the single s, and since it is not noticed by Kachchayano, it is probable that the character was unknown in books when his-Grammar was written.

### DIVISION OF LETTERS.

The first twenty five consonants are divided into live classes according to the organs with which they are pronounced, and the other eight, including the anuswara, are unclassified. Three vowels are short and five long, Kachchayano adds: Sakota gaadhesa "In the books of Oade, or in the Sanskrit books, the consnants are divided into surds and sonants, and that division may be appropriately adopted in this." The two first letters of each class, with the sibilant s, are surds, while all the rest are schemes.

§ I1. The following table exhibits hese several divisions at one view.

Surds.	Sonants.	Su	rds.	So	nant	<b>8</b> .

### PRONUNCIATION.

"The ancient pronunciation of the Greek can now only be inf.rred, and, in part, with great uncertainty. The pronunciation of modern scholars is exceedingly various. Of the different methods that prevail, the English is probably the faithest removed from the ancient pronunciation," With the alteration of one word, these remarks are true of the Pali.—The Burmese is probably the farth est from the ancient pronunciation.'

ီသကဋဂန္စေသူ .

2...

17

3

§ 12. In Barmah the Pali  $\infty$ , is pronounced like th in the. The v is always pronounced w. It was probably pronounced w originally, when the last member of a compound constant, but v in other circumstances. All the cerebals or linguals are pronounced like the dentals; and the aspirate sonants, or flat mutes are not distinguished in sound from their corr spin ling unospirated letters; and are often used interchangably in writing. The anuswara is pronounced n, and the voxel o, au.

§ 13. The cerebals and dentals appear to have been used interchangably in writing from the earliest period, and could not have differed much in pronunciation. In the inscriptions the sam<sup> $\theta$ </sup> word in the same line is occusionly written both ways; as:  $\beta \beta \beta$ dasan, and  $\beta \beta \beta$  dasan ten. The same diversity in writing this numeral is found in the Pali books.

\$ 14. So g th is interchanged with  $\infty$  th; as  $\frac{1}{2} \circ g$  natthi, and  $\frac{1}{2} \circ g$  natthi is not.

§ 15. So again a and m are interchanged, as in the name of the Grammarian, which is written both  $m_{0}$  (a) Kachchayano, and  $m_{0}$  ( $m_{0}$ ) Kachchayano.

§ 16. The cerebal l is very uncertain in its usage. In many words where it is ts d in Burmah, the con mon l is found in Ceylon. Numerous examples are met in Clough's Grammar. Thus

 $\begin{array}{c} \bigcirc \& p & di \ a \ line, \quad \text{is } p & di, \quad \text{with the small}, \ l \ \text{in Ceylon.} \\ \textcircled{}{C} & \bigcirc \& el & \textbf{cardamom}, \ el & , \quad , \quad , \quad , \\ \end{array}$ 

A similar diversity of usage prevails in the Burmese Pali. Occasionally the same word, has one in the text, and the other in the commentary.

§ 17. Nothing can be inferred to determin dialects from the uasge of cerebals and dentals. Prince says; "The word prati, a prefix in Sanskrit—In the Pall of Girnar this is merely altered to pati  $\bigcup_{A}$  by ommission of the r. In the language of the pillars the same preposition is always written pati  $\bigcup_{A}$  (with the cerebal t. The orthography varies in the written Pali of books, being in Ceylonese pati, in Burmese pati.'

Digitized by Google

<sup>\*</sup>Journal of Asiatic Society of Bengal, March, 1838.

Surds and Sonante.

§ 18. This distinction is based on imperfect deta. Clough spells the word path, which shows that both modes exist in Ceylan, and the two forms are common in Burmah; as:

ပဋိပာာ ၁ရာ ပဒုသ္မာပတိ Pail háro doorkeeper. Padusmá pati instead of a lily.

 $\S$  I9 The surds and sonants are often interchanged with each other; as:

. . .

§ 20.				n) ೧೦೦೦೦ gahápr <u>u</u>	ú, money
§ 21.	<b>0</b> ch	୍ର j	દિર્ગ્ <b>ગ્ર</b> jina rachuna	&şoc jina vajana	, words of jina
§ 22.	တ t	$egin{smallmatrix} egin{array}{c} \ dh \ dh \ \end{pmatrix}$	နိရေးတ nurola	<b>ସ୍ଟି</b> ତ୍ରେମ nirodha	o hindering.
1	th	dh	væ8 pathavi		, the earth
	ţh	dh	the <b>p</b> elwá	OGUO dhapewtá,	go having placed.
§ 25.	О р	೮ ೬ ಾ೯	ကောင်တီ mohá rati ဗတိ u buti		ereat Lord.
		nar	u bati		Lord of men
§ 26: (	ь і	つ <sup>5</sup> ル	ocl3 phayguns	ဘလ <b>ဂု</b> န် bhalayuni <b>, B l</b>	unar mansion.
§ 27.	ບ	0	8-3	800	
	b	V	bisi	visa,	twenty.

The changes of sinds and consists was undoubtedly the result of pronunciation, similar changes occurring in other languages, and the variation in spelling arises from the words sometimes retaining their normal forms, and sometimes being written as they were pronounced.

§ 23. A double thappeners to have been promouned is sometimes like tr; as: 0 3 0 1 title and tatea there. In the inscriptions it is written by a single t, as:  $J, \lambda$  yets where,  $J, \lambda, J, \lambda$  yets yets, wherever,  $J, \lambda, J, \lambda$  savets, every where.

§ 29. The symbol of y often indicates an original form wit a double letter; as: erter and estyr a royal race. solla and edga, an arrow ວຽງ ວະດາ

§ 30 From a difference in pronunciation h, dh, and d are found orisistically interchanged; as: 突い 突っ 突っ だっ iha, idha, ant ili, hore; いう のい sullis and ourse, good.

§ 31. Y appears to have been promond j operationally, for these letters are found interchanged in the same word; as: OOROOO OOROO gavayo, and gavajo, the gayal.

§ 32. L and r also pass into each other; as: www.com www.com makes.d. and makes.ara, groat woalth.

§ 33. On some of the Interplions the appirate h is inserted bafore a few words beginning with vowels, "Which," Printep says, "as far as I know, has no parallel in any of the Grammatical P. akits." The same usage however is occasionally, though not often, found in the Pali. Instances occur in the Pitalia. Thus in the Katha, the fifth book of the Abhidhamma:

> ဟော်ခုံးဟာခံခက္ကြမ္တ for ငံခုံးဝံဝက္ကာမ္တ humma havan wittable ... evan na evim vattable,

> > :

"Thus [or] not thus they are not to be sail."

# CHAPTER II. PERMUTATION.

In Greek, a vowel if short at the end of a word, is cometimes d. cpied when followed by another word beginning with a vowel; and if long, the two vowels are occasionally contracted into one. A final *n* before a classified letter is usually changed to a letter of that class, and the classified letters themselves are subject to certain changes when united to others. In Pali, when two words meet similar changes occur, but much more extensively then in Greek; and this part of the Grammar Sanskrit grammarians denominate "Combination and Permutation"; but it embraces only the same things that in Greek Grammars have been previously named Contraction, Crasis, Elision and Euphonic changes of consonants.

#### WHEN TWO VOWELS MEET.

§ 34. When one word ends in a vowel, and the next one be i ins with a vewel, one vowel is usually substituted for the two and attached to the first word.

#### a followed by a.

§ 35. When a at the end of one word is followed by a at the beginning of the next,

(a.) One is elided ;as:

3300 natthi from 3 na and 3300 atthi, "is not" In the phauli inscription this compound is written with the short versel,  $\perp \bigcirc 1$  nathi as in book Pali.

(b.) The two short vowels are sometimes changed to long  $\dot{a}$ ;

# တဘြာဘိရတိ တကြ အဘိရတိ

tatra birati from tatra and abirati, "great pleasure there." This is the rule in Sanskrit, and in the Girnar and other inseriptions, where the verb takes the Sanskrit form, the Sanskrit rule of Termutation is followed, and the long vowel is written: as:

أَ أَنْ **مَا أَحْدَ اللَّهُ مَا أَحْدَ اللَّهُ اللَّ اللَّهُ اللَّ اللَّهُ اللَّ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللللَّ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّالِي اللَّالِي اللَّالِي اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّا اللَّهُ اللَّهُ اللَّهُ اللَّ** 

Permutation of A.

a and  $\dot{a}$  followed by  $\dot{a}$ .

5 36. When a or a is followed by d, \* they become a; es: oporo opo sol rájdel from rája and ard, "thou art a king:" owoprobazo owopo solodzo vaghánalinto from vaghána and álinto, "a poroh, a terrace."

a followed by i.

§ 37. When a is followed by i,

(a.) The  $\sigma$  is clidel; as:

courde is courd and indre, "orgin of having." (b.) The two vowels are changed to long á: rs: ວະອະດຽງເວຽງເບັນເວັດ ເຊິ່ງ 
(c.) The two vowels coalesce into c; as:

లస్టియిం లస్టియి జిం bandhussera for bandhussa and iva, "as to a relative."

This last case is the rule in Sanskrit, but it is the exception in Pali.

#### á followed by i.

§ 38. When  $\dot{a}$  long is followed by i, the two vowels are changed to long i; as:

သံဦးခြက္ကိပူခြိသဿာသင္မြိ saddhidha vittan purisassa setan သင္ပါ ဆုခ စက္ကံ ပူခြိယဿ ေသင္ပြိ from saddhá idha vittan purisassa setan, "Here [i. e. in this world] right religious effections [or faith] is the best property of man."

The Sauskrit rules require the combined vowel in this care to be e.

a followed by u.

ဦးကာ

§ 39. When a is followed by  $u_i$ ,

(?) The a is elided; as:

သူထဲစလာ

\*"At the end of a word" and "at the beginning of another," are t o be understeed in this and the following pringraphe, so in §35.

රාප්රා

situduká for sita an 1 udaká, "white walers." (b.) The two vowels coalecce into long d; as: ဥတယံ အနာဂါဂါချပ် ရူဘယ် အခါဂါးရဟိ 0 and járehichúbayan from anagárchi, cha, ubayan "And wi h anchorites, with both." (c.) The two vowels are changed to o; as: သချိုင္စနားမတိ သင်္ဂျ ဥငပတ sangkhyannopeti sanukhyan ma upeti, from "Enters not into the number."

This is an exceptionable case in I'ali, but it is the rule in Sanskrit.

 $\acute{a}$  followed by u.

§ 40. When a long  $\dot{a}$  is followed by u, the  $\dot{a}$  remains, and the u is changed to the semi-vowel v; as:

wood wo Eol mávacká from má end uchd, "Say not."

a or a followed by e or o

§ 41. When d or a is followed by e or o, it is elided; as: သံဃံတာသာ၁ရသံ • သံဃံ တယ သူဓသံ sanghan tassorasur, for sanghan tassa orusan: "His own son, the church." လူလူသူ တာထလူသူ တဘာ tathetitan tathá etitan "Besides teaching." သံံ့သူခဲ့လေပပါတီကါ တ္ခံိတာအဖာ නිංගිහිතා sansedajo papátiká from sansedajá and opapátiká, "Freduced by filth, produced by a visible body." i followed by i. § 42. When i is followed by i, (a.) One i is elided; as: පොහුහු ဒေလ dehiti for

dehiti for dehi and iti, "Give! Thus" [he said.] (b.) The two coalesce into long i; as: ພວກາສໄຊ້ຮວນລາວິດີ ພວກາ ສໄຊ້ ຮາບມາດິ

ဗ္ဗတိ mahádánandassámíti from mahá, dúnan, dassámi, iti. "I will give the great gift: Thus" [he said.]

Permutations of I.

This is the rule in Sanskrit, and is followed in the Inscriptions သူကတံ ဂစ္စတ် aa: 10+(+611 ဇ္ဆတ from sukatan kachhatiti sukatan gachehhuti iti "He attains merit: Thus" [he said.]\* i followed by a. § 43. When i is followelly a, (a.) The i is elided; as: ဓမ္မရဇ် နမါပ် အဟံ ဝမ္မရ ဇိနမါမဘဲ dhan marajan namámahan from dham marajan, namámi, ahan; "I worship the king of the law." (b.) The a is elided; as: o වාරිථා o වාරි නාරා vadámihan from vadámi ahan, "I say." (c.) The *i* is changed to the semi-vowel y; as: ပစိုသန္မာရ၀တြူလာ ု ဗိုဂ္ဂသန္မာရ ၀ုတ္ထ အဿ patisandháravutyassa f om patisandhára, vutti, assa; "Its accurate comment." (d.) The *i* is clarged to the semi-vowel y, to which the a lengthened into  $\dot{a}$  is attached; as: အန္တရိယျာန္စျာန္တရံ အန္တရိယျာန် အန္တရံ anturiyyányántaran from anturiyyáni End antaran, "An upper garment, clothing." The Sanskrit rule requires y in every case. i followed by a, or e. § 44. When i is followed by  $\dot{a}$ , or  $e_i$ (a.) The i is elided; as: හිගි တိုဟာသားရကို အာကားရဟိ tihákárehi from tihi. and ákárchi: "By three tokens." နောဟိ တော် ေရာဒဟာတီ nchetan from nohi and etan. "Not proper, this." (b.) The *i* is changed to the semi-vowel y, as: ဗီလူ ဆန္ ityádi from iti ádi, "So beginning." င္လာလူ) ဒီ 👘

<sup>\*</sup> Journal of Asiatic Society of Bergal, July, 1837; where the passage is rendered: "Shall attain eternal happiness, (or shall be united with SUGATO.)"

လာ ပဒ်လာ (ကပအျကပ<sup>ဒ္ဒ</sup>ကေ 08 ငက eka, pati, eka, padiko, ekapadyekapadike from "A foot-path, in a foot-path." Case (b.) is the rule in Sanskrit. i or i followed by u. § 45 When i short, or i long is followed by u, (a.) The i or i is elided; as: 8ි නී ဥသဘံ တာဗိသတုသဘံ တာ visati, and usaban; from tá. távisatusaban "Twenty tahs [make] a usabah." kosampujjeniyo from kosampi, ujjeniyo: "Knouj, Ujjein." (b.) The i is changed to the semi-vowel y; as: ဥဒရ ဖက္ရွိခါ၊ ဇန္တာမ ဖလန်ရ jalanidhyudadhi from jalanidhi udadhi, "Sea, ocean." This is the rule in Sanskrit. u followed by u. § 46. When u is followed by u, one u is elided; as: ုမှုလံံ တူ ဥသိရံ မူလံံတူသိရံ múlan tusiran from múlan tu usiran, "A root, khus khus gress." u followed by a. § 47. When u is followed by  $a_{1}$ , (a.) The a is elided; as: လောကဟေတုဒ်ဏာမတိ conn connakhinamati, lokahetukhi<u>n</u>amati from loka hetu "The cause of the world, possessed of imperishable wisdom." (b) The two vowels coalesce into the semi-vowel v; as; ဓာတ္မွန္ဘညာ ဓာတ္ အန္တဿ "To the end of a root." dhátwantassa from dhatu antassa, In Sanskrit the combined vowels become v or a. u followed by  $\dot{a}$ . § 48. when u is followed by  $\dot{a}$ , (a) The u is elided: as: စက္ခါယတနံ စက္က ဘာပစတန chakkháyatanan from chakkhu áyatanan "Abode of sight, or eye." 4

(b) The u is changed to the semi-vowel v, and the a is appended to it; as:

స్టునించి ఇంగించి swágatan from su ágatan, "Well coming." Both cases, (a.) and (b.), accord with Sanskrit usage.

u followed by i.

§ 49. When u is followed by i,

(a.) The i is elided, and the u remains unchanged; as:

**O**ALE **E Chakkhundre from chakkhu** indre, "The faculty of sight, or eye."

(b.) The *i* is elided, and the *u* lengthened into  $\dot{u}$ ; as:  $23390^{23}$   $23390^{23}$ 

sádhúti from sádhu iti, "Good! [he said.]" Both (a.) and (b.) differ from the Sanskrit rules, which reguire the semi-vowel v.

## u followed by e.

§ 50. When u is followed by e, it is changed to the semivowel v and the e remains; as:

vattwettha vihitan from	၀န္လ	CB3 ettha	පිහු vihitan
vattwettha vihitan from *'Landed possessions	vättu are adjud		

e followed by e.

§ 51. When e is followed by e, one e is elided; as:

	ငစ္စထ္ထန္စာဂတာ		င့်ခ	883	ခုံးဂတာ	
•	netthanágatá	from	ne	ettha	nágatá,	

"They not having arrived at that place."

This corresponds with Sanskrit usage.

e followed by a.

§ 52. When e is followed by a.

.. .

(a.) The *e* is changed to the semi-vowel *y* and the *a* remains unchanged; as:

တူသာပဟိန္နာဟောန္တ်င်္တေ ာင္စာ က်လ္လား pahina tyassa pahiná honti from te - assa honti. "These things have been rejected of, or by, those persons."

(b.) The *e* is changed to *y*, and the short *a* is lengthened to long  $\dot{a}$ ; as:

മ്പാന് പ്രാദാവു നോ ജന് ഭ്രാദാവു tyáhan evan vadegya from te ahan evan vadegya. "I would speak thus to thee."

o followed by c, a, i, u, c. § 53. When o is followed any vowel, The other vowel is elided: as: ( a• ) အခဲ့င်မာမက အခဲ့င်မာ သြမ်က adhamo maka from adhamo "Vile, inferior." omaka, ယောက် ယာာ အက် yohan "I, who." from yo ahan. စည္လာဂရာမမ ငက္ထားရာ ဗ္ကင္မေ chuitárome from chattáro "These four." ime, ဥပပတိ အဘာဂဂုလ္က အားတာ athopapati from atho upapati, "Agaiu, a paramour." (b.) Before a, it is sometimes changed to the semi-vowel v, and the  $\alpha$  is lengthened into  $\dot{\alpha}$ ; as: လွှာဟံ သော အဟံ swáhan from so ahan "This person, I." (c.) Occasionally it is elided; as: ၛၟႄႜၣ႞ၛၟၘၯ ဖြစ် ရင်ဗီ၁ ဆီလူ Jinabuddhiti from Jina buddho iti, "Jina-Buddha, [ it is said. ]

The preceding do not embrace all possible cases, but they include all of common occurrence, and many more than are found in Kachchayano's Grammar.

## KACHCHAYANO'S RULES.

Kachchayano gives seven-rules:

§ 54. (1.) When similar vowels meet, the first is elided.

§ 55. (2) When dissimilar vowels meet, the last is some-

§ 56. (3.) When the first vowel has been elided, so or 10 sometimes takes the place of both vowels.

§ 57. (4.) Sometimes when the first vowel has been elided, , the second is lengthened.

§ 58. (5.) When the second vowel has been elided, the first is cometimes lengthened,

§ 59. (6.) A final e is sometimes changed to y.

§ 60. (7.) A final u or o is sometimes changed to v.

These rules are not of much practical value, but no general rules can be formed that are not beset with numerous exceptions.

#### GENERAL RULES.

The following deductions from the examples given, may be found useful for reference.

§ 61. When similar vowels meet, one is elided and the other remains unchanged. See § 35. a. § 36. § 42, a. § 46. §51. § 53. Exceptions: § 35. b. § 42. b. § 62. When i is followed by u or e; and when i or e is fol-

lowed by a,

(a.) It is changed to the semi-vowel y. See § 45. b. § 44. b. § 43. c. § 52. a.

(b.) When a or u precedes, this change does not take place. See § 37. § 41. § 49.

§ 63. When u is followed by a or e, or o is followed by a,

(a.) the u or o is changed to the semi-vowel v. See § 47. b§ 50. §53. b.

(b.) This change does not occur when a precedes u or o; unless a be lengthened to  $\dot{a}$ . See § 39. § 41. § 40.

§ 64. Unless changed to the semi-vowel v, o usually maintains its position before all other vowels, and is sometimes formed by the combination of a and u. See § 53. § 39. c.

#### INSERTION OF CONSONANTS.

When one word ending in a vowel is followed by another beginning with a vowel, a consonant is occasionally inserted between them, and the vowels remain unchanged. The consonants used are:

t. d. n. m. y. r. l. v. an. § 65. t inserted; as;

ပာသ္မာတီဟာ ယသ္မာ ဗူဟ yasmátiha for yasmá iha, "On which account here." § 66. d inserted; as:

(ဒန္တဿ ေအန္တဿ edantassa for e antassa, ""For e fina!." § 67. n inserted as:

ဆူတော္နာယတိ ဆူတော အာကတိ itenáyati from ite áyati, "From this place he comes."

§ 68. m inserted; as: ကသွားမဝ ကသွာ ဗ္ကဝ iva, "From what account, so?" kasmámiva from kasmá § 69. y inserted: as: ကသာက္မႈ ကထာ ထိုး idan, "Besides this." yatháyidan from yathá § 70. r inserted; as: ໜ້ວມເບົາຊີວ ວາງລາເບິ່ງ ຕູວ iva "Like mustard." from sásapo sásaporiva § 71. 1 inserted; as: ဆလာယတနံ ဆ အါယတနံ chhaláyatanan from chha áyatanan, "Six abodes," § 72.  $\mathbf{v}$  inserted; as: တင္မတာဝန္ခြာက သူတော့ မိန္မာက "From this rising." from tato tatovu táya utága, § 73. an, anuswara, inserted before consonant or vowel; as: မရှိခံစာတိံသရာမိ မရှိမောာတိံသရာမိ မရှိခံစာတိံသရာမိ မရှိခံစာတိံသရာမိ puriman játin sarámi, for purima játin sarámi

"I remember former states of existance."

#### WHEN VOWELS ARE FOLLOWED BY CONSONANTS.

§ 74. When a word ends in a vowel and the next word begins with a consonant, the vowel is occasionally subjected to some change; as:

(a.) The vowel is sometimes lengthened, as a to  $\dot{a}$ , and i to  $\dot{i}$ ; as:

లు ట్రం ప్రోరియిందింది. sammádhaman vipassalo, sammá for samma: "He who has seen well the law."

ဂါေမမရနီစၥရ ဂါမေမရနိစရေ gáme muní charc for gáme muni chare.

"The Sage may dwell in the village."

(b.) Sometimes a long yowel is shortened; as i to i; thus: ເວລາຈຸດໃຊີຈຸວພະເວລາ ເວລາຈຸດໃຊ້ຈຸວພະເວລາ bowavádi námaso for bonavádi námaso, "Baavidi by nana." (c.) Sometimes one vowel is exchanged for another,  $\cdot$ ; o, or o for a; thus;

CODDESS CODDESS esadhamo from esodhammo, "This law." စိသာသယစ်ရှိသုပ္စရောသပာလာ ပရော ပရ pintáya charitu paro sahasan, paro for para;

"More than a thousand to go for boiled rice."

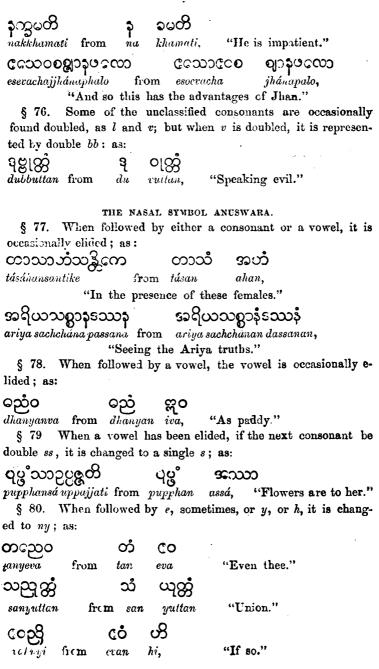

§ 75. When a word ends in a vowel, and the next begins with any classified letter not a nasal, that letter is doubled; but if it be an aspirate, its corresponding unaspirated letter is used. Hence the following compound consonants are found at the beginning of words in sentences where the normal form begins with the second member of the compound:

kk	gg	chch	jj	ŧŧ	ģģ	tt	dd	pp	bb
33	8	8	8			83	3	8	ង្គ
kkh	ggh	<b>ch</b> chh	jjh	ţţh	<i>d</i> dh	tth	d dh	pph	bbh
က္ခ		వి	8	ercs S		88	8	ပ္ပ	ည

The following examples may suffice to illustrate these changes:

ශා abikkantaro fr	<b>ශා</b> කොට	ကန္တင္ရေါ kantaro,	( <b>1</b> 777777)
ပရိုဂ္ပင္စတါ		Rantaro,	"Very desirable."
pariygaho fro	om pa	gaho <b>,</b>	"Seizing."
ငတင္ထုိသ tettinsa fro		రి°చి tinsa,	"Thirty three,"
0රාපුරා chatuidasa from	∙ covi n chatu	SN dasa,	"Fourteen."
ဆင္ထါသ chhabbisa fron	oo kaa a		"Twenty six."
සු පිරිස් ක්ෂේ	formassa from there is formal	rec m <i>idva</i> getfulness i	OGOGI prmádo. 10 man."

Anuswara before a vowel.

§ 81. When followed by a vowel, anuswara is usually changed to m; as: ကောနုတွမသိ (ကား တ္ပံ အသူ twan asi. "Who art thou?" konutwamasi konu from ကိမဟံကဒရယျာမိ အဟုံ ကင္ရရယ္ရျာမွ kimahan kareyy**á**m**i** from kin ahan kareyyámi, "What may I do?" အက္ကေသု တုပ္ခံစုက္တေသု တု 830 tumichchhatthesu from tun ichchha atthesu. "Tun in the signification of wishing." ອີເວັ ၜႄႝႜႜႜၣၛ႙ၟၛၗ ဥက္ကမံ "The best offering." dánamuttaman from dánan uttaman, (၀င္စပ္ကေတ့) ¢Ò ဇတိ "Thus this." evametan from evan etan, § 82. Occasionally it is changed to d; as (တဒင္ရဝ)စ ငတ အာဝေါစ "This he said." etadarucha from etan ávocha, § 83. When followed by a classified letter, anuswara is changed to the nasal of the class to which it belongs; as: രാഹി CÒ ເລິ evangkho from kho. evan "So indeed." ဂဟံ ငဟည္ဟ O gahan gahanycha from eha "And a house." တတိယံ တတ္ပက္ 8 tatiyampi from tatiyan pi, "And the third time." ന്ദ് ကန္ဘားမော နာမော from kin námo. kinnámo "What name?" သုခၚန္တငဟာတု သူခံ တ ဟောတ္ sukhante hotu from sukhan te hotu. "May happiness be to thee!"

## CHAPTER III.

## TABLES OF DECLENSION.

Occidental grammarians take a word as a basis, and make all the particles of inflection radiate from it, as from a centre, but Kachchayano pursues the opposite course. He usually takes an inflection and makes all the varieties of nouns masculine feminine and neuter, adjectives, and pronouns diverge from that inflection as from a central point. Thus he gives s as the mark of the genitive singular, and then, in the tenth of his noun aphorisms, says

SOCOGOGO sákamore "On account of sa, sa comes."

That is, the original single s of the genitive is doubled, and becomes *ssa*. He next illustrates the use of the suffix by the following examples:

ပူရိသဿ	အဝွိဿ	သွယ်ကာ	သက္မရိဘာ
<b>pú</b> risassa	aggissa	bhikkhussu	<b>s</b> ayumbhussa
"Of a man,	of a fire,	of a priest,	of a divinity,
အသွဘဘာ	နဏ္ဍိဘာ	ဗ္ဗသိဿ	
abhib <b>hussa</b>	da <u>n</u> dissa	isissa	
of a god,	of <b>a</b> pilgriı	m, of a sage.	

In continuation of his making sa the central point, his next aphorism is:

သံသာငသွက္ေစ်းနည္ေ san sá swekavachanesu cha

"Also on account of san, sá, in the singular number." He adds the following examples:

တေသံ	တေဿာ	္ရမူဒသာ	ဗ္ဗဒိဿာ	တိဿိ
<i>etissun</i>	<i>etissá</i>	<i>imissan</i>	<i>imissá</i>	<i>tissan</i>
In this	of this	in this	of this	in that
නිාා	တဿိ	<b>အ</b> ရဿိ	အရဿာ	
<i>tissá</i>	tassan	<i>amusan</i>	amussá (All	feminine.)
of that,	in that,	in thi <b>s</b> ,	of this.	

The following tables of declension contain all that can be gleaned from the the whole of Kachchayano's examples.

# CHAPTER. IV.

### DECLENSION OF NOUNS.

The Pali has three genders, masculine, feminine, and neuter; and two numbers, singular, and plural. It differs from the Sanskrit, as the Latin differs from the Greek, in the absence of a dual number.

The Pali, like the Sanskrit, has eight cases, the nominative, the accusative, the instrumentive, the dative, the ablative, the genitive, the locative, and the vocative. The instrumentive and locative, unknown to Greek or Latin, express relations denoted by by, and *in*.

In Grock there are three sets of terminations to muck the distinctions of case, and hence three declensions; in Latin there are five, and therefore five declensions. Kachehayano gives one set of terminations, so according to his grammar, Fali has only one declension. The native Sanskrit grammarians also give a single set of case terminations, which are here furnished for comparison.

				11

Digitized by Google

The vocative is not considered by Fachelaysno, nor by the native Sanskrit grammarians, an independent case, but as included in the nominative.

These terminations unaltered are never found attached to any noun. Si, for instance, is always rejected from the nominative, and some other affix substituted. In Samkrit the *i* of Si is rejected together with *j*, sh, *t*, ug, p.\* By writers later than Kechchayano, each changed set of terminations has been crected into a separate declension, and hence fifteen declensions have been furnished for Pali nouns.

In the preceding Tables of Doclension are given all the different forms of Pali nouns, adjectives, and prenouns; and an  $\epsilon x$ amination of them will show, that they may be all conveniently classed under three declensions.

Mescaline and neuter nouns in a final, § 89. 90, furnish one well marked set of terminations, and may be compared with the Sanskrit as below.

found in manuscripts in Burmals, for the locative singular.

While there are many points of resemblance, it will be seen that the differences between Pali and Sanskrit are very considerable. In the masculine singular they agree in the accusative, instrumentive, genitive, one form of the locative, and one form of the vocative. In the plural they are nearly alike in the ablative, genitive, and one form of the locative; and in the nominative, and accusative singular and plural of the neuter they are identical.

In other instances however they differ widely. In Pali the ablative plural is the same as the instrumentive, while in Sanskrit it is the same as the dative, from which it differs in Pali; and the dative and genitive, both singular and plural, are the same in Pali, while they differ in Sanskrit. Stork<sup>\*</sup> makes the dative and genitive in Pali to differ, and gives dya in this declension for the dative singular, identical with the Sanskrit; but this is correct only as an exception The rule is that dya marks the dative singular of feminine forms, but not masculines; and the declension which has dya for the dative makes the genitive also in dya.

Kachchayano however in the 58th rule of his Second Book, gives some exceptions, in which after bases in a nenter, the dative singular is made by dya; but only when signifying for. These exceptions Kachchayano illustrates in the following sentence.

ສດຽວເບັ, ເອີດກາເບ, ຊາວົເບັ, ເອັດພະເວັດເຊັ່ອ attháya, hitáya, sukháya dzeamanuszánan, bukhtw ເດເວລາດ ລວເຊັດີ. loke upajjati

\*See "GRAMMATICE PALICE specimen alterum," page 7.

"For the well being, for the advantage, for the happiness of men and devas, Buddha was manifested in the world."

The correspondences between the Pali and the Sanskrit declinations though more numerous, are not more striking, than the correspondences between the Pali and the classical languages.

In all the masculine declensions in Greek, s is the final of the nominative singular, and according to Kachchayane, si was the original form in Pali. The neuter nominative singular, both Greek and Pali, is marked by n; and all the accusative singulars it Greek end in n, and so they do in Pali. The genitive singular of the third decleusion in Greek is os, in Pali it here is sso, and originally sa in Kachchayano's table, and on Asoko's inscriptions The genitive plural always ends in on in Greek, and in Pali always in an. So the mark of the Latin ablative plural *ibus*, has its counterpart in the Pali *ebhi*.

The feminine forms of § 95-100 furnish a second clearly characterized declension. The terminations are given below.

5 Noune in d i d u d tamining

The five oblique cases of the singular are the same in Pali; while they all differ in Sanskrit, but the difference is only in the vowel, the consonant y is the principal part of the termination in both languages. In Pali when the base ends in a, the y of the termination has a short, but when it ends in any other vowel, the a of the y is long, a distinction not make in Sanskrit. The Pali has a second form for the locative in yan, and this, it will be seen is identical with the Sanskrit form.

The forms in § 101-103, afford a third well defined declinsion, in which the root, out of the nominative case, is increased by a consonant, like many nouns of the third declension in Greek.

Sunskrit nouns that end in consonants are disposed of, in Pali in two ways. One class adds the vowel a to the consonant, an I then follows the First Declension. SIT dwar "a door", in Pali is gig dwars. In some instances, as HIR mais, Pali woo masa, "a month", the Sanskrit has the Pali form also, HIR maise

Another class drops the consonant in the nominative case, but introduces it in the oblique cases. Such are the nouns that appear in § 101-103.

126. Nouns increasing in the oblique cases.

# Characteristics of the Declensions.

In Pa'i DOO "Lord", is HJAR bhagavat in Satskrit,\* and a mana, "mind" is HAR manas in Sanskrit. They be'ong to the class of nouns, denominated by Max Müller, "Nouns with changable bases." Thus QO pumá, "a male, has two bases. QO puma, and QOIS pumáne. In Sanskrit this word has three bases, **GHIR GR GR GR** pumaas, pum, puns, and an s is found in two, which does not appear in Pali, where it signifies "male," and not "man", as sometimes defined in Sanskrit.

In this declension there is a closer resemblance between the Pali and the Sanskrit, than in the others, but there is a wide (ifference in the dative and genicive. The Pali top has more formsthan the Sanskrit, especially the third declension. In the singular the ablative has two different forms, the locative three, and the volative two. In the plural it has three forms for the instrumentive and ablative, and two for the locative, while in each case the Sanskrit has but one form.

Were all the Pali nouns comprised in the above three classes, the propriory of dividing them into three declensions would be unquestioned, and the decleasions might be distinguished, by the genitive singular, as in Greek, thus:

I	Declension,	$genitiv \boldsymbol{e}$	singular	ends	in	SSA.	
п	•••					YA	
ш						0	

But there are several other classes of nouns which it is not so clear what disposition had best be made of them. Thus masoalines in  $i, i, u, u, \xi$  91—94, occilate between the first and third declensions, like many objects in the kingdom of nature, which seem to claim relationship with two families, standing where the

\*Wilson defines HITER bhayavan, "One of the generic titles of a Jine, or Jaina defied sage." In Pali, MCO bhagavá destined as in § 102. with a second base MOOM bhagavata is one of the tiles of G udama, and it is found thus declined in the instription at Byrat;, where it reads:

HABA DDL HABA khapprotá Undhena Chasite "We so ven by the Lor' Bulla."

two circles touch each other. They might be made to constitute a separate decleusion, or they might be classed as a section of either the first or third. They are here placed in the first declension with which they agree in every case, in one form in which they are declined, excepting the instrumentive and ablative singular, and the nominative and accusative plural; and sometimes they are the same in the ablative.

They agree with the third declension in making the instrumentive and ablative in d, and in having a second form of the dative and genitive singular in o, besides the regular one in sec.

They correspond to *Hetercelites* in Greek. When declined with the genitive singular in *sta*, they are of the first declension, but when they make it in o, they are of the third. It is only necessary to note that besides the forms given in § 91-94, there are also found:

§ 137. Redundant forms of masculines in i, i, u, u.

(a.) Dative and genitive singular.

In like manner many nouns of the third declension, besides the forms given in the paradigme, § 101-105, have redundant forms in the singular conformed to the declension of *purisa*, § 89. For example: m and, MAD, declined on the base m and, without taking s, is declined:

Ins. ພະຈຸຈຸ <sup>manena</sup> Dat. Gen. ແຈ້ວວວ ການແລະອີ Abl. ພາວວາ ແລະອີງ ສາອາລະກາດ manah ma

\*See "GRAMMATICE PALICE specimen alterum;" page 29.

§ 138. Bhagavá A LORP, besides the forms given in § 102, is also declined, out of the nominative case, on the base bhagavanta, like purise of the first declension, thus:

Singular.	Plural.
ဘဂဝါ	ဘဂ္ဂ္ဂန္က ဘဂ္ဂ္ဂန္မာ
Nom. bhagará	bhagavants bhagavantá
ဘဂ၀္င္လံ	တဂဝင္မန္
Ace. bhagavantun.	bhagavanti
ဘဂ၀င္ကေန	ဘဂ၀န္မေဟိ ဘဂ၀န္မက်
Ins. bhagavantena	bhagavantehi bhagavantebhi
ဘဂဝန္တဿ	ဘဂဝန္တာနံ
D. G. bhagavantassa	bhagavantánan
ဘဂ၀န္တည္ပါ ဘဂ၀န္တမူး	).
All. bhagavantasmá vantahm	
ာဂ <b>္</b> န္ဘသ္မ်ိ	
Loc. bhagavantasmin	
ဘဂ၀န္ကမွ ဘဂ၀န္မ	န္မဘဂဝန္ကေသူ
bhagavantahmi bhagavan	
ဘဂ၀ါ ဘဂ၀ ဘဂဝံ	
Voc. bhagará bhagara bhagarar	a (as Nomination)

Nouns increasing by r, or that have a second base in which r appears, form a complete class in themselves, and might be treated as a separate declension, but there seems to be no sufficient reason for separating them from the third.

§ 139. Besides the forms given in the tables, certain nouns of agency are declined after the form of satthu A TEACHER; as:

mage kattu A DOER. OBE vattu A SPEAKER.

Digitized by Google

These nouns have a redundant form of the dative and genitive singular in son, like the first declension, as:

သက္ကုဿ	satthussa,	to or of	A	TEACHER.
ကက္တုဿ	kaitussa	•••• ••••	A	DOER.
မိတုက္	$pituss_{\alpha}$		A	FATHER.
မာတုဿ	mátussa	•••	A	MOTHER.
သတ္သဘာ	bhátussa		A	BROTHER.

§ 140.	Occasi	onally tl	he abla	tiv	e singular	18	made by	ito.	as:	
man	$\sim$	mátito,	from	A	MOTHER,					

හිතුංගා	pitito,	 A FATHER,
ဘာတိအော	bátito,	 A BROTHER,
ဗိတိဒတာ	dh <b>i</b> tito,	 A DAUGHTER,
ဒယ္ဂတ္မသည	duhitito,	 A DAUGHTER.

Clough declines mátu A NOTHER, in the singu'ar number, on the model of the second declension, making the instrumentive, dative, genitive, and ablative, mátuyá\*, but no such forms are given by Kachchayano, and they have probably been introduced into the language since his grammar was written.

In the Pali books the nominative plural is sometimes used for the singular, as:

မယ္ျိမာငရာ mayyan máro "My mother." တုဏ္မီမာငရာ tuhyan máro "Thy mother."

These nouns of relationship in Sanskrit make their finals in  $\mathfrak{V}$  ri, while the nouns of agency correspond to Sanskrit nouns made by the affix  $\mathfrak{T}$  tri.

§ 141. There is so little diversity in the fem nine forms in § 95-100, that no exception can be taken to making them a single declension. The apparent irregularity of *mati* wisdom is the result of permutation. The final i of the base is elided, and the yof the affix is compounded with the last consonant of the base. So also, among others;

ပထဝီ ရတီ pathaví THE BABTH, rati PLEASURE, with ယာ ယံ ပထဗျာ ပထဗျိ ရတျာ ရတ္ပံ yá yın bəəəmə pathabyá pathalyan ratyá ratyan § 142. Many feminines in ní are formed by the affix ní being added to masculine, as: ဘီက္ခု ဘီက္ခုနီ ဟာ္ထန္က ဟာ္ထန္ကနီ

bhikkhu a priest bhikkhuni a priestess hulli an elephant hullini a female elephant.

\*Clough's Grammar, page 42.

Sometimes the last vowel of the masculine suffers charge before the affix is appended, as:

မာတုလ	မာတုလာနီ
málula A MATERNAL UNCLE	mátulání WIFE OF UNCLE
ဂဟင်္ကရ	ဂဟတာနီ
gahapati MASTER OF A HOUSE	gahapatání MISTRESS OF A HOUSE
କ୍ଠତ୍ନି <i>rájá</i> ▲ KING	ຄວ $\&$ ຊີ $\tau \dot{a}jin \dot{a}$ A QUBEN

§ 143. In the Pali books, the masculine termination of the locative singular is sometimes added to the feminine form. Thus  $32\omega$ ,  $32\omega$ , niriyan and niriyahmi "In hell." are found on the same page.

§ 144. Sometimes the long vowel of the termination  $y\dot{a}$  is dropped, as:

200 00 00 00 00 chha khattiya kharda nithilan

"The sixth, the division of the kings, is fnished."

§ 145. The irregularities of the irregular nouns are accounted for by supposing the existance of two or more bases. Some cases are formed regularly from one base, and otler cases from the other base, or bases. Thus Sakhi A TRIEND, las two bases,  $\infty 3$   $\infty 3$  sakhi and sakhá.

Occasionally there are forms found from both roots in the same case. Thus the nominative and accusative plural of sakki, have both 28632 2281632 sakkino and sakkino.

§ 146. Brahma is irregular only in that it increases by z, in some of its cases instead of by n, and has two bases,

BOS BOS brehma and brahmaga. § 147, Adi BEGINNING, has irregular forms in the locative, which has the following forms:

အ) ဒ.	အါခ်ီမှိ	ෂාදුංරි	အါဒေါ	
á lin	ádihmi	ádismí	<b>á</b> do	

§ 148. Kamma A DEEP, and a few other n cuns, have a form with u in the instrumentive singular as;

ဗြဟ္ရ(m) brahmuná kammuná ကမ္ထုခ္မာ "By a Brahmin." "By a decd."

Digitized by Google

Irregularities of the Vocative.

§. 149. In the plural, the vocative is uniformly the same as the nominative, and most frequently has a form like it in the singular, always in the tables, when the vocative is not given. But nouns that have a long vowel in the nominative case, have also a second form of the vocative with a short vowel, as:

		သျှသာ	-	00	-00	
Voc.	-	bhátá	-			vedú
	ဘဂဝ	သုတ	ပုမ	သတ္တ	ଙ୍କ୍ୟର୍ର୍	ဝေဒု
Voc.	bhagara	bháta	puma	sattka	itti	vedu

On the other hand neuters that make the nominative singular in a final anuswara have a form of the vocative with a long vowel, as: Nom. at with a long vowel, rupan manan Voc at vipa rupa mana

§ 150. In most languages the nominative case is regarded as the base of the nonn, but in Pali, as in Sanskrit, the nominative case is usually formed from the base, and differs from it like the other cases. Thus the lase *purisa* forms its nominative *puriso*, and *rupa* makes *rupan*.

In forming compound words, the base and not the nominative case is used, and it is the base and not the nominative case that has to be looked up in Sanskrit dictionaries. A Pali dictionary might be appropriately compiled on the same principle, but the existing native Pali dictionaries insert the word in the nominative, and ignore the base altogether.

The root to which nouns are referred differ usually both from the nominative cese and the lase on which it is declined. Thus Kachchayano derives

ပိတ္ с) Г ရိတု pá TO WATCH OVER, and the affix ritu pitu A FATHER, from မာကု မာခု ရာတု mátu A MOTHER, mána TO LOVE, rátu . **.** . In this way most words are traced to a root and an affix, but many of the derivations are imaginary. The affixes used in the formation of words are very numerous, and will come under con-

sideration in a future chapter on derivation.

# CHAPTER V.

# DECLENSION OF ADJECTIVES.

Adjectives are declined like nouns of the same terminations. Thus sabpa, (§ 110.) is declined, in the masculine, like purisa (§99.); in the feminine like kanyá (§ 95); and in the neuter like rúpa (§ 90.). So gunavá (§ 111.), in the masculine is like bhagavá (§ 102.), in the feminine like madá (§ 98.), and in the neuter like mana (§ 103.).

§ 151. The affix vá, in gunavá, corresponds to Sanskrit an vat, and is used in the formation of many other adjectives, as;

voo) balavá possessed or strenth

ပည္ဝါ	panyavá	•••	WISDOM
	himavá		FROST AND SNOW

§ 152. Other adjectives, thus declined are formed with má in the same signification; corresponding to the Sanskrit particle

मत्	<sup>mat</sup> သတိမါ	as: satimá	POSSESSED	OF	CAUTIOUSNESSS
	ရှဗိမါ	ruchimá			LUSTRE
	မီနိုုလာ	bandhum	<b>á</b>		RELATIONS

§ 153. Maha GREAT, is declined on the same model. Thus the masculine singular is

Nom	maha <b>n</b>	maha	မတို	မဟာ
Acc.	mahentan		မဟင္တံ	
In. Ab.	mahatá		မဟတာ	
D. G.	mahato		မဟာတာ	
Loc.	mahati		မဘကိ	

§ 154. Participles are declined like adjectives of the same finals. In § 112. is a specimen of a present participle declined like gunavá. Many other participles and participial adjectives are declined on the model of sabpo, sabpá, sabpan; like the Greek pas, pasa, pan; or the Latin bonus, bona, bonum.

Digitized by Google

# Degrees of Comparison.

Kachchayano does not distinguish the degrees of comparison, and they are often used, as in Sanskrit, not for comparison but to denote "excess." Clough says,\* "It does not appear that they can he distinguished into the two classes of 'Comparative, and Superlative."

§ 155. These remarks are justified by Kachchayano who writes:

သခဗ္ဗ ဗ္ကာခမ္ ပါပါ။ အသမိန္အမသံ ဗိန္မာသန္ ဗမေါက်။ sabpe ime pápá ayamimient visena pápoti ပါပဘာရာ။ ဧဝံ ပါပဘာမော။ ပါဗိသိကောာ။ ပါဗိန္မယာာ။ pápaturo evan pápaturus pápisiko pápiyo ပါဗိန္မော။ pápitho

"Aff these are wicked. This one of these by being exceedingly wicked, is wicked -tara, So also is wicked -tama, wicked -isika, wicked-ign, wicked-itha."

සූහා සූහා සූහිත සූදු iya or iyya, isiku, or itha These particles given by Kaench yano above are the Sanskrit

**EVAL EV** iyas and ishtha, and since Yates says † "Each of which may be comparative or superlative", they may be admitted as possessing the same doable signification in Pali. Kachchayano furnishes several examples, as:

ဂုဏာတ ဂုဏာယော ဂုဏာႏွာ gunata virtuous guniyo gunition MORE, or MOST VIRTUOUS မေခ်ာ မေခြင်ယာ မေဒါင္ရွာ

medhá INTELLIGENT medhiyo medhitho MORE, or MOST INTELLIGENT

§ 156. Whatever grammurians may say, usage shows that tara designates the comparative degree, and tama the superlative, as in Sanskrit and Greek. For example: King Wathandria says of his Queen Madí,

မဒီဘာ သတဂုကောန သဘသဘဂုကောန ဘဘသဘ martito satagu<u>n</u>ena satasaha sahassa/unena

<sup>\*</sup>Clough's Grammar, page 93.

<sup>+</sup>Yates's Sanskrit Grammer, page 75.

ဿဂူးဏားနာ သဗ္ဗည္(တဥ ဏာ ေဝေ ငီယ တရန္တ

ssagumena sabranyutanyuma mera piya taranti "Than Madi, by a hundred times, by a thousand times. by

ten thousand times is infinite wisdom more beloved by me."

One of Kachchayano's examples reads:

သာမာ နာဗိုနံ ေလာနိယ တမော

sámá nárínan dassaniya tamo

"Of women the one with a golden appearance is the handsomest."

§ 157. The comparitive degree is often made by varan BET-TEF, and the superlative by uttaman BEST. The young wife of an old Brahmin is abused thus:

yatwan jimassa ghere vasati mahante jivitan varan "Thou who dwellest in the house of an old man, death to thee were better than life."

When Way handria gave away his children, it is said:

ခါန မထြေမီ အခေါ dána muttuman adá

"He gave the best gift."

§ 158. When adjectives take iya, ita, or isika, a final vowel or affix is dropped as in Sanskrit. Thus in the examples given above

ଦେଇ	ତତ୍ର	<u> </u>
medká becomes	modha as	medhiyo
ဂု <b>ဏ</b> တ	ဂုဏာ	ဂုဏ်ယော
annata	auna	qu <b>n</b> iyo

§ 159. In English a few adjectives, as good and bad; on being compared change the root, and become better best, and worse worst. So in Pali, as also in Sanskrit, when iya and itha are affixed to certain a ljectives, they to ke now bases, as;

အစ္တက	-	င္ခေခ	<del>ေန<sup>္ပ</sup>ေယ</del> ာ	င္ခန္ဒင္တေဒ
antika	NEAR	neda (new base)	nediyo	nedi <b>tho</b>
<b>9</b> 20 .		ന്ന	ကဏိယော	ကဏိဒ္ဓော
арры	SMALL	<b>h</b> a <u>n</u> a	ka <u>n</u> iyo	kanito
ର୍ଚ୍		သာဝ	သာဒိယော	သာဗငၚာ
bata	FIRM	<b>s</b> ádha	sádhiyo	súdhitho

# Numerals.

# Numeral Adjectives.

CARDINAL NUMBERS.

§ 160. The Pali numerals resemble the Sanskrit, and the nunerals of all the Indo-European nations; yet there are points of difference throughout. In the large numbers they differ materially. There is no distinct name for a million, as there is in Sanskrit. It is called *ten hundred thousand*. But there is a proper name for ten millions, and then the enumeration proceeds by periods of sevens, every seven places of figures having a distinct name up to a unit with one hundred and forty ciphers.

In English, ten and one are expressed by eleven, one left after ten; so by an analogous idiom, nineteen is expressed in Pali by ekunarisa, or twenty less one; and ninety nine by ekunasata, or one hundred less one.

С	നോ നോ	നേ		င္မလ

#### Ordinals.

There is much diversity in writing the numerals between twenty and ninety. All the forms given above with a final a are often written with a final n, and always so in the nominative.

Twenty is visa, visan, visatan, and visati. Thirty follows the same analogy, as, tisa, tinsa, tisan, tinsati, and tisati. Forty is written chattálísa, chattálísan, chuttálísa-san, chottálísa-san, and tálísa-lísan. And fourteen, besides the form given, is also written choddasa, and chatudasa. Sixty is sometimes written with chha, chhathi, and the v in nava, nine, is occasionally changed to o, as novisati, twenty nine, and nopanyása, fifty nine.

There is also a want of uniformity in writing some of the large numerals, as: kotippakoti, and kotipakoti; and akkhobhani, and akhobhani-bhani; apapan, ababan, and apaban; nirappudan, and nirabpúdan; atatan, and atatan; sokundhakan, and sogandhakan; uppalan, and upalan; kumúddan, and kumadan; and usang kheyyan-yan-yani.

§ 161. The first five numerals are declined in § II3-117. Above five the numerals are of all genders, whatever may be the gender of the form in which they are declined. From FIVE to EIGH-TEEN inclusive, they are declined like *panycha* FIVE, in the plural number, as given in § 115. All the numerals between eighteen and ninety nine are declined in the singular number only. *Ekanavisati* NINETEEN is an example, (§ 118.) Kachchayano says from twenty to ninety inclusive they are of the feminine gender. One hundred and upwards are neuter, excepting those that have a final *i*, which are feminine. They are usually declined in the singular, like *ekunasata* in § 116, but they take occasionally plural terminations.

# Ordinal Numbers.

§ 162. Above four the Ordinals are formed from the Cardinals by affixing the particle ma, corresponding to the Sanskrit

ပၚမ	paţhama	FIRST	ဒုတိယ	dutiya	SECOND
တိတိတ	tatiya	THIRD	စ်တူထွ	chatutta	FOURTH
ပည္ကမ	panychama	FIFTH	ဆင္မွမ္	chha <b>t</b> ha <b>ma</b>	SIXTH
သတ္တမ	sattama	SEVENTH	အငွှမ	atham <b>3</b>	EIGHTH
ຈວຍ໌	navama	NINTH	ဒသိမ	dasama	TENTH
(ကားသ	oo <sup>ekádasama</sup>	ELEVENTH	နွှဲါဒသမ	dwadasama	TWELVTH

# CHAPTER VI.

# DECLENSION OF PRONOUNS.

The Pali pronouns are nearly related to Sanskrit, and more remotely to the pronouns of all the Indo-European languages.

### Personal Pronouns.

§ 163. The two first personal pronouns are treated together by Kachchayano, and he refers them to allied bases, to ahma I, and tuhma THOU. So the Greek igo and su, the Latin ego and tu, the English I and Thou, though apparently widely apart, are made from the same base. The declensions are given in § 120, 121, and show a striking resemblance to the Greek, but they contain redundant forms in no and vo, corresponding to the Lutin nos and vos.

The Sanskrit has also *nah* and *vah*, but their usage differs from Pali. In Sanskrit they are used in three cases only, but in Pali they are used in five, being found in the nominative and the instrumentive in which they are never used in Sanskrit. It is note worthy too that Kachchayano gives examples to illustrate their usage in these two cases, while he gives none for the other cases; as if he were pointing out a usage that might be questioned.

Here the Pali, as in some other instances, is nearer the Latin than the Sanskrit is; but the ablative is wanting in Pali, though common in Latin. If formed regularly, it would be *nobhi* and *vobhi*, very like *nobis* and *vobis*.

§ 164. The Third Personal Pronoun is referred to the base ta. It is often used as a demonstrative, and occasionally as a definite article, but more like the Greek than the English, and the declension in § 122. exhibits a great resemblance, in form, to the Greek Article. A redundant form, out of the nominative case, is found in *nan*, which does not appear in Sanskrit; but the poetic *nin*, in Greek appears to be the same word.

§ 165. The word which Kachchayano refers to *bhav.nta*, used in respectful addresses, like "Your Lordship", may be regarded as an Honorific Second Personal Pronoun. It is declined like *bha*gard, § 102. but is irregular in some of its cases as:

MASCULINE,

	Singula	r.		Plural.	
	ဘဝံ		တောင္မွန္သာ	ေဘာေန	ဘဝငန္မာ
Nom.	bhavan		bhonto 05	bhonte	bhavanto
	ဘ၀္ကန္တံ				
Acc.	bhavantar	ı			-
	ဘဝတာ	•			
Ins.	bhavat <b>á</b>				
	တာေ	က			
D. G	bhoto		FEMI	ININE-Sing	gular
	ဘင္မွန္	ကောင်ကော	ဘောတိ		
Voc.	bhante	bhoto	<b>b</b> hoti		

It is most frequently met in the Pali books in the vocative, *bhante*, which though given by Kachchayano in the singular only, is used in both the singular and plural. It occurs six times in the short Asoka inscription found at Byrath, but was misunderstood by Prof. Wilson, who rendered it verbally.\* It is used by Asoka in addressing the Buddhist assembly precisely as it is used in the examination for the Buddhist Priesthood, where Spiegel renders it VENERABILES.

### Possessive Pronouns.

§ 166. The Possessive Pronouns have no independent bases of their own, but are made from the genitive cases of the personal pronouns, as:

ເພດຍໍ້າme vachanan "The word of me"; i. e. My word ພໍ່ພະ ana mama "The mind of me"; i. e. My mind. ເຫຼງເປັນ te nyáti "The relatives of thee"; i. e. Thy relatives. ທີ່ຍະເມີ່ອງເປັນ the nyáti "The relatives of thee"; i. e. Thy relatives. ທີ່ຍະເມີ່ອງເປັນ the nyáti "The relatives of thee"; i. e. Thy relatives. ທີ່ຍະເມີ່ອງເປັນ the nyáti "The relatives of the father of the father of thee"; i. e. Thy father. ພຣຍ ແລະ and the law of him"; i. e. His law. ເພຍາ ແລະ and the law of him"; i. e. His law. ເພຍາ ແລະ and ana the field of us"; i. e. Our flesh ເພຍາ ana and the property of you"; i. e. Your property.

\*Journal Royal Asiatic Society: Vol. XVI, page 361.

# Reflexive Pronouns.

§ 167. The reflexive pronoun SELF, is made from attá အက္ကာ

which is declined like puma §101. Thus:

အက္ကာေနာဗြယ္ကကိယာေနာ္သာဘဲမ်ိဳ attano brahmaniya nessámi "For myself [and] the Brahminee I will lead away."

Sometimes it is made by the indeclinable sayan သယံ खय' srayam in Sanskrit.

The reflexive possessive pronoun own, is made by saka

svaka in Sanskrit, as သကဘာဝေခု sakabhávena নিজ

"By his own existance."

It is often made also by attá as:

အထ္တနောပုတ္တကေဒါသေကတ္မာ attano puttake dáse katuá "Making the children of himself slaves"; i. e. His own children.

# **Demonstrative Pronouns**.

There are three demonstrative pronouns whose declen-§ 168. sions are given in § 123-125.

Eta is formed from the third personal pronoun by prefixing e. Max Müller says the corresponding Sanskrit pronoun signifies "This (very near)". In the books it is often used in a manner to justify such a definition in Pali, but again it is frequently used in precisely the same connection that the other demonstratives are, and in the Burmese translations it is constantly rendered by

tho THAT.

Kachchayano gives ima as the base of another demonstrative, which in Sanskrit is referred to *idam*. It is in very general use for this.

The third demonstrative has amu for its base, but in Sanskrit it is referred to adas. Clough defines it this, and Max Müller says of the Sanskrit word "That (mediate)." In the Burmese translations it is uniformly rendered by eemee, "Such a person as has been mentioned."

The third personal pronoun is also in frequent use as a demonstrative, that or this; more often that.

The forms of etad and idam on the base ena in Sanskrit, are not found in Pali.

# Relative Pronoun.

§ 169. The relative pronoun ya, who, or which, is declined like the third personal pronoun, by rejecting t and inverting y, (§126), much as the relative in Greek is made from the article by rejecting t.

The relative is often repeated in the signification of WHOEVER WHATEVER, as:

#### ယေသူယေသူဌာင္မွာသူ yesu yesu thánesu

"In what, what place,"; i. e. In whatever place.

# Interrogative Pronoun.

§ 170. The interrogative pronoun kin, WHO? WHICH? WHAT? is declined, excepting in the nominative singular neuter, like the relative, substituting k for y: (§127.)

The interrogative WHICH? or WHAT? is sometimes made by adding the comparative affix tara, or tama to the base ka, a s:

ကတရ	ဘ <b>တ</b> မ	ကတရကတမ
katara	katama	katara katama
<b>мн</b> існ?	which?	<b>w</b> нic <b>н</b> ?

In Sanskrit katara signifies "Which of two?" and Clough gives the same definition ; but this is not the exclusive usage in Pali, as : က္ခက**တရ**ဆ္မိံသူတ္ဟေ kwa katarasmin sutte "Where? In which, or what rule?" where the rules are numerous.

# Indefinite Pronouns.

§ 171. By adding the particle chi to the interrogative kin, the indefinite pronoun ANY ONE, or SOME ONE is formed, as:

ကောစိဟိန္စပူရိသော kochihinapúriso "Any, or some outcast." The relative ya is sometimes prefixed to the above in the same signification, as:

cupana banga yena kena chi tena nahatá

"Have they been taken away by any one, or some one?"

Occasionally it signifies EVERY, as:

ຕວມຕີຄູສວ idha yan kinychi atthi "There is any thing, i. e. every thing, in this place."

အညမည် အည ဗ္ဗတရ itura EITHER, OTHER, anya ANOTHER, anyamanyan, EACH OTHER. are a few other indefinite pronouns.

Digitized by Google

#### VERBS.

The Pali verb is nearly allied to the Sanskrit, but has fewer forms, and is characterized by greater simplicity.

### Voice.

§ 172. The Fali has distinct forms for two voices, like the Greek, and like the Greek too, it expresses three voices by these two sets of forms.

The Pali names of the voices express distinctly the signification of each. The first is;

ပရဿပခါန

# parassa padáni

From parassa, the genitive or dative case of para ANOTHER; and padáni, the plural of pada A WORD: i. e. "Words to, or for another."-Transitive Verbs, or the Active Voice. The other is;

အက္တင္မွာခု၁ပဒါနိ attano padáni

From attano the genitive, or dative case of attá SELF, and pada, as before; i. e. "Words for SELF-Intransitives, and the Middle, and Passive Voices. The Passive however is distinguished by taking y before the terminations in the conjugational tenses.

This is the theory of the Voices, but in practice the Middle form may often have a transitive signification, like deponents in Latin; so that active verls may be considered as conjugated in both forms; the passive however in the *Attanopadáni* only, and then distinguished, in part, by the characteristic y.

# Mood.

§ 173. Pali verbs have four moods, the indicative, the optative the conditional, the imperative, and the infinitive. The benedictive and subjunctive moods do not exist in Pali.

The conditional is used to express that section of the optative, in other languages, in which the act has not been performed through some difficult y being in the way. It supplies the place of the subjunctive, in the clause with if, with which it is introduced, as:

ເວລາ ເອ ແກ້ ພາະ ສາດກິນລາງ ແດຊີ so che ekan yánan alabhissá agachchhissá "If he hal hal a memo of conveyance, he would 'ave go ie."

### Tense.

§ 174. There are five tenses in Pali, the present, the perfect, the imperfect, the aorist, and the future. One less than the Sanskrit which has two futures. The three preterites correspond to the perfect, imperfect, and aorist of Greek verbs. Like Greek, the perfect reduplicates the first syllable, and the imperfect and aorist take a augment. These three tenses Kachchayano calls:

Kachchayano says that *Parokkha* denotes rast time undistinguished, indefinite. The same tense in Sanskrit with the corresponding name, *paroksha*, is denominated by Yates the perfect, and defines it "What was done at a very remote period." Benfey also calls it the perfect; Williams, the second preterite, and says it has reference to an event done and past at some definite period." Max Müller writes of it: "The reduplicated perfect denotes something absolutely past."

Higgattani is the Pali name of the imperfect tense. It is defined as a definite past, and "denotes time past before any portion of the current day," according to Clough and Yates; but "time recently past before yesterday," according to Alwis.

The aorist, ajjatani, is defined by Kachchayano as time past which is "near." Alwis says it is "the preterite of to-day," and quotes native authority to show that it commences at from three to five o'clock in the morning. These nice distinctions of the Grammarians do not appear in practice. What Williams writes of the Sanskrit is equally true of the Pali; "The three preterites are used without much distinction."

### Number.

§ 175. The Pali verbs have the same numbers as the nouns, singular and plural, lacking the Sanskrit and Greek dual.

#### Person.

§ 176. There are three persons, first, second, and third; but Kachchayano enumerates them in reverse order, and calls the third the first, the second person the middle, and the first person the principal, or highest.

In modern Greek grammars it is common to precede the paradigms with the terminations of the various moods and tenses, but this is precisely the mode of teaching grammar which existed anterior to all European grammars.

# Terminations of Verbs.

§ 177. Kachchayano gives the following terminations for the vcices, moods, tenses, numbers, and persons of all verbs.

Active Voice-Parassa padání.

# INDICATIVE MOOD.

# INFINITIVE MOOD.

တုံ	
tun	

:

#### REMARKS.

The principal letter in all the first persons plural is m, and so it is in Greek.

The principal letter in all the second persons plural is t, or **b** pronounced th in Burmah, precisely as it is in Greek.

The future tense is made from the present by introducing ss before each termination, and this is the way it is formed in Greek, excepting that one s is inserted instead of two.

The optative, or potential, mood is characterized by taking e, or eyy before the terminations throughout, and the Greek optative is formed in a similar manner by taking the connecting vowel i. And the terminations are all the same as the present tense of the indicative, excepting the third person plural, which has a final n, and a like exception is found in Greak.

Sin-	е	ssu or su	tan				
	အားမှသေ áhmase	ဌော	ಇತ್ತಿ				
Plu.	áhmase	hio	antan				

#### REMARKS.

The first person singular of the imperfect tense is i in all the copies of of Kachchayano to which I can refer, but it is *in* in both Clough and Alwis. So the third person singular is ta in the books in Burmah, but *ttha* in Clough and Alwis. Since in both instances it is more probable that a letter has been dropped by careless transcribers, than that one has been added, the Singalese books are probably correct, but the books in Burmah agree with Sanskrit.

In the second person plural of the optative, the *a* is long, as:  $eyy \dot{a}hvo$ , but it is short in Clough and Alwis. The same person in the imperative varies between *ss* and *s*.

Many of these middle and passive terminations closely resemble those of Greek verbs in mi. Take for instance the present tense :

	Pa.	Gr.	Pa.	Gr.	Pa.	Gr.
Sin.	e	MAI	<b>s</b> e	SAI	te	TAI
Plu.	hme	METHA	hve	STHE	ante	ANTAI

In general, though there are many points of difference, all the terminations are nearly allied to the Sanskrit, and many are identical.

# Passive Voice.

The passive voice is formed by adding the terminations of the Attanopadáni to the root. In the present and imperfect tenses, and the optative, and imperative moods, y is prefixed to the terminations, but the y is often assimilated to the last consonant of the base; as in this example, where it is permuted to ch.

#### MUTATIONS OF Y.

§ 179. The following examples illustrate the permutations of y, when used to characterize the passive voice:

ပ္ခုစ္ရွင္စေတ သက 00 သကၡတ õ saka to BE ABLE sakkate is Able. vacha to SPEAK, vuchchate IS SPOKEN. မစ္ကတေ W3 ଧତ mada or maja to SQUEEZE IN THE HAND, majjate IS SQUEEZED. ဗုန္မတေ ဗုဏ္ဆင်တ ଟ୍ବର୍ 90 **bu**ddhate bujjhate budha or bujha to know, IS KNOWN. ୦|୭ ၀ုဒ္မတေ ဟာခု ဟည္ကတေ vuda to increase, vuddate is increased. hana to kill, hanyate IS KILLED. လဘ လဗ္ဘတေ ရပ ဓမ္မတေ labha to OBTAIN, labbhate 18 OBTAINED. dhama to DISCIPLINE dhammate IS DISCIPLINED. ကယူတေ ဖလ ဖက္လလ္တ ကရ kara to DO, kayyate IS DONE. phala to FINISH, phallate IS FINISHED. 80 Smoo ဒိုင္ဂလေ 800 diva to PLAY, dibpate IS PLAYED. disa to SEE, dissate IS SEEN. In Sanskrit the y is not changed to the preceeding consonant but, in instances like these, is united to it, as: divyate for dibpate above. Nor is usage uniform in Pali, dhamyate og co occurs as well as *dhammate*, and in many instances the y stands as an independant syllable, as: ဂစ္ရွိယ**ော** ကရိယတေ kariyate IS DONE. gachchhiyate IS GONE. The a or  $\acute{a}$  of certain roots is changed to  $\acute{i}$  before the § 180. y of the passive, as: ဒ္မကလွ ခြံပာတိ **ອ**ີງ പി dhá to HOLD dhíyati IS HOLDEN. dá to give, díyati is given. දිගනි පිගාගි ģ ပါ thá to place, thíyati is placed. má to love, míyati is loved.

Deponents.

ഗി ഗ്നാന ဗီလာတိ റി há to ABANDON, híyati is ABANDONED. pá to DRINK, píyati is drunk မဟိပ္ဘာက မက်ိသတ္ပ ພວງ မထ maha to worship, mahiyati is worshiped. matha to nourish, mathayati is NOURISHED. § 181. Yaja to WORSHIP, is changed in the passive to ija, as: ယဇ ဗ္ကဇ္စၥတ yaja to WORSHIP, ijjate IS WORSHIPED. § 182. Sometimes the passive voice has an active signification, like deponents in Latin, as: രിധാന manyate KNOWS. မည္တင္ရတ jáyate PRODUCES. § 183. Occasionally the active terminations are attached to passive bases in the signification of the passive, as: ogo vuchchati is spoken. labbhati is obtained. ၀ုစ္ရတိ ကရိယတိ ogo kariyati is done. pachchate is cooked. သစ္စ္အနန္ ဗုန္မွာ ဒီယတိ sajjanena buddho miyati. "Buddha is beloved by good men." Alwis renders miyati by IS MEASURED, as if from the root

má, but it is constantly used in the Pali books, as above, like मिद mid, defined in Wilson's Sanskrit Dictionary, "To have affection cr regard for."

မယ္ဂါ ဂါဂု လူကလူ

mayá pápan híyate

Digitized by Google

"Sin is abandoned by me."

Hiyate, is translated by Alwis, "Is reduced", but the Pali usage is as if the word were identical with the Sanskrit root

On adding the characteristic y of the passive, v in § 184.

00 000 လာ

vacha to SPEAK, vasa to DWELL, vahu to FLOW, to ARRIVE, is sometimes changed to vu, as:

၀ုဿတိ ၀ုစ္ရတိ

vuchchate IS SAID,

vussati is dwelling, or residing. § 185. The letter h when a final radical, is sometimes written

after y in combination; and in *vaha* is changed to l, as:

olago ologo nuitati, or vultati, is flowing, is converted.

#### Regular Verbs.

### Conjugation.

§186. In Greek there are several conjugations of verbs, owing to various additions being made to the root in some of its moods and tenses. Thus the root *lab* inserts n before the last consonant of the verb, and becomes *lambano* to TAKE; and *zo* adds *nu*, forming *zonnumi* to GIRD.

In a precisely similar manner, sometimes by the same increments, several conjugations are formed in Pali. These changes of conjugation are confined, with one exception, to the present and imperfect tenses, and the optative, and imperative moods, called conjugational tenses. Kachchayano enumerates eight conjugations. In Sanskrit there are ten.

### REGULAR VERBS.

§ 187. The first conjugation is characterized by the root taking a final a. If the root ends in u, the u is changed to v; if in i, the i is changed to y, as:

ဘူ

ဘဂတိ ဖြ

ලිගාහි

bhú to BE, bhavati HE IS; ji to CONQUER jiyati, HE CONQUERS. Pacha conjugated above belongs to this conjugation, and all the verbs of the first, second, third, and sixth conjugations in Sanskrit, appear to be embraced in this first one in Pali.

In the Sanskrit, "If a root be of the Ist conjugation, the rule for the formation of the the base in the conjugational tenses is, that the Guna be substituted for the vowel of the root throughout every person of every tense. Thus from budh "to know," is formed the base bodh." No such rule is given by Kachchayano, but in point of fact some verbs follow the rule, and some do not. The u in the example above is not changed into o, but remains unchanged in Pali, See § 179, where this word occurs. Other examples are

ယုဇ္တတေ ယ္ခ ကုဇ က္ရရူးတ yuja to JOIN, yujjate IS JOINED. kuja to BE ANGRY, kujhate ရဒတိ IS ANGRY. မဒ muda to ENJOY, mudati HE ENJOYS. Following the rule are ഹിഗമ ရေါစ္ခတ္ QU ରୁତ gupa to GUARD. gopati HE GUARDS, rucha to SHINE, rochati IT SHINES တို့အ ေသာစၥဘ ഹേരഗ് သုစ sucha to REGRET, sochate HE REGRETS. tija to SHINE. tejate IT SHINES, 20

This substitution of o for u, and e for i has its parallel in Greek, where "The present and imperfect exhibit the root in its most protracted form," which is as true of Pali as of Greek.

This change of vowels is called in Pali *vuldhi*, but it is not necessary to use the term. It is the more inexpedient because it is the same word as the Sanskrit *vriddha*, which designates a different change of vowels, this being called in Sanskrit guna. Its use therefore would lead to confusion.

§ 188. Kachchayano's third conjugation, corresponding to the fourth in Sanskrit, ought to follow immediately on the first, for it is characterized by adding y to the root like the passive, so that the active is merely the passive base with the active terminations, while the pussive is subjected to no change. No new element is introduced, and it is merely a combination of the passive of the first conjugation, which with this may be regarded as the regular verb.

These two combined conjugations probable contain more than four fifths of all the Pali verbs, and the student who has mastered the casy paradigm given, can understand at sight four fifths of the verbal forms he will meet in his reading, and the remaining fifth, belonging to other conjugations, may be properly regarded as irregular verbs.

Still it is useful to to retain the arrangement of Kachchayano especially for readers in Burmah, who may wish to refer to the original work, and because the classification resembles that of the Sanskrit native grammarians, which has been followed, with more or less modifications, by all writers on Sanskrit grammar.

Kachchayano names each conjugation after the example he uses to illustrates it. Thus:

	သ၀၂ဒီ	သိ	ရှခ၁ <sup>ဒ္</sup>	କୁର୍ଚ	•
1.	BHAVÁDI, fro	om <i>bú</i> to be.	2. RUDHÁD	n, from rudha	to RESTRAIN.
		go	သိ၁ဒ		
3.	divádi,	diva to play	. 4 swádi,	su to 1	HEAR.
	ယွကားန	ന്	ဂဟါဒ်	က် နို	•
5.	KIYÁDI, .	ki to buy.	6. GAHÁDI,	gaha to	D TAKE.
	•	တခု		L *	
7.	TANÁDI	tana Exten	d 8. CHURAVÁ	DI chura t	O STEAL.

SECOND CONJUGATION.

§ 189. The second conjugation corresponds with the seventh in Sanskrit, and is characterized by the insertion of the anuswara, an, before the last consonant of the root, like *math* in Greek, that inserts n and becomes *manthanó* "to learn." The following is an example of this conjugation, in the active voice.

'Chhida to CUT, SUNDER; Latin; SCID, SCINDO, to CUT.

Active Voice.						
INDICATIVE MOOD. PRESENT TENSE.						
	First Person.	Second Person.	Third Person.			
	ခ႘ႝန္ခါမြ	වෙදුවෙ	<b>သိ</b> န္ဒတ်			
Sin.	chhindámi	<b>c</b> hhindasi	<b>c</b> hhindati			
	ဆိန္ဒါမ	ဆိ " ထ	వరి " ్రశ్ర			
Plu.	chhindáma	chhindatha	chhindante			
		IMPERFECT TENSE.				
	အားဝိန္ခ	အားမိုင္စေနခါ	အာဗိန္ဓါ			
Sin.	achhinda	achhindo	achhindá			
	ශාව " අා	အဆွခ်ထ	အခုန်နှ			
Plu.	achhindahmá	achhinduttha	achhindu			
	. OI	TATIVE MOOD.				
	ဆိင္နွန္မယ္ျ်ပ္မိ	ဆိုငန္ဒယ္စျံသိ	ဆိုင္စေယျ			
Sin.	chhindeyy <b>á</b> mi	chhindeyyási	chhindeyya			
	ဆိင္စ္ခ္ဆယ္ျ်မ	ဆိ "' ယျ်ဟ	ဆင်နွှေသျို			
Plu.	chhindeyyáma	<b>c</b> hhindeyyátha	chhindeyyun			
•	IMI	PERATIVE MOO	D.			
	ဆိန္ခါဒိ	သိန္ဒဟိ	သိန္ခတု			
Sin.	chhindámi	chhindahi	chhindatu			
	ති "	သိ" ထ	ဆိန္စု			
Plu.	<b>c</b> hhin <b>dáma</b>	chhindatha	<b>c</b> hhind <b>u</b>			
§ 190. The final radical may take either $a$ , $i$ , $i$ , $e$ , or $o$ , as:						
ရှ <sub>ခဲ</sub> တိ ရှ <sub>ခဲ</sub> ်တိ ရှ <sub>ခိ</sub> ်တိ ရှင်နွှတ် ရှင်နွှာတိ						
rundhati, rundhiti, rundhiti, rundheti, or rundhoti, OBSTRUCTS.						

93

§ 191. The n before the last consonant is subjected to the regular permutations given in § 83. Thus:
నార్పం నార్పంతో షానా షాడ్రంతో
bhaja to ENJOY, bhanyjati ENJOYS. sabha to GORE, sumbhoti GORES.
§ 192. The passive is made by adding y to the root, and the terminations of the Attano padáni, as:
గ్రీప్రీంతో rundhayate, HE OBSTRUCTS, or RESTRAINS.

§ 193. As has been noted in § 188. the third conjugation is characterized by inserting y between the root and the terminations, as:

Diva to SPORT, to GO; Greek THE? to RUN.

## Active Voice.

INDICATIVE MOOD.

PRESENT TENSE.

	First Person.	Second Person.	Third Person.
	දුවිදු	දුරිංල	ဒိပ္ပတ
Sin.	dippámi	dippasi	dippati
	ဗိပ္ပါမ	ဒ္ဒဂိထ	ဒိုင်္ပီနီ
Plu.	dippáma	dippatha	dippanti
		IMPERFECT TENSE.	
	အဒ္ပဂ်	<b>အ</b> ဒ်ငပ္ပါ	<b>အ</b> ဒ္ပလ်
Sin.	adippa	adippo	adippá
	အဒိပ္ပမာ	æ <sup>g</sup> 600	æ <sup>ဒ္</sup> ဂါ
Plu.	adippahmá	adippattha	adippu
		OPTATIVE MOOD.	
	ဒ္ဒင်ကြုံဗွ	<sub></sub> ရှင်ကြောျဘူ	ဒ္ဒင္မေဂ်ာ္ဂါ

	<sup>g</sup> င္ပေယ္ဒါမ	ဒ္ဒင္မင်ကားတ	<sup>ဒ္</sup> ဒင္မေယျှံ
Plu.	dippeyyáma	dippeyyátha	dippeyyun
		IMPERATIVE MOOD	).
	පිටිාපු	දුරිගු	<sup>ဒ္ပ</sup> ပ်ထ်
Sin.	dippámi	dippahi	dippatu
	<u> ဒီဝ</u> ွါ <b>မ</b>	<del>ဒ</del> ်ဂီသ	<sup>8</sup> ડે ર્જી
P <sup>lu.</sup>	dippáma	dippatha	dippantu

FOURTH CONJUGATION.

§ 194. The fourth conjugation is characterized by adding  $\underline{n}u$ ,  $u\underline{n}v$ , or  $\underline{n}a$  to the root; like ag, in Greek, which adds nu, and becomes agnumi to BREAK.

In the singular of the present and imperfect tenses active, and in the imperative mood the first person of both numbers, and both voices, and the third person singular active, the conjugational uis changed to o.

The following is an example of this conjugation:

Pápu[i. e. pa-ápu] to OBTAIN; Latin, APO to OBTAIN.

## Active Voice.

INDICATIVE MOOD.

PRESENT TENSE.

	First Person.	Second Person.	Third Person.
	ပါပူးဏားမိ	ပါပုဏာာသိ	ပါ <b>զ                                    </b>
Sin.	pápu <u>n</u> omi	pápu <u>n</u> osi	pápu <u>n</u> oti
	ပါပုဏျမ	ပါပု <b>ဏ</b> ုထ	ပါ <b>္ နွ</b> န္တိ
Plu.	pápu <u>n</u> uma	pápu <u>n</u> utha	. pápunwanti
	• •		

Or,

s.	ပါဝုဏာပြ	<i>ပ</i> ါပူ <b>ဏာ</b> သိ	ပါ <b>ုဏာ</b> တိ
Sin.	pápu <u>n</u> ámi	pápu <u>n</u> ási	papu <u>n</u> áti
	ပါ <b>ုဏာပ</b>	ပါ <b>ဏာာ်</b> သ	ပါ <b>္ရဏ</b> ာန္တိ
Plu.	pápu <u>n</u> áma	pápu <u>n</u> átha	pápu <u>n</u> ánti

#### FIFTH CONJUGATION.

§195. The fifth conjugation, corresponding to the Sanskrit ninth, adds ná to the root, like the Greek dam, which adds ná in the middle voice, and becomes damnamai to SUBDUE.

The limits of the preceding conjugation might have been easily extended to include this one. The following is one of Kachehayan 's examples:

21

## Active Voice. INDICATIVE MOOD.

PRESENT TENSE.

	First Person.	Second Person.	Third Person.
	ု လုနားမ	လုနာသိ	လုနာတိ
Sin.	lunámi	lunási	lun <b>á</b> ti
	လုနားမ	လုႏာထ	လု <b>ခ္</b> ာန္တ
Plu.	lunáma	lunátha	lunánti

#### SIXTH CONJUGATION.

§ 196. The sixth conjugation is confined, so far as known, to a single verb, and is in nowise entitled to the distinction of a conjugation. This verb is referred in Sanskrit to the ninth conjugation corresponding to the fifth in Pali, to which it might be appropriately referred.

Kachchayano says the conjugation is characterized by adding ppa, or hna to the root, as:

Gaha, Sans. Graha, to TAKE, Germ. GREIFEN, to GRIPE, GRASP.

## Active Voice. INDICATIVE MOOD.

PRESENT TENSE.

	First Person.	Second Person.	Third Person.
	<b>ဃေပ်ါ</b> ဒီ	ငဆင်ဘွ	ဎောပ္ပတိ
Sin.	gheppámi	gheppasi	gheppati
	ဃေပ္ပါမ	ဗောဂ်ထ	ဧစာဂ်ီဦ
Plu.	g heppáma	gheppatha	gheppanti
		Or,	
	იფემ	റന്വാാ	රගාගර
Sin.	gah <u>n</u> ámi	gah <u>n</u> ási	gah <u>n</u> áti
	റന്ദാം	ဂဏ္ဓာတ	ဂဏ္ခာန္တိ
Plu.	gah <u>n</u> áma	gah <u>n</u> átha	gạh <u>n</u> ánti

### SEVENTH CONJUGATION.

§ 197. The seventh conjugation is the eighth in Sanskrit, and is characterized by taking o, or *yira* after the root.

The principal verb in this conjugation is *kara* to DO, and it occurs in books more often perhaps than any other verb, except the verb to BE. It is conjugated with various irregularities. All the forms found in Kachchayano are given below:

Kara	, Sans. Kri, to		REO TO CREATE, MAKE.
		Active Voice.

Eighth Conjugation.

· EIGHTH CONJUGATION.

102

§ 198. The eight conjugation, like the tenth in Sanskrit, ought to have been treated as the conjugation of causative verbs; but the form though causative has not always a causative signification. The characteristic letters are e,  $\underline{p}e$ , aya, and  $\underline{p}aya$ .

If the first vowel of the root be a, it is lengthened into  $\dot{a}$ , if u, or i, it is changed to o, or e. as in § 187. and a final u, or e is changed to v, or y. The following are examples of this conjugation:

	Chura to STEAL; Latin FUROR to STEAL. Active Voice. INDICATIVE MOOD.

## Roots differently conjugated.

103

## Verbs of several Conjugations.

§ 199. The same root is often conjugated in two or more conjugations, sometimes with a different signification; as:

ന്റെ bhindati Second conjugation, from root bhida. BREAKS നില്ലായ bhijjati THIRD ... DISTRIBUTES.

Hence arises this fourfold division of the roots:

1.	Roots	conjugated	in	one	conjugation
II.	•••			two	
III.	•••	•••		three	
IV.	•••			four	•••

These divisions are subdivided, and each subdivision is named by compounding the names of the several conjugations according to which the roots it includes are conjugated, as:

သူဝါဒိရဝ၁ ဒီ búvádi rudhádi FIRST and SECOND conjugation, as: လိပတိ လိမ္မတိ lipati limpati ANOINTS, SMEARS. ဘူဝါဒိဒဝါဒိ búvádi divádi FIRST and THIRD conjugation, as: ငွာတိ ငွာယတိ tháti tháyati STANDS, IS ESTABLISHED. ဘူဝါဒိသ္လ၁ ဒီ buvádi suvádi FIRST and FOURTH conjugation, as: ဂါယတိ ဂီဏာ၁တိ gáyati gináti SINGS. ဘူဝါဒိက်ယ၁ ဒီ búvádi kiyádi FIRST and FIFTH conjugation, as: လေယတိ ဇိနာ၁တိ jeyati jináti CONQUORS. ဘူဝါဒိတနာ၁ ဒီ búvádi tanádi FIRST and SEVENTH conjugation, as လေဂရတိ ဇာဂရောတိ jágarati jágaroti AWAKENS. ဘူဝါဒိရရာ ဒီ búvádi churadi FIRST and EIGHTH conjugation, as: ယာနတိ ယာင္စနတိ mánati máneti INVESTIGATES. ရဝ၁ဒိဒိဝါဒိ rudhádi divádi SECOND and THIRD conjugation, as မည္တတိ မည္တတိ munychati muchchti IS FREE.

## Causal Verbs.

§ 200. Any verb may be changed to a causal verb by adding to the base e, aya, dpe, or dpaya.

In Sanskrit p to denote the causative is introduced as an exception, but it is regular in Pali, and is found frequently in the Asoka Inscriptions. *Pe* however is shortened to pi, as:

ะทู่องคุ บารหุกา การการจะ การดา

Iyan dhama lipi devánan piyena Piyadasiná ránya lekhápitá.

"This law-writing is caused to be written by King Piyadasi beloved of the Devas."

In book Pali this same root, likha to WRITE, appears with the double consonant likkha, and pe for the causative instead of pi, as:

ອານຸຄາຈິ ພິຕຊີດຽາ ພວເກບເວຍ ພິດງາວເບດຽາ akkharáni likkhitwá sava<u>m</u>uputte likkhápetwá "Having written letters." "Having caused to write on a gold plate."

The rules for the change of vowels are the same as given in the eighth conjugation § 198. but usage varies in the lengthening of the first vowel of the root, and it is never lengthened before a double consonant. The following are examples: gámaya and gamaya CAUSE TO GO, chintaya CAUSE TO THINK, and káre, káraya, kárápe, kárápaya CAUSE TO DO.

But the commentators say this is an interpolation, and is not found in the old copies of his Grammar.

#### Pivása Conjugated.

#### Desiderative Verbs.

§ 201. In Pali, as in Sanskrit, to avoid the circumlocution of using the verb WISH, and the infinitive mood of another verb, certain changes are made in the verb to express the idea by one word. The first syllable of the verb is reduplicated according to rules to be noted hereafter, and kha, or chha, or sa is added to the root. Thus, for

ဗဘက္ခတိ ဘောတုံ ဗ္ကစ္သတိ bhotun ichchhati, is written bubhukkhati, from bhuja to EAT, and kh "He wishes to eat."

ဃသိတုံ ဗ္ကစ္ဘတိ

ပါတုံ ဗ္ကစ္ဘတ်

ဘုဇ

ghasitun ichchhati, is written jighajjati, from ghasa to EAT, and chh "He wishes to eat."

> သ

pátun ichchhati, is written pivásati, from pá to DRINK, and sa"He wishes to drink."

sotun ichchhati, is written sussusati, from su to HEAR, and 80 "He wishes to hear."

ဟ	ရိတုံ့ဗူစ္ဆတိ	

ෂිරි්රුගි ගඉ သ

haritun ichchhati, is written jiginsati, from hara, to CARRY, and su "He wishes to carry."

Alwis says: "This word is written in all the Pali works Jiginsati-should it not be Jihinsati?" The reply is in the negative, because one of Kachchhayano's aphorisms says: "When the root hara takes the affix sa, the whole root is changed to gin."

The following example of Pivása, WISH TO DRINK, may serve to illustrate the conjugation of these verbs:

INDICATIVE MOOD.

		PRESENT TENSE.	•
	First Person.	Second Person.	Third Person.
	රිට්ථායි	8၀ါသသိ	8၀ါသတိ
Sin.	pivásámi	pivásasi	pivásati

Plu.	pivásáma	pivásatha	pivásanti

ວ

#### A Hebrew Illiom.

#### Intensive, or Frequentive Verbs.

§ 202. To express emphasis, intensity, or frequent action, the bases of verbal roots are reduplicated. It is something parrallel to the Hebrew infinitive in such expressions as, moth yaumuth DYING THOU SHALT DIE.

It is remarkable that Kachchayano says nothing on this form of the verb. Alwis however refers to two of his examples as illustrations of it; but they do not appear to be cases in point. They lack both the peculiar form and the peculiar signification.

ဒဒ္ဓင္ဓဘ ទទ្ត duddalati, from the root dala which Alwis defines: "Illumines intensely." But it is defined by commentators metely to "shine, or illuminate,"

စက်မတ် ဂပ changkamati, from the root gama, Alwis defines: "Walks repeatedly." But this is not the definition of the They say it means to "Walk with the feet." i. e. go Scoliasts. on foot. Moreover the Sanskrit uses the intensive form of this root, but both the reduplication, and the definition differ, as:

#### जंगस्यते जंगमीति गम

୦୨

jangamíti to WALK CROOKEDLY.\* gam, to 60, jangamyate; The word however has passel into Burmese with something

of the frequentive signification. Thus in Judson's Dictionary zengyan is define 1: "A walk, a place for walking to and fro."

The Pali books furnish a form with the signification of the frequentive verb, in which the reduplication consists of the whole base of the verb, and is interchanged with the participle, as:

စၥရစၥရယ္မ chare chareyya from chara.

"He might practice earnestly, or frequently."

ၣၟႄရိဿၣၟႄရိဿ၀ပိ ୦ର uddharissa uddharissámi, from dhara "Bringing out I will bring out, or I will bring out repeatedly."

္ရင္စ္ဆင္ခန္မွာလို ္ ္ရန္မ်က္လာဝန္ခါမိ

vonde candámi. vanditvá vandámi

"Worshipping I worship intently."

Sometimes the reduplication is made with the root repeated and e. The religious books contain such expressions as these:

ခုဒမခုမ်ာမ ခုပ name namámi, from nama. "Bowing I bow repeatedly."

\*Max Müller page 225.

Williams page 132.

Digitized by Google

In the last example the continuative participle and verb are used in precisely the same signification as the reduplicated verb, which might be regarded as an abbreviated form of the participle rather than as an intensive verb, but it lacks the i of the participle.

If the insertion of a nasal be the characteristic of intensive or frequentive verbs, then Kachchayano gives several examples. But none of them are recognized by his commentators as possessing the signification of the frequentive verb, and there is nothing in the text to indicate any change in the meaning of the verb; yet it seems certain that had Kachchayano intended to convey a special signification, he would have indicated it, as he does the desiderative verb<sub>3</sub>. Kachchayano's text in which the examples occur is the following:

က၀ဂ္ဂဿ စ	၀ ဂ္ဂါ အး	ဘါ <b>သေ ဝ</b> ဠ္ဌ	မာ္စာသာ ကဝဂ္ဂဿ	>
kavaggassa ch	avaggo abh	úse vutta	mána-sa kavaggassa	
စဝင္ဂေါ ဟောတိ	විගිනුගි	<u>ଡ</u> ିମ୍ବରୁର୍	ဒ္ဒ ဇူရာပစိတ္ထည	
chavaggo hoti	chikichehha	ti jiyujachchh	ati jighayachchhati	
ෂිරිනති දේ	ဂ်မတ် စဂ	ාර්යෙහි		
jigisati jang	yyamati cha	ngkamati		
<b>န</b> ္ဂဟိ <mark>တ</mark> ည္ဟ	<b>အ</b> မ္ဘား	സ <b>ഡ ന</b> ു	နိဂ္ဂဟိ <b>တာဂမော</b>	
niggahitanycha	abbhásas	<b>sa</b> ante	niygahitágamo	
ဟောတိဝါ	စက်မတိ	စဥ္ကလတိ	စင်္ဂခတ်	
hotivá	changkamat <b>i</b>	chanychalati	changgamati ,	

"For a k classified letter, a ch classified letter."

"In the reduplication of the present tense, for a k classified letter is a ch classified letter—janggamati, chankamati" "And anuswara."

"At the end of the reduplication anuswara comes cometimes, changkamati, changchalati, changgamati."

Chanychalati is rendered SHAKES; and changkamati, changgamati, and, janggamati are all translated HE GOES, chankamati once HE WALKS WITH HIS FEET. All are probably from the same root gama, but they are sometimes referred to gamu and kamu. Possibly **TH** kram to STRIDE may be the root of changkamati.

24

#### Denominative Verbs.

To express a sentence in a single word, several par-§ 203. ticles are affixed to nouns which change them to verbs in the signification of acting, or becoming like them, or treating another like them, or desiring them for one's self, or using them as instruments.

(a.) The affix *áya* is used to signify one making himself like the ncun. Thus, for

ပပ္ပတ္မမိစ အက္တာနံ အာစရတိ ပ်ငံလာကလ attánan ácharati, is written pappatáyati. pappatamiva "He makes himself like a mountain."

သံတော သမန္မမိဝ အတ္တာနံ အာစရတ် သမုန္ပါယတိ sangho samuddhamiva attánan ácharati, is written samuddháyati. "The church-assembly makes itself like the ocean."

This form of the verb muy be compared with such English words, as romanize, TO MAKE LIKE ROMAN; and latinize, TO MAKE LIKE LATIN.

(b.)The affix iya is used to denote that a person, or thing, is treated as the person, or thing, expressed by the noun, as:

အဆတ္တံ ဆက္ကမိစ ဆတ္တီယတိ - නාවෙග් achhattan chhattamiva ácharati, is expressed by chhattiyati "That which is not an umbrella he treats as an umbrella."

အပုတ္က ပုတ္လမ်ိဳး အာစာကိ ပုတ္ဆံလည puttamiva ácharati, is expressed by puttínati aputtan "He who is not a son, he treats as a son."

This last affix, iya, is used also in the signification of (c.) desiring for one's self, that which is denoted by the noun, as:

ပတ္တံ ဗ္ဗဥ္မတိ အက္တာ့နာ ပတ္တံယတိ pattun ichchhati, is written pattinati attuno "IIe desires a vessel for himself." အည္ဟားနာ စာင်္ မိခ်တ္မ ဢႄၟႄၮ႙

attano

ghatan ichchhati, is written ahatí yati "He desires a water jar for himself."

အထူးနာ ဝတ္ထံ ဗ္ဘစ္ဘတိ ၀တ္ထီယတိ vatthan ichchhati, is written vatthiyati. atttano "He desires clothes for himself." ခ်္ခကလျှ အထွင္စာ မနံ အညွှတ် dhanan ichchhati, is written dhaniyati. attano "He desires property for himself." (d.) To express the instrument by which an act is performed, the noun is converted into a verb by affixing ya, as: තින් පිහාාග දාවටාගනි 208an $\omega$ ab gítan vináya upagáyati, is written upavinayati. "He is eminently skilled in singing by means of the lute." ဟထ္ထိနာ အတိက္တမတိ အတွကထိုကထွ မဂ္ဂ atikkamati, is written atihattiyati hattiná maggán "He goes over the road by means of an elephant." Analogous with this is the English colloquial verb to FOOT IT. Occasionally the verb is formed on the basis of an adjective, 85: ရတ္ထိ ၀ိသူန္ပါ ဟောတိ 8သူရှိထတ် ratti visuddhá hotti, is written, visuddháyati. "The evening is pleasant." Or, "It is pleasant [by means of the evening.]" Sometimes ára, and ála are affixed in the signification (e.) of MAKING, like ify in English, as: သန္တံ ကရောတိ သန္တရာတိ santan karoti, is expressed by santaráti. "He makes peace, or pacifies." ဥပက္ကမံ ကခုရာတိ ဥပက္ကမာလတိ upakkaman karoti, is expressed by upakkamálati "He makes strenuous effort." Alwis renders this phrase: "He devises a plan", उपक्रम upakrama, "A stratagem", might sustain this definition. ဥပတ္တမ upakkama however, is defined by the Pali lexicographers, "diligence, industry." This is another of not a few examples, in which the Pali of Ceylon seems to differ from the Pali of Burmah.

## Reduplicated Verbs.

§ 204. There are a few verbs which reduplicate their first syllable in some of their forms, like Greek verbs in mi. In Sanskrit they are raised to the dignity of a conjugation, the third, but Kachchayano includes them in his first conjugation. The following is an example:

	Dá	to GIVE; Greek DO	to give.		
	Active Voice				
		INDICATIVE MO	DD.		
•		PRESENT TENSE.			
	First Person.	Second Person.	Third Person.		
	<b>ອອ</b> ີໄຊີ	ဒေါသိ	දොහ		
Sin.	dadámi	dadási	dadáti		
	ဒဒါမ	કરોજ	ဒဒါဇ္တ		
Plu.	dadáma	$dad \acute{a} tha$	dadánti		

This reduplication is not confined to these verbs. The perfect tense of all verbs is reduplicated, and desiderative and frequentive verbs are reduplicated, and since Kachchayano treats the reduplication of all under one head, the laws that govern the reduplication have been reserved for this place.

(a.) If a root begin with a second or fourth classified letter, it is changed to the corresponding first or third; that is an aspirate is reduplicated by an unaspirate, as:

စိုင္စဥ္တဒ	chichchheda, the perfect tense of chhida-HE CUT.				
ဗဘူဝ	babhúva,	•••		bhú—не весаме.	
වෙගු	dadháti, the p	present	tense	of dháHE CARRIES.	
ဗုဘုက္ခတိ	bubhukkhali,		•••	bhuja-wishes to eat.	

(b.) A letter of the k class is changed in reduplication to a letter of the ch class; that is is a gutteral is changed to a palatal, as:

MEDICINE.

ဗိုလ်စံသ chikichchhati, present tense of kita-HE PRACTISES MEDICINE. (c.) Occasionally the reduplication is made by t instead of k, as: တိကိုရွတ် tikichchhati, as above-HE PRACTISES MEDICINE. jiguchchhate, present tense of gupa-HE GUARDS. (d.) The aspirate h is changed in reduplication to j, as: രഗാന jaháti, present tense of há-HE ABANDONS. ဇဟ္မတိ ဇူးကျလှ juhwati, or juhoti, present tense of hú, hu, in Sanskrit-HE OFFERS, or SACRIFICES. ශගාාබ jahára, perfect tense, third person singular of hara, 🦐 hri, in Sanskrit-HE CARRIED, OF TOOK. Alwis says "Abandoned. The radical vowel if long is shortened in reduplication, (e.) 88: ဒဒါတိ dadáti, present tense of dá-HE GIVES. ຂວງတိ dadháti, dhá--- HE CARRIES.  $(f_{\cdot})$ Sometimes the reduplication takes i, as: ලිනාවතු jighachchhuti, from ghasa-HE WISHES TO EAT. ဗီဝသတိ pivasati from pá-he wishes to drink. (q.) Sometimes a vowel is dropped in reduplication, as: မသူ၀ babhúva, from bhú-HE BECAME. Sometimes the vowel is retained, as: ဗဘက္ကတိ bubhukkhati, from bhuja-HE WISHES TO EAT. (h.) The root thá sometimes becomes tita in reduplication. as. ogo titatu-LET HIM STAND. တိၚတိ titati-HE STANDS တိဒ္ဓယျှံ Bogon titeyya-HE MAY STAND titayyun-THEY MAY STAND. 25

(i.) Sometimes the reduplication takes anuswara, as: စက်မတိ changkamati, from kamu-HE GOES. စဥ္ကလတ် chanychalati, from chala—HE SHAKES.

Sometimes for the root pá, piva is substituted in re-(k.) duplication, as:

රිංගි pivati. HE DRINKS. 8000 pivatu, LET HIM DBINK. piveyya, HE MAY DRINK. 8000 ဗိေလျ piveyyun. THEY MAY DRINK.

Sometimes the bare root is used in the same signification, 88: റിറ്റ

páte, HE DRINKS.

(1.) When the roots  $p\dot{a}$  and  $m\dot{a}$  take the affix sa, they some times become vá, and man, after the reduplication, as: ပိဝါသတိ pivásati, from pá—he wishes to drink. ဗြိမိသတ္ပ vimansati. from má-HE INVESTIGATES, OF BEASONS.

The final radical becomes k, when kh is added to a (m.) reduplicated root, as:

တိကိက္ခတ် titikkati, from tija-HE FORBEARS, HAS PATIENCE.

(n.) The final consonant is changed to ch, when chh is added to the final radical, as:

ന്റ്റ്റ്റ്റ്റ്റ്റ്റ്റ് tikichchhati, from kita—HE PRACTISES MEDICINE. ලිනාන්තු jighachehhati, from *Jhasa*—HE WISHES TO EAT. ဖြင့်စွဲလူ

jiguchchhati, from gupa-HE GUARD3, PROTECTS.

Alwis renders "He reproaches," which accords with the Sanskrit. And the definition given above is identical with the Sanskrit when the root is conjugated without reduplication-gopayati गापयति This proves that the signification of Pali forms cannot be safely inferred from the Sanskrit.

114

#### Anomalous Verbs.

First among anomalous verbs in all the Indu-European languages, is the verb to BE. In Greek and Latin its base appears to be es, and in Pali many forms are made from asa. The Anglo Saxon, and allied tongues, made their verb to BE from the root be, and in Pali a complete verb from  $b\acute{u}$ , in the signification of to BE, or BECOME, is found in both the active and middle voices.

Webster says of the verb to BE: "It is defective, and its defects are supplied by verbs from other roots, am, is, was, were." The defects are in the usage, not in the verb. It is complete in Pali, and in some of the rural districts of England, the Pali forms of this verb are still spoken, which in books have been supplanted by "am, is, was, were." The roots asa, and bhú exist in Sanskrit, but the Pali has a third root hú for the verb to BE, with copious forms, that has no place in Sanskrit, but which has been suggested, with great probabilty, to be of common origin with the Hebrew verb to BE, huh.

§ 205 All the forms of the verb to BE are not found in Kachchayano, but in order to furnish a complete paradigm, his deficiences have been supplied from other books in Burmah, and from the researches of Alwis in Ceylon.

> Asa to be: Latin, ESSE, to BE. INDICATIVE MOOD.

#### PRESENT TENSE.

	$\mathbf{First}$	Perso	on.	Second Pers	on. Th	ird Per	rson.
	ෂාරු		အမြိ	ෂාා	කගි	အတို	သတိ
Sin.	asmi	or	ahmi	asi	atthi or	atțhi	or sati
	အသွ		အမှ	<del>30</del> 00	ప క్రి		యంక్రి
Plu.	asma	or	ahma	r attha	santi	or	sante

Kachchayano gives *atthi* only for the third person, but the books supply in addition, *atthi*, and *sati*. The last is near the  $H_{n}$  asti of the Girnar inscriptions, and the two are brought the nearer by a rule of Kachchayano's which says:

## သဗ္ဇာဿသာဗီလေါပေါ့စ sabpássasádi lopo cha.

"And a at the beginning of asa is erased in all."

Originally there would seem to have been tenses conjugated in the middle voice, but the only trace remaining in use is the third person plural, *sante*.

		AORIST.		
	First Person.	Seeond Person.	Third 1	Person.
	කාරු.	කාරු	ශාරා	
Sin.	asin	asi	asi	
	အဘွင်္	အဘွထိ	အသို့ဘ	အသုံ
Plu.	asihma	asittha	asinsu, or	asun

#### REMARKS.

Alwis conjugates this tense with the initial  $\acute{a}$  long throughout, like the Sanskrit, but the books in Burmah, so far as noted, make it short.

OPTATIVE MOOD.					
	အသာ	အဿ	30000	သွကာ	
Sin.	assan	assa	assa, or	siyá	
	အသာာမ	အသာထ	အသာ	သိယုိ	
Plu.	assáma	assatha	assu	siyun	
	I	MPERATIVE !	MOOD.		
	ෂංදි	အပ႙	အထ္ထု		
Sin.	asmi	ahi	atthu		
	ఖన్న	အထ္ထ	သန္တု		
<b>P</b> lu.	asma	attha	<b>s</b> antu		
	<b>~</b> ,	PARTICIPL	ES.		
		PRESENT PARTIC	IPLES.		
	သင္မွာ	သန္တ	బశ్ర		
	santo	santí	santan		
	သမာ <b>ရာ</b>	သမာနာ	ထဲမာနံ		
	samáno	samáná	samánan		

#### REMARKS.

The Pali, like the Latin, makes the future from another root, but the Greek makes the future and other forms from this root which are not met either in Pali or Sanskrit. It is worthy of remark too, that the Sanskrit has two preterites, while there is one only in Pali.

FUTURE PARTICIPLE.

#### Hu Conjugated.

Hu to BE; Hebrew, HUH, to BE.

Alwis writes this root with  $\dot{u}$  long,  $h\dot{u}$ , but Kachchayano uniformly with the short vowel, hu.

## Active Voice. INDICATIVE MOOD.

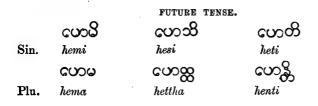

PRESENT TENSE.

	First Person.	Second Person.	Third Person.		
	<u> </u>	ෆොාාර	ဟောတိ		
Sin,	• homi	hosi	hoti		
	ပောာမ	ဟာထ	လောန္စ		
Plu.	homa	hotha	honti		
IMPERFECT TENSE.					
	ား <mark>အက္</mark> လား	ာ အဟုဝေါ	အဟုဝါ		
Sin.	ahuva, or ahuvan	ahuvo	ahuvá		
	အဟုဝၝ	အဟုဝတ္တ	<b>œυ</b> ρομ ahuvú		
Plu.	ahuvahma	ahuvattha	ahuvú		
		AORIST.			

အဟုံ အဟောသိ' အဟောသိ အဟု အဟေါသိ ahun or ahosin ahosi ahu or ahosi အတုမ အဟေါသိမ္ အဟေါသိတ္ထ အဟဝ Sin. ahavun Plu. ahuhma or ahosihma ahosittha

This tense is also formed on the base he. Ahesun အပောသို

the third person plural is of common occurrence in the books. Sometimes a nasal is inserted between the base and the termination, as: ahengsun-THEY WERE; and the same form is met occasionally in other verbs.

#### Hu Conjugated.

		FUTURE TEN Or	•	Continued.)
	First Person.	Second P	· ·	hird Person.
	ගොහුදු ගෙ	လာဒြ	ෆොහ	නි ගොගිනි
Sin.	hehimi, or hehi	ími	hehisi	hehiti
	ෆොහුල ෆ	ാഗിം	ဟောတိ	ထ္က ဟောဟိန္က
Plu.	hehima, or heh	áma	<b>h</b> ehittha	hehinti
		Or		

		Ur,		
	ගොගිරි	ဟောဟါဒိ	ဟောဟိသိ	ගොරාගිනි
Sin.	hohimi, or		hohisi	hohiti
	ဟောကိုရ	လာၥဟါမ	လောဟ်ကျွ	လာ၁စာနွ
Plu.	hohima, or	<b>h</b> oháma	hohittha	hohinti

These three forms of the future are made six, by inserting ssa between each base and termination, thus:

	ဟေဿာဒိ	ဟေဿဘိ	ဟေဿတိ
Sin.	hessámi	hessasi	hessati
	ငတဿာမ	ငယ္သဘာထိ	ငဟဿဒ္ဓိ
Plu.	hessáma	hessattha $\widetilde{}$	hessanti

In like manner the tense is conjugated on the bases *hehi*, and *hohi*, as:

convolution consumer constant de will be. hohissati de will be.

OPTATIVE MOOD. ငဟယျဝဲမီ ဟေယျဝာမီ ဟေယျ Sin. heyyámi hcyyási heyya ဟေယျဝမ ဟေယျိ ဟေယျဝတ္လ ဟေယျ် Plu. heyyáma, or heyyan heyyattha heyyun

The optative mood, as met in the books in Burmah, is usually made on the base *asa*. Alwis says he has not found the form given above in the books on Buddhism. ÷

Gamu to GO; English, GANG to GO. § 206.

**IH** gam, substitutes for its final in "the special tenses" . chchh, says Max Müller. In Pali this substitution is not confined to the special tenses. Kachchayano gives examples in the future, the conditional, and the aorist, which do not belong to the special or conjugational tenses. The same tense or mood is often conjugated on both bases. The following are specimens:

## Active Voice. INDICATIVE MOOD.

	First Person.	AORIST. Second Person.	Third Person.
	ന്താള്	အဂဒ္ဓော	အဂစ္တိ
Sin.	agachchhi	agachchho	agachchh <b>í</b>
	အဂစ္စိ မူ၁	အပစ္ ဝဝ	<b>အ</b> ဂစ္တ၂
Pla.	agachchhihmá	agachchhattha	agachchhun
		Also,	- Jacob - Contraction - Contractio - Contraction - Contraction - Contraction - Contraction - Contrac
	හටයි	<b>ສ</b> ດເພັ	හරයි

	အဂမမှာ	ന്നാര്	အဂမျိ
Plu.	agamahma	agamattha	agamun
		FUTURE TENSE.	
	ဂစ္တိ ဿာဒိ	ဂစ္တိဿသိ	ဂစ္စိုဿတိ
Sin.	gachchhissám <b>i</b>	gachchhiss <b>asi</b>	gachchhissati
		Also,	
	ဂမိဿာမိ	ပဇ္ပဘာဘွ	ဂမိဿတိ
	gamissámi	gamissasi	gamis <b>s</b> ati
Κ	achchayano give	s a third base, gham	ma. which does not ap-
pear in	Sanskrit. The	following are examp	les in the imperative.
	စာမ္မာမ်	စာမွဟိ	စာမွတ
Sin.	ghammámi	ghammah <b>i</b>	ghammatu
	ဂမာမိ	ဂမဟိ	ဂမတ္
•••	gamámi	gama <b>hi</b>	gamatu
	ဂစ္ဆဒ်	ဂစ္ဆဟိ	ဂန္ဆတ္
•••	gachchhámi	gachchhahi	gachchhatu

Disa, Nyá, and Brú Conjugated.

Disa, or Dakhha to see; Greek, DEIK-NUMI, CAUSE TO SEE.

§ 207. In Sanskrit, dris substitutes pas in the "special tenses," but in Pali disa is also used, and there are moods or tenses formed on the six following bases:

800 8000 8000 8000 800 800 800 disa dissa dassa dakkha dachchha passa The following examples are in the active voice, and indicative mood.

		PRESENT	TENSE.	
နိဘလ္ပ	<sup>ဒ္ပ</sup> ဘာလွ	<b>ဒ</b> က္ခတ် -	ဒစ္စတိ	ပဿတိ
disati	dissati	dakkhati	dachchhati	passati
		"He se	es."	

சைல் adassa, Imperfect, — не saw. Cont. part. diswá

Nyá to know; Greek, gno to know.

§ 208. The Sanskrit irregular verbs appear to be more regular than the corresponding ones in Pali. This verb in Sanskrit has two bases only, while in Pali it has four, as:

ညာ ဇာ ဇာ ခုာ nyá já jan ná PRESENT TENSE. ဇာ ၁နာဘီ ခုသယတီ jánáti náyati HE KNOWS. OPTATIVE MOOD. ဇာ ငေးယျ ဇာသညာ ဇာ နိယ်သ jáneyya janyá jániyá "He may know".

Brú to SPEAK; English, BRUIT to REPORT.

§ 209. This imperfect verb substitutes  $\dot{a}ha$  for its base in the perfect tense, as:

PR	ESENT TENSE	2	AO.	RIST.
ලිරිනි	ලිදි		<b>ස</b> ල්රි	အဗြင်္
brav <b>í</b> ti	bravinti-	HE SAYS-THEY SAY	abraví.	abravun—said
		PERFECT TENSI	Е.	
အာဟ	အာဟု	<b>အ</b> ်ဟုံသုံ		
áha	áhu -	áhansun—HE SA	ID. THEY	SAID-THEY SAID.

Vacha, Vada, Jara, and Mara Conjugated.

Vacha to SPEAK; Latin, VOCO to CALL,

§ 210. The verb vacha has three bases, vacha, vakkha and ucha. The Sanskrit pres. passive is formed from ucha, but in Pali more usually from vacha, though both forms are used, as:

## Active Voice.

PRESENT TENSE.

ဝက္ခာမ	vakkhámi, vakkháma—I SAY, WE SAY.
	IMPERFECT TENSE.
အဝစ္	avachá, avachú—HE SAID, THEY SAID.
	AORIST.
အင္ဝါ၀ုံ	avocha, avochun—HE SAID, THEY SAID.
	PRESENT TENSE.
ဝုစ္စတိ	2800 vuchchate, vuchchati, uchchte. "It is said."
	အ <b>ဝရ</b> အဝေါရံ

#### 03

§ 211. The last consonant of the root vada to SPEAK sometimes becomes jj, a change that does not appear to be made in Sanskrit.

ogo8 osl8 ocg8 ocs8 vajjámi, vadámi, vajjemi, vademi "I speak, or say." OPTATIVE MOOD.

осеод осзод vajjeyya, vadeyga—не мач speak.

## ୯.ଗ

§ 212. The root jara to GROW OLD, is sometimes changed to jira, jiyya, and jiya, as:

යිබති සිගානි සිගානි jirati, jiyyati, jiyati-GROWS OLD

## ଧ୍ୟ

§ 213. The root mara to DIE, is occasionally changed to miya, as: 8008 was miyati, marati—HE DIES.

§ 214. Sometimes su in isu to WISH, is changed to *chchha*. In Sanskrit this change is regularly made in "the special tenses", but in Pali the change is represented as a matter of choice, thus:  $\mathfrak{P} \mathfrak{O} \mathfrak{O}$  COOS *ichchhati*, *esati*—HE WISHES.

ယ်ရ

§ 215. Yamu, to RESTRAIN, sometimes changes its last radical to chchha. Alwis writes yama, nearer the Sanskrit yam. With the preposition ni, it signifies to "be permanent, to observe", while its Singalese definition, according to Alwis, is "regulates."

දිගාලූෆි දිගාශී <sub>niyachchhati</sub> niyamati—HE OBSERVES. වූ

§ 216. In  $D\dot{a}$  to GIVE, are several irregularities met in reading or noted by Kachchayano. The passive is sometimes made like the Sanskrit, *diyate*, and sometimes like the third conjugation,  $d^{i}$ *yati*: and similar double forms are found with other verbs. The  $d\dot{a}$  not only becomes di occasionally, but also de. In one instance the base appears to be changed to daha, and the present tense is sometimes made from dam. The following are examples:

පලීල	ခမ္မ် ခမ္မ	dgjjami,	dammami,	dahmi—I give.	
ခင္မွလူ	နင္ခလာရီ	dajjeyya	dadeyya—нн	MAY GIVE.	
ဒ္ဒကလွ	ဒိုကလေ	diyati,	diyate—IT IS	GIVEN.	
Miscellaneous Anomalies.					

§ 217. The characteristic ssa of the future tense is sometimes omitted.

 $\S$  218. The *a* augment of the imperfect and a orist tenses, and the conditional mood, is frequently omitted.

§ 219. The affix which marks the second person singular of the imperative mood sometimes take  $\acute{a}$  before it, is sometimes omitted.

§ 220. "The intermediate *i*,"says Max Müller," which has to be inserted between the verbal base and the terminations originally beginning with consonants", in the unmodified tenses, furnishes "one of the most difficult chapters of Sanskrit grammar." Kachchayano disposes of the whole subject in the following sentence:

"In the non-conjugational tenses the letter i comes."

#### Participles.

In both form and usage the Pali participles are nearly identical with the Sanskrit.

#### Active Voice.

PRESENT PARTICIPLE.

§ 221. The present participle may be formed from the third person plural of the present tense, by changing the *anti* to *an*. In Sanskrit the change is to *at*. For the declension, see § 112.

#### FUTURE PARTICIPLE.

§ 222. The future participle may be made from the third person plural of the future tense, by the same change that makes the present. See § 178.

Kachchayano however makes this participle also by omítting
the ss of the future tense, leaving the form of the present. Thus he gives

ஸ் விரையில் கால் Area and Are

§ 223. The perfect participle active is formed by adding va to the past participle passive. For the declension, see § 111.

#### Middle and Passive Voices.

PRESENT PARTICIPLE.

§ 224. The present participle is formed by changing the termination of the third person plural of the present tense, ante, into amana.

This same form is used by Kachchayano for both the present and future tenses, and sometimes in an active signification as well as in a middle and passive. It is declined like the examples in § 89, 90, 95.

#### PAST PARTICIPLE.

§ 225. The past participle is formed by adding ta to the root, or in some instances na. It is frequently used as a finite verb. The declension is the same as the present participle noted above.

Kachchayano has another past participle, but not of common occurrence, made from this by the addition of *áví*, as:

ဘုတ္လာဝီ ၀ သြတာဝီ buttárí, rusitárí—EATEN—REMAI NED

The past participle is rarely formed by simply adding ta to the root unchanged, as:

ဇ္ဇတ ita gone ည၃တ nyáta KNOWN ဘီတ bhíta FEARED Sometimes an intermediate i is found between the root § 226. and the affix. (a.) In some instances no farther change is made, as: ယာဥတ အသူလ ບວ່ວຄ 3000 yácha to ASK, yáchita. to EAT, asita. part. asa part. ပရိတ ပစ ဘာဘဘ ဘာဘိတ pacha ... COOK, pachita, bhása SPEAK, bhásita, ... ကဘ္လထဲ ရက္ခိတ ဟသ ရက္ခ rakkha, ... GUARD, rakkhita ... hasa, ... REJOICE, hasita . . . ဥပသိတ ဥပသ မဒိတ പട upasa ... APPROACH, upasita, ... mada, ... MADDEN, madita, ... (b.) Occasionly the penultimate vowel of the root is lengthened, sometimes as in § 187. As: သက္လလ. 800 င္ကဆုတ္ပ်က ഷ disa ... PREACH, desita, si ... SLEEP, sayita, ... Certain verbs with final *á* change it to *i*, as: (c.) <u>0</u>]. റ്റ് င္ခါ thita. pá ... DRINK, pitu, thá ... STAND,  $\sim$  § 227. More usually no intermediate *i* occurs. (a.) Some roots drop a final nasal before ta, as: ဥပဟန ဥပဟတ သဴဂတ သဂရ upahana ... DESTROY upuhala ... sugamu ... GO WELL, sugata,... ရတ မတ ବକ မ၃ mata ramu ... ENJOY, rata mana ... MIND, ... (b.) Occasionally when a final nasal is rejected, the preceding vowel is lengthened, as: ဟါက രിഗ ဟာခု ଡ଼ୢୢ huna, ... KILL, háta játa ... jana ... BEAR,

(c.) Roots with a final ch, or j, usually change that letter to t, before the t of the participle, as:

ാര് .	ු ුරු	00	၀ုတ္တ
sicha, to po	UR, sitta, part.	vacha, to SPEA	K, vutta, part.
880	8888	ဘုဇ	ဘုက္တ
vivicha sol	ITARY, vivitta,	bhuja, eat,	bhutta,
<b>୦</b> ୦	စတ္တ	රාල	ယုက္တ
chaja, ABA	NDON, chatta,	yuja, UNIT	E, yutta,

(d.) Occasionally the t of the participle is changed to the palatal of the root, as:

po nacha, to DANCE, nachcha, part.

(e.) A final	p is dropped, a	and the $t$ is doubled, a	s:
လိပ	888 80	သံတပ	သန္ကထ္ထ
lipa SMEAR,	litta,	santapa, BURN	
သုဝ	သုတ္တ	သုဂ္ပ	သု <b>ဂု</b> ည္ဟ
supa, SLEEP,	sutta	<i>видира</i> , ніде	, sugutta,

(f.) In some instances the final consonant of the root is dropped, and the participle is written tha, as:

ပစ္ဆ	ġg	ಲಂಡ	ထိဒ္ဒ	
	ha, ASK, putha,	yaja, OFFER,	yitha,	•••
၀သ	ဝဋ္ဌ	နူဘ	ဗ္မိိ	
vasa,	DWELL, vatha,	disa, SEE,	ditha,	•••
	ာစခု	ବନ୍ତ		
	nacha, to	DANCE, natha, part	•	

(g.) Sometimes the participial d becomes dh before dh, and dh before d, and bh, as:

ප්ප	ဗုန္မ	ထသ	လဒ္မ
budha, know,	buddha,	labha, : OBTAIN,	laddha,

(h.) Certain roots ending in ma, or mu, change their final to n before the participial t, as: ဗဘုရ သံကရ သကန္ vibhamu, to TURN, vibbhanta, part. sangamu, to GO sakanta, part. ଚ୍ଚ သရ ခုန္တ သန္ khanta, ... samu, to QUIET, santa, khamu, ... DIG ဒရ ခန္ဆ ୦.୍ୱ ၀န္ damu danta, ... vamu, ... VOMIT, vania, ... TAME, ... (i.) In some instances a final r is rejected before the participial t, as: ပကတ ဗိသရ 8000 ပကၡ pakata, ... visara, ... GO, visata, pakara, ... DO (k.) When the intermediate i is used, the final r, or musal is not rejected, as: ဂဒိတ သံရိတ သရ ဂရ gamita, ... sara, ... REMEMBER, sarita, ... gamu, ... GO,  $(l_{i})$  Before a few roots with final h the participial t is changed to l, as: အာရှင္တ ဂဟ္က ဂါင္တ áruhla ... gaha, ... TAKE, gáhla အာဝံရဟ áruhta ... کې کې کې کې کې مرکنې daha, ... BURN, dahla, áruha, ... ASCEND, ဗဟ baha, ... OBTAIN, § 228. Certain verbs take na for the passive participle instead of ta, among which may be noted the following: (a.) Roots whose finals are d, d, or dh often take na, and n in the place of their final radical, as:

 නිස
 නිස
 නිස
 නිස

 bhida, ... DIVIDE,
 bhinna, ...
 chhida, ... CUT, chhunna, ...

 ටං
 විදි
 සිද

 ටං
 විද
 සිද

 vudha, ... HINDER,
 runna, ...
 kkida, ... ALABM, khinna, ...

 29
 29

(b.) Roots with a final r, when they correspond to ri Q final in Sanskrit, usually take n, as: ပရိုင်ကျွှ လိုက္တ ୰ရୖୡଵ တရ tara, to cRoss, tima, part. parijira, to BE VERY OLD, parijima, pt.

#### CONTINUATIVE PARTICIPLE.

§ 229. The indeclinable past participle is sometimes called the gerund. It corresponds to the Greek participle when used to continue a sentence without a conjunction, as in Luke 9: 16. "Labén "having taken" the five loaves and two fishes, "anablepeas" "having looked up" to heaven, He blessed them." So in Pali:

sunakhe bindhitwá brahmanan rukkhato otáretwá သင်္ဂသြန္မရေ နိုဆိခါေတ္မွာ ဘေဝစုနံ တွော နွာမံဂါတ thojanan daruá imangáta sákhásandhare nisidápetwá မဘဟ

máha

"Having tied up the dogs, having caused the brahmin to descend from the tree, having seated him on spread branches, having given food, he spoke this verse."

§ 230 This participle has several forms, as follews:

After simple verbs it is usually written tuá, tuána, or (a.) tuna.

(1.) After compound verbs, the continuative aff x is conmonly, but not uniformly, ya.

The root is usually subjected to the same changes be-§ 231. fore twa as before ta of the past participle. There are a few exceptions, the most prominent of which is, that the causative particles are retained before tuá, while they are rejected before ta:

ဝန္ခဝငေတ္မာ	vandápetwá—н.	AVING	CAUSED	TO WORSHIP	
က၃၈ရတ္မခံ	káretwá	•••		DO	
ပူးရတွာ	púretwá	•••	•••	FILL	
သံမောဟေတ္မင	) sanmohetwá			BE FOOLISH	;
ဦးသူဒီသိသ	unnádetwá	•••		ECHO	

§ 232. No distinction is made between *twå*, *twåna*, and *tuna*. Different forms are often used with the same verb, as:

သုတ္လာ သုတ္လာန sutwá, sutwána—HAVING HEARD ဂံတ္မွာ ဂံတုန gantwá, gantuna— ... Gone

§ 233. When y is used with compound verbs, it is subject to the same rules as y, when united with the verb to form the passive voice, as in § 179. Thus:

#### FUTURE PASSIVE PARTICIPLE.

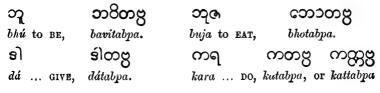

§ 235. The future passive participle is usually made by the affix *tabpa*, but sometimes by *aniya*, *ya*, *yya*, and *teyya*. Some grammarians class these participles as verbal adjectives. They express futurity combined with possibility, obligation, or fitness.

For instance : In a great drought the people fasted and prayed seven days, and still no rain fell. The question was then asked: හිදුටෝ ෆාරාගපු kinnukho tabpan

"What is to be done?" or, "What shall be done?" or,

"What ought to be done?" or, "What can be done?"

(a.) If the vowel of the root be lengthened in conjugation, and the intermediate i be inserted, the same changes are made before tabpa, as:

(b) Sometimes there are two forms, one with intermediate i, and one without it, as: යදු පදුපු පදිගපු ඉද ඉදුපු ඉදිගපු

manu to THINK, mantabpa, manitabpa. khanu DIG, khantabpa, khani-OG 0333 0008 003 0035 00308 gamu to Go, gantabpa, gamitabpa. hana KILL, hantabpa, hani-

This participle is declined like sabpa § 110.

(c.) The base of the verb before aniya, yya, or yd, is usually the same as that before tabpa, omitting the intermediate i always before aniya, as:

	<b>J</b> /		
အဓိဗ္ဗ	အရွှန်ယ	US SO	ပဇ္ဇနိယ
adhii to LEARN,	<b>aj</b> jhaniya.	pada to go,	pajjaniya
အာသ	အာသနိယ	ကရ	ကရက်ယ
ása PUT IN,	ásaniya.	kar <b>a</b> DO	kara <b>n</b> iya.
ଝ	ଜେନ୍ଫ	\$	င်္ခယျ
ji CONQUOR	, jeyya.	ni GUIDE,	
ကရ	က၁ရိယံ	နှိသ	<u>ခ</u> င်ငံက်၊ <sub>ဒို</sub> င်ငိက်၊
kara DO,	káriya.		datheyya, ditheyya
ညာ	ညားတယ္	03	ဂင္ကေတာ
nyá KNOW,	nyáteyya.	pada GO,	patteyya.

Aniya is written with a long i by Clough, as in Sanskrit.

#### INFINITIVE MOOD.

§ 236. The infinitive mood is classed by Kachchayano with the participles, and it is formed by the affix *tun* with the same base before it, as precedes the future participle *tabpa*,as:

ଡ଼ୣୢୢ	ၛႜႜႝၯ	ଞ	ၛႄၯ
jana BE BORN	, janitun.	ji conque	R, jetun.
သု	သေ၃တုံ	ဓာ	ဓာတုံ
su Hear,	sotun.	dhá bear,	dhátun.

#### CHAPTER VIII.

#### INDECLINABLE WORDS.

Indeclinable words may be divided into adverbs, prepositions, conjunctions, and interjections.

#### Adverbs.

§ 237. Some adverbs are formed by the cases of nouns, and have a form of declension, as:

စီရဿံ စီငရန อี่ด้ chiran. A LONG TIME. chirena, BY A LONG TIME. chirassan. OF LONG TIME ပစ္စတော ပရၥတာ၁ ကဏာ၁ puráto, BEFORE. pachchato. kato, WHENCE? BEHIND. CORRELLATIVE ADVER BS. § 238. Certain adverbs are correllatives formed by affixing a particle to a pronoun, and forming adverbs of Time. Place. Manner. Quantity. ဓ္ကာဒါန කෙසු အက္ခ တထာ ထာဝ tathá, THUS. táva, SO MUCH Adúni, NOW. atta, atra. HERE. တခါ တခါနိ တတ္တ တဘြ tadá, tadáni, THEN. tatta, tatra, THERE. ယဒါ ကက ကယ ယာထာ ယာဝ WHEN. yatta, yatra, WHERE. yathá, AS. yáva, AS MUCH yadá. က္ခန္) ဟုန္စ ကုန္တ ကုတ္ခြ ကထံ kadá, kudá, WHEN? kutta, kutra, WHERE? kathan, HOW? သင်္ဂန) ဘုချ သဗ္ပဘ္က သဗ္ပတ္ခ သင်္ဂယ်ာ sabpadá, sadá, ALWAYS. sabpatta, sabpatra, ALL PLACES. sabpatthá, IN EVERY WAY. ငကဒါ നേയ്ക്കു നേത്രി ekadá, AT ONE TIME. ekatta, ekatra, IN ONE PLACE. အသဒါ အည္သထာ anyadá, AT ANOTHER TIME. anyathá, IN AN OTHER WAY. 30

#### MISCELLANEOUS ADVERBS.

§ 239. There are many other miscellaneous adverbs, of which a few are here given according to the usual classification. (a,) ADVERBS OF TIME. အခုန္ တေရဟိ ဟန္န သမ္မတိ କ୍ଷ୍ୟୁ adhuná, etarahi, handa, sampati, ajja, NOW, AT PRESENT. ခေါ်သာ ရတ္တ 80) 000 page IN THE MORNING. divá, BY DAY. dosá, rattan, AT NIGHT. သတတံ သန္တတံ အနာ္ခရာတံ သနာ satatan, santatan, anárátan, saná, PERPETUALLY. (b.) ADVERBS OF PLACE. ဗ္ဗာဓ ဗ္ဗဟ အတြဟ တတ် တဟ် idha, iha, atraha, HERE. tahan, tahin, THERE. ကဟံ ကုဟိ ကုဟိည္ဟွနံ သပန္လာ kuhan, kuhin, kuhinychanan, WHERE? samantá, ON ALL SIDES. အန္တရိ အနေရာ အန္တာရေန သမၥ antaran, WITHIN. antará, antarena, BETWEEN. samá, NEAE. (c.) ADVERBS OF MANNER. န္ရတ္ထိ (ဝံ ဟေဝံ တထေဝ င္ဆတိ itthan, evan, hevan, тниs, tatheva, so. iti. ႖ဴခု႖န္ခ ٩Ş ခုၥခုၥ puna, AGAIN. punapunnan, REPEATEDLY. náná, VARIOUSLY. හි ග ကၥမိန မရဝ၁ ve or, hi, CERTAINLY. kámini, WILLINGLY. mudhá, IN VAIN. (d.) ADVERBS OF QUANTITY. කුරාං කරානාංගා အလွ ဤသိ atisáyo, MUCH, EXCEEDINGLY. ísan, LITTLE. uti. ativa, (e.) ADVERBS OF AFFIRMATION. ഹോവ သာဓု သာဟု áma, yes, certainly. sádhu, sáhu, yes, agreed. (f.) ADVERBS OF NEGATION. ເຊິ່ຊ ເຊວ ຊບ8 ພວ an, na, no, nahi, NO, NOT. má, PROHIBITIVE. 30 a,

Propositions.

§ 240 Prepositions are often prefixed to verbs in Pali, as in Greek. Some of them are nearly identical both in form, and signification.

Thus	para	in Greek, is	pará in Pali.
•••	peri	•••	pari
•••	upo	•••	ира
	sun	•••	san

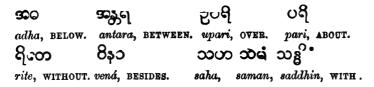

The whole number of these prepositions in Greek is eighteen, and though there are twenty in Pali, the two lists might be easily made to harmonize.

The Pali prepositions differ but slightly from the Sanskrit. The final r in *dur*, and *nir*, and the final d in *ud* are omitted in Pali, but they appear in composition before a vowel. The r in *pra*, and *prati* is dropped altogether in Pali.

The effect of these prepositions on the verbs with which they are combined must be learned from the usage. They cannot be adequately defined in a word. Thus  $\dot{a}$ , which corresponds to the Latin ad, may be defined by TO, but when prefixed to certain verbs it reverses their meaning. So  $d\dot{a}$  to GIVE, on becoming  $\dot{a}d\dot{a}$  signifies to TAKE. The following are the prepositions:

0 0		0	1 1
නථ	အတ္	නපි නඹ	<b>୨</b> ୦ ବ୍ଷ
<i>á</i> , то.	ati, BEYOND.	adhi, ajjha, Above.	anu. After.
အပ	ဆုဒ	ෂාා හසි	ෂාං බු
apa, OFF.	api, on.	abhi, abbha, towards	. ava, o, AWAY.
9	ဥပ	ອຸ	\$
<i>u</i> , UP.	upa, Above.	du, ILL.	ni, into.
ବ୍	O	ပတ် ပဋိ	<b>ଧ</b> ୍ୱର '
ní, OUT.	pa, BEFORE.	pati, pati, BACK.	pará, BACEWARDS.
ပရိ	8	<b>ు</b>	သု
pari Arouni	). vi, APART.	san, WITH.	su, WELL.

§ 241. Some of the above prepositions are often used with nouns and pronouns, but, excepting  $\dot{\alpha}$ , usually as postpositions. And there are other particles, that are usually regarded as adverbs, which also serve as prepositions in the government of nouns and pronouns, as:

#### Conjunctions.

§ 242. There are very few conjunctions in Pali. All the parts of a compound sentence being so generally connected by participles, there is little use for them beyond that of linking together the parts of a paragraph Of the few conjunctions in use, several are adverbs in form.

**208** Ð 0---0 cha, AND. cha-cha, BOTH AND. api, pi, AND, ALSO. 8 ഗ്ദ ကဒ္ဂ GD သူစ chi, sache, IF, WHEN. yadi. che, hi, FOR, BECAUSE, င့္သလူ CÔ CO ve, AS, WHEN. evan, AS, evanhi. IF SO. ငယ္ခန ပာတာ တတော လာရ yena, WHEREFORE. tato, yato, tena. THEREFORE, ജ്ഞാറി တဒါ 300 tadá, THEN. atha, MOREOVER. athavápi, AND BESIDES, ol റി—്റി တု vá, or. vá-vá, EITHER OR. tu, BUT.

#### Interjections.

§ 243. Interjections are not common, the following may be noted:

ເວລວ,	ငတ	bho, he,	Ordinary terms of address.
<b>ઝ</b> ଢଗ୍,	ଦେ	are, re,	Disrespectful
$m \propto m n$		_	

gococo aho, An exclamation of surprise,

#### CHAPTER IX.

#### DERIVATIVE WORDS.

The roots of the Sanskrit language are estimated at about two thousand, and the Pali and Sanskrit roots are substantially the same. And it may be remarked in passing that the Burmese and Karen languages are formed from a similar number of roots, and, if in other tongues they be found of about the same number, there will be a strong presumption that in the roots of various languages we have merely the different changes that have been rung out of the original set of roots in use, when "The whole earth was of one language and one speech."

These two thousand roots are made into one or two hundred thousand words, as in Webster's English dictionary, by changing their forms, or taking additions, or both. The added letters that form new conjugations often give different significations to the verb, and the prefixed prepositions have frequently the same effect as the formation of new verbs.

Changes in the roots, and numerous affixes are used to form norms and adjectives. The penultimate vowel is often changed as in § 187.

§ 244. The last consonant of the root is subjected to such changes and additions in derived words, that it is frequently difficult for the student to refer them to their proper roots. Thus:

ົ		က	00	ပါက	
ch	becomes	k, as	pacha to cook,	_	
66		£	ရိစ	ရိန္သာ	
•••	•••	chchh,	richa PESTR	ov, richchhá destroving	ł
"		8	သံအစ	ు నిర్దా	
•••	•••	jj,	sanacha, M	OVE, samajjá MOVING.	
<del>S</del>		8	ဂစ္ဆ	റക്ക	
chchh		ndh,	gachchha G	0, gandha ODOUR.	
<b>(</b> )		0	ယ္ဇ	တော်ဂ	
j	•••	g,	уија, J	01N, yoja JOINING. 31	

Changes of the last radical.

63		δ	သံဥ္က	ටාර්
	becomes	ngg, as		sangga, QUIETING.
୬୦୦		<b>666</b>	୳ଡ଼	୶୵
nj			ranja DESIRE,	-
•••	* • •	~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~	666	
		83		188
 666	•••	tti,	···· ··· ··· 666	ratti
	,	8		ଵୄୢୢୢୢ
•••	* • •	th	••• •••	ratha
ę		8	ခုရ	နစ္တိ
ţ	•••	chch,	nața DANCE,	nuchcha DANCING.
२		ą	ဗီခု	83
ġ ·	•••	n,	•	khinna Alarming,
တ		8	<b>ා</b> ග	သစ္မွ
t	•••		sața, BE TRUE,	sachcha TRUTH.
666		<b>£</b>	ගිග	ကရွှါ
•••	•••			E, kachchhá MEDICINE.
$\sim$				•
8		$\omega$	ကထ	က၍
th 666	•••		katha SPEAK,	
••••		CO	600	టర్రి
•••	•••	l,	matha Box,	malla A BOXER.
8		\$	တုဒ ၊	တူ၍
d	•••	chchh,	tuda, GIVE PAIN,	tuchchhá giving pain.
""		8	83	8န္လွာ
•••	•••		vida, KNOW,	vijja knowledg <b>e.</b>
""		83	မီခ	ဒိုလူမှာ
•••	•••	tti,	mida, LO <b>VE</b> ,	metti LOVE.
""		ପ	<b>203</b>	නග
•••	•••	tr,	chhada, cover,	chhatra AN UMBRELLA
0		8	ဗဓ	ိုင်ငံသ
dh	. 1		•	
	• • •	Ŋ,	Saura KNOW,	bojja INTELLIGENCE.

0		ಲ	၀ုဓ	ႃၜ
đh	becomes	<i>ḍḍ</i> , as	vulha to INCREASE	rudda INCREASE.
ş		တ	မန	မတ
n	•••	<i>t</i> ,	mana THINK,	mata KNOWLEDGE.
ဘ		<b>\$</b>	လဘ	လစ္ဆာ
bh	•••		labha Obtain,	lachchhá OBTAINING.
""		â	666	လူချာ
	•••	ddh,		laddhá
ရ		8	ဂရ '	ဂရူ၁
mu	•••	chchh,	gamu G <b>0</b> ,	gachchhá GOING.
ຊ		တ	မရ	မတ
r	•••	<i>t</i> ,	mara DIE,	mata DEATH.

သု		M	အက်ိဗ္ဗသ	<b>ශ</b> ාරි <b>හුර</b>
<b>8</b> U	•••	jjh,		abhijjhá desiring.
""		ଛ	""	အဘိန္ဆာ
•••	•••	chchh		abhichchhá
ဟ			ရဟ	ရည္သာ
h	•••	chchh,	muha DOUBT,	muchchhá, DOUBTING.
""		$\omega$	လာ	ဂါယ
	•••	у,	gaha таке,	gáya taking,

142

Sometimes the last consonant is omited altogether, as: § 245. တရဂရ တရဂ ဂရ turagamu to GO SWIFTLY, turaga A HORSE; from gamu. " ဘုဇဂ ဘူဇဂမ bhujaga A SNAKE; **b**hújagamu ... CROOKEDLY, § 246. Occasionally, though regularily derived from the root, every letter of the root is changed in the derivative, as:

vacha to SPEAK, oka SPEAKING, utta SPOKEN, UTTERED.

If words in the same language are occasionally changed, by the operation of established laws, to forms that retain no element of the original root, it may be expected that such changes will often occur when the words pass into other languages, and etymologists are therefore compelled to allow "vowels to go for nothing, and consonants for very little."

It appears from the above examples, that there is a strong tendency to substitute, in the last radical, a gutteral for a palatal, a palatal for a dental, and that *chchh* represents *ch*, *t*, *th*, *d*, *bh*, *m*, *s*, and *h*. But while the last consonant is constantly an evanescent quantity, the first almost always remains unchanged. It is the only permanent part of the word, and may perhaps indicate the monosyllabic base from which the root was originally derived.

Kachchayano enters largely into the derivation of words. Three books, out of the eight into which his grammar is divided, are devoted to this subject. A small fraction only of what he has written can be given here. To enter fully into the matter belongs rather to the dictionary, than to the grammar.

§ 247. The verbal root unchanged is occasionally used for a noun or adjective, as:

OW vama to VOMIT, OW vama VOMITING.

§ 248 More usually the penultimate vowel is lengthened, and if the final radical be a palatal, it is changed to its corresponding gutteral, as:

20 coor go coor go coor sucha to GRIEVE, soka GRIEVING. ruja to BE SICK, roga SICKNESS.

§ 249. (a.) Ka is added to verbal roots, after lengthening the penultimate vowel, to form nouns, and adjectives, as:

permitte to tot, to total hours, and adjourvos, as.
ပာ pacha to cook, ပါစက páchaka A cook.
(b.) Ka added to nouns forms nouns of multitude, as:
မနုဿ <sup>manussa MAN.</sup> မနုဿက <sup>manussaka</sup> MANY MEN.
မယူရ mayúra PEACOCK, မယူရက mayúraka MANY PEACOCKS.
అుసిప mahinsa BUFFALO, అసిపియా mahinsaka MANY BUFFALOES
§ 250. Yaka is added to verbal roots unchanged to form nouns, as:
as: ടി dá to give, ടിധന <sup>dáyaka</sup> A giver.
83 vina to INSTRUCT, 83000 vinayaka AN INSTRUCTOR.
§ 251. Ika is affixed to nouns, dropping the last vowel, to form other nouns and adjectives. The new nouns formed are of- ten denominatives, gentiles, and instrumentive nouns, but the ge- neral effect of the particle is that of man, with or without a hy- phen, as affixed to nouns in English. Thus "Net-man," in Pali is "Fisherman," in English. The following are examples: 0 > 00 jála A NET, $0 > 000$ jálika A NET-MAN.
റിഠ chápa a bow, റി8ന chápika a bowman.
<mark>ളി</mark> <sup>dwára</sup> A DOOR,
uno magada MAGUDA, under magadika A MAGUDAMAN.
နာဂရ nágara A CITY, နာဂရက nágarika A CITIZEN.
သောကခု <sup>sokara</sup> HOG, သောကရိက <sup>sokarika</sup> A HOG-MAN.
That is a man who kills hogs-A BUTCHER.
റിന váta WIND, റിനന vátika A WIND-MAN. That
is one suffering from disease produced by wind, or flatulency.
no tila SESAMUM, con 800 telika A SESAMUM-THING.
That is a mixture in which segaroum predominates.

That is a mixture in which sesamum predominates.

Affixes ta, tta, tra, itta, and tha.

144

vinaya THE VINIYA, ငဝနယ်က venayika A VINIYA-MAN. රිදිග That is a student of the Viniya Buddhist Scriptures. dhamma LAW, dhammika A LAW-MAN. ဓမ္မိက ဓမ္မ That is one devoted to the law-RELIGIOUS. kaya BODY, ကားတိုက္ရ káyika BODY-MAN. ကယ That is pertaining to the body-corporeal. manasa MIND, mánasika MIND-MAN. မ၁၃သိက မနသ That is pertaining to the mind-MENTAL. vachasa WORD, ၀ါစသိက váchasika WORD-MAN. 0000 That is pertaining to words-verbal.

§ 252. Many nouns and adjectives are met with the form of the passive past participle, adding ta, ita to the verbal base, as:
i to GO, ita GONE.
púja to OFFER, ADORE, QEO pújita OFFERED, ADORED.
88 vida to KNOW, 880 vidita KNOWN.

§ 253. *Tta*, optionally changed to *tra*, is added to verbal root to form nouns, as:

ට pá to DRINK, UCG patta, or patra, DEINKING CUP. ව dá to GIVE, විදු විරා dátta, or dátra, A DONOR.

§ 254. Itta is added to verbal roots, after the penultimate vowel has been lengthened, to form nouns of aggregation, as:

os vada to speak, of speakers, váditta the whole of the speakers, or a multitude of speakers.

og chara to OBSERVE, olgo cháritta THE WHOLE OF THE ofservers, or a multitude of observers.

 $\S$  255. A few abstract nouns are formed by adding tha to verbal roots, as:

ၶရ	dara	to	DREAD,	ဒရထ	duratha	DREAD.
ၶမျ	<b>da</b> m <b>u</b>	to	REPROVE,	ခဋ္ဌထ	dammatha	REPROOF.

#### Affixes n, n, yana, ma, ttima, and ya.

§ 256. Many nouns, and adjectives are formed by adding n or n to verbal roots, as: kudha to BE ANGRY, kodhana ANGEY. ကောဝခု ကုဓ dusa to BE WICKED, dosana ဒေါ်သံခု WICKED. ရသ pu to BE PURE, pavana PURE. ပဝခု 9 9000 asa to EAT, usana EATING. အသခု nyá<u>n</u>a nyá to know, KNOWING. ညာ \* ်ည်သူ kara<u>n</u>a ACTION, Or kara to ACT, ကရဏ ကရ

INSTRUMENT OF ACTION.

§ 257. Yana is affixed to proper names to form patronymics, as: од vachchha VACHCHHA, одогр vachchayana тне son of VACHCUHA.

§ 258. Ma is added to roots in the signification of possession, as: GO go AN OX, GO goma A POSSESSER OF OXEN.

රෝ go AN OX, රෝශ goma A POSSESSER OF OXEN. රෝ vá to be withered, රාශ váma A withered thing. හ hu to sacrifice, රොරාශ homa A sacrifice.

§ 259. *Itima* is affixed to verbal roots, after dropping their last vowel, to form nouns, as:

s)  $d\dot{a}$  to give,  $\Im \otimes \Theta$  dattima a thing given, gift.  $\alpha$  ku to be bad,  $\alpha \otimes \Theta$  kattima a thing that is bad.

§ 260. Ya is appended to verbal roots to form nouns denoting the instrument, as:

8, vina to INSTRUCT, 8, vinaya THE WORK THAT INSTRUCTS.

Soo nissa to trust in, Sooo nissaya the person trusted in. i. e. a teacher.

\$ 261. Ya compounded with the last consonant is added to adjectives to form abstract nouns, as: 30000 alasa IDLE, 30000 dlasya IDLENESS.

ອວເຊວດ aroga NOT SICK, ອວວເຊວຊ árogya the STATE OF NOT BEING SICK.

§ 262. Maya is affixed to nouns, after lengthening the vowel, to form other nouns, as:

SOUS aya IRON, SOCUESCO ayomaya > MADE OF IRON, OF A WORKER IN IRON. i. C. A BLACKSMITH.

Social surania GOLD, COSCO sovaniamaya MADE of GOLD, or a worker in GOLD. i. e. a GOLDSMITH.

§ 263. (a.) Eya, eyy, is added to verbal roots, after dropping the last vowel, to form nouns, as:

ອງ	dá to give,	ဒေယျ	deyya Giving.
ပါ	pá to drink,	ငေဟျ	peyya DRINKING.
ဟာ	há to REJECT,	လာယျ	heyya REJECTING.
မင်	má to love,	မေယျ	meyya LOVING.
ු නි	nyá to know,	ညေဟျ	nyeyya knowing.

(b.) Eyya is added to nouns to form other nouns in the signification of worthiness, as;

SODA dassana SEEING, SODGAUJ dussaneyya WORTHY OF

୦ ଛୁନ୍ vandana WORSHIPPING, ୦ ଛୁେନ୍ଦ୍ୟ vandaneyya WORTHY OF BEING WORSHIPPED.

(c.) It is added to feminine proper names to form patronymics, as:

ററ്റി ganggá Gangga, ററ്റ്ഡാ ganggega Ganggeya, A son of gangga

പ്പെട്ടും Publina, പ്രോഗ്യം Pohineyya BOHINEYYA

 § 264. Kara is added to nouns to form denominatives, as :
 గ్రంత్రీ kumbha A POT, గ్రంత్రంత్రం kumbhakára A POTTER..
 టంలు mála A FLOWER, టంలుగుంల málakára A FLOWERIST.
 గ్రంత్రీ ratha A CARRIAGE, గ్రంత్రంత్రి rathakára CARRIAGE-MAKER.

§ 265. Ura is affixed to verbal roots to form nouns, and adjectives, as:

83 vida to know, 839 vidura knowing, wise. ගා masa to weigh, හොද masura A PEA.

§ 266. Era is added to proper names to form patronymics, as-8007 vidhavá VIDHAVA, COOGOG vedhavera VEDHAVERA THE SON OF VIDHAVA.

§ 267. La is added to verbal roots to form nouns and adjectives, as:

ပဍ	pata to SURROUNI	<sup>),</sup> ပဥလ	patala	A MULTITUDE.
မသ	musa to BREAK,	မသၸ	musala	A PESTLE.
ကူသ	kusa to SHINE,	ကူသလ	kusala	НАРРУ.
СО С	maga to GO,	မင်္ဂလ	manggala	FORTUNATE.

§ 268. Lla is added to nouns to form other nouns, as: COS veda THE VEDA, COS vedalla ONE WHO TRUSTS IN THE VEDAS.

§ 269. Ila is added to nouns to form adjectives in the signification of possession, as:

တုက္ tunda A SNOUT, တုက္ရွိလ tundila, HAVING A SNOUT. That is having a large snout.

§ 270 When a proper name ends in u, the patronymic is sometimes made by changing it to va, and lengthening the penultimate vowel, as:

అస్థి manu MANU, అనిఫం mánava MANAVA SON OF MANU. 33 § 271. Sa or ssa is added to verbal roots to form nouns and adjectives, as: adjectives, as: alasa to ADORN, 320000 alasa IDLE.

32 OD alla to ADORN, 32COOO allasa IDLE. ωρ ωρ mana, or manu to KNOW, ωρΟΟΟ manussa MAN. That is the being that knows good and evil.

§ 272. *A* is added to verbal roots to form abstract nouns, as: ws mada to INTOXICATE, was machchhá INTOXICATION.

§273. Tá is affixed to nouns to form other nouns, as:

Go jana MAN, Go Janatá MANY MEN.

§ 274. Vá is added to nouns to form adjectives signifying possession, as:

guna ATTRIBUTE, A GOOD ATTRIBUTE,gunaváPOSSESSED OF GOOD ATTRIBUTES—VIRTUOUS.

op dhana property, ඉරා dhanavá possessed of property. That is rich.

COD kesa HAIR, CODO kesavá POSSESSED OF HAIR. That is HAIRY.

ກາດ bhaga GLORY, ກາດດີ bhagavá POSSESSED OF GLORY. That is GLORIOUS.

§ 275. (a.) Nouns are formed from verbal roots by affixing *i*, as:

 $\omega_{\mathbf{p}}$  mana to reverence,  $\omega_{\mathbf{q}}$  muni one reverenced, an ascetic.  $\infty$  kava to paint,  $\infty$  kavi a painter.

(b.) It is added to proper names to form patronymics, as: Olgoon várána VARANA, Olgoco váráni VARANI SON OF VARANA § 276. Ti is affixed to the same verbal base as that of the passive past participle, to form feminine abstract nouns, as: wara to DIE, was mati DEATH. wana to KNOW, was matti KNOWLEDGE.

§ 277. Di, from dissa to SEE, is appended to pronomial bases in the signification of like, as:

ଯ୍ <u>ଧ</u> ୍ୟ	<b>í</b> di	like	THIS.	ကားန	yáði	like	WHAT.
လာန္ပ	tádi	like	тнат.	မာဒိ	mádi	like	ME.
ယ္ပန	kidi	like	WHAT?	cg	edi	like	THAT.
သ၁ဒ္ဒ	sádi		EQUAL 7	го іт.			

This affix is also written diso, riso, and dikkho: Scoon Recon Secon

§ 278. (a.) Nouns are formed from verbal or noun bases by affixing i, as:

നറി kara to DO, നറി kari A DOFE, AN ARTIFICER. Sop danda A STICK, Sop dandi ONE WHO HAS A STICK. (b.) It is added to proper names to form patronimics of the feminine gender, as: റിനാം gotama GOTAMA, റിന്റ് gotami GOTAMI THE DAUGH-TER OF GOTAMA.

§ 279. Ví is added to nouns to form nouns and adjectives in the signification of possession, as: COO medha UNDERSTANDING, COOOS medháví POSSESSED OF UNDERSTANDING, WISE.

§ 280. U, tu, dhu, nu, and nu, are added to verbal roots to form nouns, as:

ဘိက္ခ	bhikkha	to	BEG,	သွထ္လ	bhikkı	A BEGGAR.
ဟန	hana	to	KILL,	ဟန္	hanu	DEATH, A WEAPON"
ကရ	kara	to	do,	ကရ	karu	A DOER.
ဘါ	bhá	to	SHINE,	<u>ဘါ</u> ဏ၊	bhá <u>n</u> u	THE SUN.
ຊ	ri	to	INJURE,	ရေရာ	re <u>n</u> u	DUST.
60	vo	to	GO,	ေတာ	ve <u>n</u> u	A BAMBOO.

150 Affixes nu, tu, dhu, mma, iya, kkhuttu, and dhá.

Co dhe to DRINK, CO i dhenu WHAT GIVES DRINE, A COW O dhá to SUPPORT, O i dhátu THAT WHICH SUPPORTS, A ROOT, AN ELEMENT. O he to GO, CUNO hetu THAT WHICH MAKES TO GO

A CAUSE.

a du to agitate, soq davadhu anxiety.

There are other affixes, as *mma* forming nouns, *iya* adjectives and *kkhattn*, and *dhá* adverbs, but the principle ones are given.

Some of these affixes are identical with the Sanskrit, as *ika*, and ti: but others differ materially. When the Sanskrit affix has a final consonant, the final is dropped, as, *i* which corresponds to the Sanskrit *in*, and *dhu* to the Sanskrit *duch*.

When the final consonant is dropped, the preceding vowel is sometimes lengthened, as vi for vin, and vi for vat. Occasionally usage is not uniform. Thus mat in Sanskrit is sometimes mi in Pali and declined like *bhagavá*, § 102: but it is sometimes ma, and declined tike *puriso*, § 89. Here it seems to be confounded with the Sanskrit affix man.

The derivation of words is often quite dissimilar. Thus bhagavá, or bhagavat, is derived in Pali from bhaga and the affix vá, but in Sanskrit from bhaga and matuch. Like differences are frequently met. One of the most note worthy is manussa, MAN. In Sanskrit it is derived from manu, and made to signify a descendant of Menu, but Kachchayano derives the word from manu to KNOW. His words are:

က္သလာက္သာလေ ဓမ္မေ မနတိ ဇာ၁နာတီတိ မန္နသော၁ kusalákusale dhamme manati jánátíti manusso မာနုသော၁။ ကာရဏာကာ၁ရဏာ မနတိ ဇာ၁နာဘတီတိ ဝါ mánuso káranákáranan manati jánátíti vá မနုသော မာ၁န္သသော manusso mánusso

"He understands, he knows the good and not good laws,' so [It was said. Hence] MANUSSO. Or, 'The cause and the causeless he understands, he knows,' so [It was said. Hence] MANUSSO."

For this definition Kachchayano must have drawn his ideas from a Shemitic source.

#### CHAPTER X.

#### COMPOUND WORDS.

Pali, like Sanskrit. is distinguished by its numerous and complex compound words, but the most involved of them are only exaggerations of such English expressions as:

"The always-wind-obeying-deep."

"Iron-cotton-silk-print and dye works."

In English the words when compounded remain unchanged, but in Pali the particles of inflection are dropped from every word except the last. Of necessity then, the forms that remain are the bases of the words inflected, and not the roots. This is still the rule to a limited extent in German. Thus "SONNE TAG", "Sun's day", when compounded drops the mark of the genitive, and becomes SONNTAG, "Sunday." So DENKEN WURDIG, "Worthy to think of." when compounded, drops EN, the termination of the infinitive, and makes DENKWURDIG, "memorable."

Kachchayano makes the same divisions of compound words that the Sanskrit grammarians do, but to whom exception is taken that they do not distinguish things that differ, the same compound being sometimes referrible to two different divisions. Various improved arrangements have been proposed, the last by Max Müller, being the simplest and most logical, is here followed.

#### I (a.) Governing Determinate Compounds.

§ 281. These are sometimes called dependant compounds, because the first word is dependant on the last, being governed by it in some oblique case. The last word is often a participle, frequently a noun, and occasionally an adjective. The following are examples.

အပါယံ ဂတော အပါယ ဂတော instead of apáya n gato. gato. apáya "Gone to hell." "Hell-gone,' . . .

జ్లయం	ကထံ		ဗ္ကဿရေး	န ကထံ
issara	kathan, in	nstead of	issarena	kathan.
"Issara-d	one."		"Done by	Issara."
ရ၁ဲဖပူဒို	ငတာ		ရညောပူင်	ေသ၁
rájapúriso,	,	•••	ranyopúriso.	
"King-m	ien",		"Men of the	e king."
ଦେ¢ର୍	ဘယံ		စေဝရသ္မင	ာက္က
chora	bhayan,	•••	chorasmá	bhaya <b>n</b> .
"Thief-fear	,"	•••	"Fear from	a thief."
သံသၥရ	ရက္ခံ		ಬೆಬಾಂಗ	ရက္ခ်
<b>s</b> ansára	dukkhan,		sansare	dukkha <b>n</b> .
"World-m	isery,"	•••	"Misery in	the world."

I (b.) Appositional Determinate Compounds. § 282. In these compounds the first part stands usually as an adjective qualifying the second, or, in other words, the first is the predicate and the last the subject, as:

လေါဟိ <b>တ</b>	<b>ဝ</b> န္ဒဲနီ	လေါဟိတံ စန္ဒနံ
lohita	chandanan	. lohitan chandanan.
	"Red sand	al-wood,"
မတ္သာ	ဂဟပ္ပတိ	မဟံ ဂဟပ္ပတိ
mahá .	gahappati, . "Great hous	v 11

§ 283. The first word in these compounds is sometimes an indeclinable particle, as:

<b>ခု</b> ဘိက္ခု အဘိက္ခု	နအရိယ အရိယေ၁
nabhikkhu, or abhikkhu NOT A PRIE	ST. naariya, or ariyo not an Ariya.
8မျင္စခါ	ကုအသနံ ကတသန္န
vimukho AN UGLY FACE.	kuasanan, or katasanan BAD FOOD.
သုဂၡွေါ	ကအသန ကတန္စ
sugandho GOOD SMELL.	kaasana, or katannan BAD RICE
ကုပူရိသ၁ က၁ပူရိသ၁	ကုဒါသ၁
kupúrisá, or kápúrsá BAD MEN.	kudásá worthless slaves.

#### **I** (c.) Numeral Determinate Compounds.

§ 284. When the first word is a numeral, these compounds are classed as numeral determinate compounds. They often dif-Max Müller says: "Tri-loki, fer in gender from the Sanskrit. fem. the three worlds: here the Dvigu compound takes the fem. termination to express an aggregate." The following examples show that the same thing is expressed in Pali by the neuter:

က် လာတံ

စတု <sup>9</sup>သံ

ti lokan THE THREE WORLDS.

သဏေစ ဗြဟ္မဏစ

### တ်ခုထခုံ

ပဉ္က ပဝံ panycha vavan FIVE OXEN.

chatu disan THE FOUR PLACES.

ti nayanan THE THREE EYES. So also the Sanskrit "dvy-ahah masc. a space of two days."

is made neuter in Pali. Thus:

sattáhan a space of seven days. သတ္တါဟံ

### **II.** Collective Compounds.

§ 285. When two or more words are united by the copulative conjunction and, the conjunction is often omitted, and the whole is formed into a collective compound, of which there are two kinds.

(a.) The last word is put in the plural number in the gender of that word, as:

samana cha brahmana cha, becomes samana brahmaná. "A Buddhist priest, and a brahmin."

သ၁ရိဝုတ္တစ	မေါဂ္ဂလါ <b>ခုစ</b>		သာရိပုက္တ	မောဂ္ဂလါ <b>န</b> ာ
sáriputta cha	moggalána cha, "Sariputta		sáriputta Moggalana."	moggalaná
	computer,	cual G		

ဗလဥ္လ ပရက္က ၀ ငမာ ဇုတိ ၀ ဗလ ပရက္က မဇုတိယော balanycha purukkacha mojuticha, ... bala parakka majutiyo.

ා නංගා පිුගි නංගා

"Strength, and diligence, and power."

(b.) The last word is put in the neuter gender and singular number, Some of these Pali neuter compounds would be put in the masculine in Sanskrit.

ကထိုအဘာ့ ဟဝ္ဂင်စ အသော၃စ hatticha assácha. hatti assan.

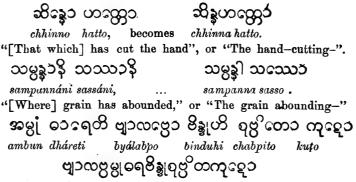

"Elephants, and horses.

Many compounds may be put in either the masculine or neu ter, as:

ജരേറ്റാ ട്രോറ്റെ ടാരേറ്റ്റ് ടാരേറ്ററാ ajo cha elko cha, becomes ajelakan, or ajelaká "A goat and a rum."

#### III. Possessive Compounds.

§ 286. Possessive compounds are epithets, or predicates, and are sometimes denominated relative compounds, because they are used relatively, and may be often rendered in English, by a relative pronoun, as:

byálabpampu dhara bindu chubpita kuto.

"He who holds water suspended by drops that have kissed the mountain summits," becomes "The holding-suspendedmountain-summit-kissed-water-drops-[god of rain.]"

#### IV. Adverbial Compounds.

§ 287. Adverbial compounds are formed by prefixing an adverb or preposition to a noun put in the neuter singular, as:

ယသ၁ ၀ုၿ	yathá vuợhợhan	ACCORDING TO OLD AGE.
ඟාරා ලිර	yáva jivan	AS LONG AS LIFE.
ဥပ ကုမ္တိ	upa kumbhan	NEAR THE POT.
အန္တရ ပါသ၃်း	anantara pásádan	BETWEEN THE SPIRES.
တိရိပ္ပတံ	tira pappatan	BEYOND THE MOUNTAINS.

#### CHAPTER XI.

#### SYNTAX, AND CHRESTOMATHY.

The syntax of the Pali language differs very little from that of the Sanskrit, and beyond a chapter on the cases of nouns, Kachchayano is nearly silent on the subject. To supply his deficiences in this, and some other parts of his work, extracts from the Pali writings will now be given, and the principles of the language deduced from them.

#### ARTICLES.

The native Pali grammarians know nothing of articles, yet their existance in the language cannot be questioned.

#### Indefinite Article.

§ 288. The English indefinite article a, an, French un, German ein is made in Pali by eko, eká ekan, the numeral one, and is probably the origin of the others.

ငကောင် ပူရိသော ဂဏ္ဍော ေနွ ပခုမ္မင္ရနိ အာပာရိတ္မွာ ရ eko púriso gah<u>n</u>o dwe padhummani áharitwá ra-ညာ ဟတ္တေ ငွပေသိ nyo hatte thapesi.

"A black man brought two lotuses, and caused them to be put into the hands of the king."

Eko is the numeral "one", masc. gen. nom. case § 113. but here used for the indefinite article "a." Puriso. "man," noun 1st. decl. masc. gen. sing. nom. case § 89. Gahno, "black," adjective agreeing in gender number and case with the preceding noun § 110. Dwe is the numeral "two," nom. case, agreeing with the following noun § 114. Padhummani, "lotuses," noun 1st decl. neut. gen. plur. acc. case governed by the participle following § 90. Aharitwá, "having brought," indecl. part. from hara, "to take," with prep. á, "to bring," a verb of the first conjugation § 229. Ranyo, "of the king," irr. noun, masc. sing. gen. case § 108. Hatte, "in the hands," noun masc. plu. locative. case § 89. Thapesi, "caused to be placed," 3d. pers. sing. aorist of the root thá, a reduplicated verb § 204. (h.) made causal by the insertion of pe. § 200. Though not noted by Kachchayano, the aorist of causative verbs is often made, as here, by affixing the aorist of asa, "to be", in the place of the personal terminations § 205.

#### Article.

#### Definite Article.

§ 289. The definite article *the*, Greek *to*, is made in Pali from the demonstrative *ta*, which is undoubtedly of common origin with both the Greek, and English article. It is used like *the* in the following sentence:

ပာတ္တိအား ၆နိ သဲခ္မေါ မဟာ၁ အပောာသိ။ အထ မဟာ hatti ádini saddo mahá ahosi. atha mahá သတ္တော တံဘဋ္ဒိ သုတ္လာ <sup>satto tan saddan sutwá.</sup>

"There was a great noise of the elephants, et cetera, and the Great Satto having heard the noise."

Hatti ádini, "the elephants and other things," a possessive compound, first part the masculine noun hatti in its uninflected state, plural in signification, and the second part is *ádi*, "begin-ing," but used in this place to signify, beginning from the elephants, and proceeding to other things not expressed. Here the things implied from the preceding context, are "fourteen hundred carriages et cetera." The word is here put in the neut. plu. nom. Saddo, "sound, noise," noun 1st. decl. masc. gend. nom. case §89. Mahá, "great," adj. from mahan § 153. agreeing in gender number and case with the preceding noun. Ahosi, "was," 3rd. sing. aorist of root hu, anomalous verb § 205. Atha, "and, now," conj. § 242. Mahá Satta, "Great Satta," appositional determinate com-The first member is maha, as above, the form pound § 282. which mahan always takes in these compounds. The second member is satta, "a rational being," noun 1st. decl. masc. gen. nom. case. It is here used as a proper name-THE GREAT RATIONAL BE-ING, applied to THE BEING that is destined to become a Buddha. Tan, "the," demonst. pron. neut. gen. sing. acc. case, agreeing in gender number and case with the following noun. Nuddon, "noise," the same noun as saddo above, but here put in the neuter gender, and acc. case, governed by the participle following. Sutwá, "having heard," continuative participle from the root su to hear, 4th. conjugation § 194.

Were the first sentence to occur on an inscription, it would puzzle the antiquarians to understand it. Hatti addini is in the nominative plural without a verb, while the signification of the context so clearly requires the genitive case, that the reputed translator of the Pali books into Burmese, Buddhaghosa, rendered it in the genitive without note or comment. This is an instructive example in decyphering inscriptions. A precisely parallel case occurs on the second tablet at Girnar. Prof. Wilson says: "The use of the nominative case offers a syntactical perplexity, for there is not any verb through which to connect Antiochus with the rest of the sentence." He proceeds to object to Mr: Prinsep's rendering in the genitive, but in which he is fully justified by the context, and the usage of the Pali books.

. ....

#### NOUNS.

Pali nouns have three cases more than the Greek, and two more than the Latin.

#### Nominative Case.

§ 290. The usage of the nominative case, does not differ from that of other languages of the Indu-European family, as:

ညက္ခုသာစ ကုရှရာစ ရင်တံသာစ ခု3ေရာစ အဘိရတာ  $\mu$ 

"Eagles, and ospreys, and sun-ducks, and comorants ring out loudly their notes."

Ukkusá, "eagles," noun 1st. decl. masc. nom. case plur. §89. Cha, "and," conj. The three words that follow are parsed in the same way. Abhirutá, "sound out exceedingly," nom. case, plur. masc. of the pass. past part. of the root ru with the preposition abhi, signifying excess. The verb is of the first conjugation, but the participle is made by affixing the termination to the root without changing u to v, and forming the base rava § 187. The participle agrees in gender, number, and case with the nouns, but is here used as a finite verb.

> ອວນ໌ ເວລະ ບອງເອລາ ຊຸດອາສາ chan teron pahito dúto. "I [em] a messenger sent to them."

Ahan, "I," 1st. pers. pron. sing. nom. case § 120. Tesan, "to them," 3rd. pers. pron. plur. masc, dat. case § 122. Pahito, "sent," adj. ncm, case sing. masc. agreeing with the noun following § 110. Dúto, "a messenger," noun lst. decl. masc. ncm. sing.

wascomo 30 monueso si, "Art thou a man?"

Manuso, "a man," noun 1st. decl. masc. nom. sing. Si, "art," anomalous verb *asa*, pres. tense 2nd. pers sing. § 205. Written in full it is *asi*, but the *a* is elided by the rules of permutation on account of the preceding o § 53 (*a*.)

### ເກວ ລວເພວ ເອງ ဥບສູວເພວ ko námo te upajjháyo "What [is] the name of thy teacher?"

Ke, "what?" inter. pron. masc. nom. sing. agreeing in gender, number, and case with the following noun § 127. Námo, "name," and *upajjháyo*, "teacher," nouns of the first declension parsed as above. Te, "to thee," 2nd. pers. pron. dative singular. § 121. Here used for the possessive pronoun "thy"

#### Accusative Case.

§ 261. The accusative is not only used to mark the objects of transitive verbs, but is also used where to would be found in English, after verbs signifying to listen to, to offer to, to speak to, to go to, and others. Occasionally it is used with words marking time and space.

റിഠ് ഗാറ്റെ gávan hanati, "He kills an ox."

Gávan, "an ox," noun irr. masc. sing. acc. case. § 109. Hanati," he kills," 3rd. pers. sing. pres. tense of the root hana, a verb of the 1st. conjugation § 178.

Thatan, "a water jar," noun 1st. decl. masc. sing. acc. §89. Karot, "he makes," 3rd. sing. pres. tense of the root kara, a ve b of the 7th conjugation § 197.

ပူဒိုဘာ ပူရိသီ ဂါမံ ဂါမယတိ <sup>púriso púrisan</sup> gáman gámayati

"A man causes a man to go to the village."

Púriso, see § 288. Púrisan accusative case of preceding noun §89 Gáman, "a village," noun 1st decl. masc. sing. accusative § 89. Gámayuti, "causes to go," 3rd. pers, sing. of the root gama § 206. made causative by ya § 200.

oපු° නැතාන dhamman sunáti "He'listens to the law."

Dhamman, "law," noun 1st. decl. masc. sing. acc. case § 89. Sunáti, 3rd. pers. sing. pres. tense of the root su, 4th, conjugation.

പ്പട് പ്പോള് പ്പോള് buddhan pujeti, "He offers to the Buddha."

Buddhan, "Buddha," noun 1st. decl. as above. Pújeti, "he offers to," 3rd. pers. pres. tense of root púja 8th. conj. § 198.

သံပတန္တဲ့ ဒုမာ ဒုမံ <sup>san patanti dumá duman</sup>.

"They go together from tree to tree."

San patanti, "they go together," 3rd. pers. plur. pres. tense of the root pata to go with the prepostion san TOGETHER, a verb of the 1st. conjugation § 178. Duná, "from tree," noun 1st. decl. masc. sing abl. case, má for hmá § 89. Duman, "to tree," the same noun as the preceding, but in the accusative case.

ငယာာ ဖိုးစား ပင္ကလာ yojanan digho pappato.

"A mountain a yuzena high."

Yojanan, (a measure of distance variously estimated at from 4 to 12 miles,) noun 1st. decl. neuter. sing. acc. case § 90. *Digho*, "high," adj. masc. sing. nom. case, agreeing with the noun following § 110. *Pappato*, "a mountain," noun 1st. decl. as above.

#### Instrumentive Case.

The instrumentive case marks the instrument by which § 292. an act is performed. It is often used in Pali where the ablative would supply its place in Latin.

#### dáttena vihin lunáti. <u>ေ</u>ခါတ္ကေန ဗိဟိ် လှနာတိ

"He reaps paddy with a sickle." dáttena, "with a sickle," noun 1st. decl. sing. inst. case § 89. The noun is made from do to CUT, and the affix tta, § 253. Vihin, "paddy," noun 1st. decl. masc. sing. acc. § 91. Lunáti, "he reaps," 3rd. pers. sing. pres. of lu, a verb of the 5th. conjugation § 195.

ဝါသိယာ မူက္ခံ တစ္သတိ vásiyá rukkkan tachchhati.

"He hews wood with an adze."

Vásiyá, "with an adze," noun 1st. decl. fem. sing. inst. case § 96. The noun is made from vasa to DWELL, and the affix i, § 275 (a.) Rukkhun, "wood," noun 1st. decl. masc. sing. acc. § 89. Tachchhati, "he hews, " 3rd. pers. sing. pres. tense. 1st. conj. § 178. pharasuná rukkhan chhindati.

ဖရသုနၥ ရက္ခံ ဆိန္ခတိ

"He fells a tree with an ax."

Parasuná, "with on ax," noun 1st. decl. masc. sing. inst. case §93. Rukkhan, "a tree," noun as above. Chhindati, "he cuts off," 3rd. pers. sing. pres. tense of the root chhida, a verb of the 2nd. conjugation § 189.

#### လဏ္စ ေ ဝိထပ နတာန္ခုက kudtalena pathaví khanati.

"He digs the earth with a hoe."

Kudtalena, "with a hoe," noun 1st. decl. mas. sing. inst. § 89. This word is also written kudala, and kutala. Pathavi, "earth." noun 2nd. decl. fem. sing. acc. § 98. The accusative singular of this word, as well as others of the the same final, often makes i in the books, instead of in. Khanati, "digs," 3rd. pers. sing. pres. This verb is referred to both khanu, and khamu, but it is conjugated like a verb of the first conjugation with final a.

chakkhuná rúpan pussati စက္ခုနာ ရုပံ ပဿတိ

"He sees the object with the eye." Chakkhund, "with eye," noun 1st. decl. masc. sing, inst. \$93. Rúpan, "the form," noun 1st. decl. neut. sing. acc.. §90. passati, "he sees," 3rd. pers. sing pres. tense of the root disa irr. verb § 207.

သောက္ခန္ သန္ခံ သူဏၥတိ "He hears the sound with the ear."

Sotena, "with the ear," and subdan, "the sound," parsed as above. Sunáti, he hears," parsed in § 261,

36

sotena saddan su<u>n</u>áti

ကားယန္ ကမ္မ် ကရောတိ káyena kamman karoti "He does the deed with the body."

Káyena, "with the body," and kamman, "the deed," as above. Karoti, "he does." see § 291. Printed 261, on page 158. annena vasati, "He lives by boiled rice." အင္ခေန ဝသတိ

Annena, "boiled rice," noun 1st. decl. common gender, sing. inst. § 89. Vasati, "he lives," 3rd. conj. sing. pres. tense of the root vasa, a verb of the 1st. conjugation § 178.

dhammena vasati, "He lives by the law." ရေးနာ ဝိသတိ

Dhammena, "by the law," noun 1st. decl, masc. sing. inst. § 89. vijjáya vasatti, "He lives by knowledge." ဝနာက စဘည္က

Vijjáya, "by knowledge," noun 2nd. decl. fem. sing. inst. § 95.

### ahiná daţţho naro නාගිදා මානු දිදා දිදා ahiná dattho naro "A man is bitten by a snake."

Ahiná, "a snake," noun 1st. decl. masc. sing. inst. § 91. Dattho, also written datho, and daddo, "is bitten," pass. past part. masc. sing. nom. case, agreeing with naro, The word is referred to danta, but it is the same root as the Sanskrit dans. § 227. Naro, "a man," noun 1st. decl. masc. sing. nom. case. § 89.

garuțen**a** hato nágo ဂရှင်္ရေန ဟတော် နု၁ငဂါ

"A naga is killed by a garuda."

Garutena, "a galung," an enormous bird that keeps watch in the cotton trees on the sides of mount meru.-Parsed as above. Hato, pass. past part. masc. nom. case, agreeing with nágo, and made from the root hana § 227, Nágo, "a naga," parsed as above. The nagas are dragons that inhabit the regions under Meru. There are said to be four tribes, each with its chief, one of whom is called king of snakes.

buddhena jito maro ဗုန္မေန ဖိတော မာခော

"Mara was conquered by Buddha."

Buddha, "Buddha," noun parsed as above. Jino, "conquered" pass. past part. masc. sing. nom. case, agreeing with the noun following, from the root ji of 1st. conj. jayati § 226, 227. Máro, "Mara," DEATH, but also, as here, a name of Kama god of love.

#### vpakuttena máro bandho ဥပက္ခတ္ကေန မာရေ၁ ဗန္အေ၃

"Mara was bound hy Upakutta."

Bandho, "was bound," pass. past part. masc. sing. nom. case, agreeing with máro. This word is referred to both badha, and bandha. The verb is irregular.

#### yakkhena dinno varo ယက္ကေန ဒိန္နော ၀ငရာ

"A gift was given by a Beeloo." Yakkhena, "by a Beeloo," noun 1st. decl. inst. as above. The Yakkhas, or Beeloos, in the Buddhist mythology, are the guardians of sacred buildings, while the Hindus make them the guardians of the treasures of Kuvera the god of wealth. Dinno, "was given", pass. past part. masc. nom. case, agreeing with the noun follow-In Sanskrit this participle is made by t. ing § 228. Varo, "a gift," noun 1st. decl. nom. case as above.

#### gottena gotamo nátho ဂေါတ္ကေန ဂေါတမေါ နတော

"The Lord by family [was called] Gotama"

Gottena, "by family," noun 1st. decl. inst. case as above. Gotamo, "Gaudama," noun 1st. decl. masc. sing. nom. case. § 89. Nátho, "Lord," noun, parsed like the preceding.

tapasá uttamo "The best by asceticism. တပဿ ဥတ္တမော

Tapasá, "by asceticism," noun 3rd. decl. neut. sing. inst. § 103. Uttamo, "best," adjective masc. sing. nom. case, agreeing with a noun understood § 110.

သုဝငဏ္ဌေန အဘိရူငပါ <sup>suva<u>m</u>e abhirúpo "Handsome by colour."</sup>

Suvumena, "by colour," noun 1st. decl. masc. sing. inst § 89. Abhirúpo, "handsome," adjective masc. sing. nom. case § 110. ပါအေန လက္ရွိတော့ ခည္မွော pádena lakkhito khanyjo

"A crooked footed man is noticed by the foot." Pádena, "by the foot," noun inst. case, as above. Lakkhito, "is noticed," pass past. part. as before from the root lak ha. Khanyjo, "a crooked footed man," noun 1st. decl. as before. pithiyá lakkhito khujjo ပိဋိယာ လက္ရွိေတာ ခုဇ္ကော

"A crooked backed man is noticed by the back." Pithiyá' "by the back," noun 2nd. decl. fem. sing. inst. § 96.

Kujjo, a crooked backed man," noun 1st. decl. as before.

## အာ မာသေန စေတုထ္ထ နဂရံ ပထ္ထော

ada másena chetutta nagaran patto.

"He arrived at the Chetutta country by half a month."

Ada másena, "by half a month," i. e. "in half a month," an appositional determinate compound, the first member is the noun ada, or adda, "half," of the 1st. decl, both masculine and neuter; and the the second is the inst. case of mása, "a month," a noun, 1st. decl. masc. § 282. Chetutta nagaran, "Chetutto country," a compound word like the preceding. The first member is chetutta. a proper noun, and the second is the acc. case of nagara, a neuter noun governed by the participle following. Patto, "arrived, "pass. past part, from the root pada, used for a finite verb. In Sanskrit this participle is made by n.

#### Dative Case.

#### D. tive Case.

§ 293. The dative may be usually rendered in English by to, or for, but occasionally by at, against, and from. The Pali usage does not appear to differ in any-wise from the Sanskrit.

### သဗ္ပည္ရတညာဏဿ ပဠနံ ကတ္မွာ

sabpanyuta nyá <u>n</u>assa pathanan katwá.

"Having made prayer for infinite knowledge.

Sabpanyuta nyánassa, "for infinite knowledge," an appositional determinate compound, § 282. the first member is the adjective sabpanyuta, "infinite;" and the second member is the dat. case of the noun nyána, 1st. decl. neut. sing. § 90. Pathnan, "prayer," noun 1st. decl. neut. acc. governed by the participle. Katwá, "having made," continuative participle of the root kara § 197.

# အေဝ မန္ဒဿ၁နံ ဗုန္မေါ လေါကေ ဥပ္ပဇ္တတိ

deva manussánan budho loke uppajjati.

"For devas, [and] men buddha was born into the world."

Deva manussánan, "For devas, [and] men," a collective compound, § 285 (a.) the first member is deva, "devas," noun 1st. decl. The second member is munussánu, "for men" noun 1st decl. masc. plur. dative case § 89. Buddho, "buddha," see § 291. Loke, "in the world," 1st. decl. masc. sing. loc. case § 89. Uppajjati, "is born." 3rd. sing. pres. tense of the root jana, here compounded with the preposition u. It is conjugated in the 1st.

compounded with the preposition u. It is conjugated in the 1st. conjugation, j being substituted for n, and the p doubled according to the rules of permutation, § 75.

Marcman, "death," noun 1st. decl. neut. sing. nom. case § 89, Bhavissati, "will come into existance," 1st. pers. sing. pres. tense of the root bhú § 205.

ocon go tato rajá "The king from that [time].

To,, from that time," dem. pron. masc. sing. abl. case, §122.

#### Locative Case.

#### Locative Case.

§ 296. The locative case is not found in either Latin, or Greek. In English it is usually made by the preposition *in*, *at*, or *on*; but it is often interchanged with other cases.

ဇ္လာင္ကေတာ္ မရူရာယ စတ္ရသူ ယောက္ကေနသူ ဘကာသိ နာမနာဂရံ ito madhúráya chatusu yojanesu sakassan náma nagaran

# තා atthi

"From this, Madhura, in four yojanas is Sakassa city by name."

Ito, "from this place," adverb. Madhuráya, "Madura," noun 2nd. decl. fem. abl. case. § 95. Chatusu, "four," num. adj. loc. case agreeing in gender, number, and case with the noun following, § 116. Sakassan, "Sakassa," noun 1st. decl. neut. nominative case to the verb atthi, "is," at the close of the sentence. Náma, "by name", adverb, equivalent to "which is called."

အ၃၁၈၀တ ပိယာခါသော ၃၁မanágatepíyádásonámaကုမာရောဆင္တာ ဥဿာပေတ္လာkumárochhattan ussápetwáအသောငကာဓမ္မရာဇာasokodhammarájá bhavissatiသော တူမာဓာတ္ပယောစိတ္လာပိုးရောကရိဿတိsoimá dhátuvovittáritákarissati

"In future time, Piyadasa by name, a prince, after he has been induced to raise the umbrella, will become Asoka king of the law. He will make the relic distribution."

These verses are said to have been inscribed over Gaudama's relics, as a prophecy of Asoka who would appear subsequently.

Two versions of the Burmese translation are before the public, and are given below.

(1.) "In after time, the son of a king named *Pya-da-tha* will be created king; *Thau-ka* will be his name. He will cause these relics to be spread over the face of the South island."

(2.) "In after times, a young man, named Piadatha, shall ascend the throne, and become a great and renowned monarch under the name of Athoka. Through him, the relics shall be spread over the island of Dzampoodipa."

### Personal Pronouns.

§ 297. The following examples illustrate the 'use of the 'personal 'pronouns.

# သူဝက္ကာ တေ ဓာရယငော suvaman te dhárayate

"He bears gold to thee.

Suvaman, "gold," nonn 1st. decl. neut. acc. case. Te, "to thee," 2nd. pers. pron. sing. dat. case § 121. Dhárayate, "he bears", 3rd. sing. pres. of the root dhára, 8th. conj. deponant § 198.

coupo so san ádáya, "He having taken her."

So, "he," 3rd. pers. pron. masc. sing. nom. case, § 122. Tan, "her," pronoun as above, fem. acc. case, governed by the participle following. Adáya, "having taken her," contin. part. of the root  $d\dot{a}$ , with the prep.  $\dot{a}$ , § 234.

## သော ပူရိသော တေန ပူရိသေန ကမ္မံ ကရေတိ

so púriso tena purisena kamman kareti

"This man causes a deed done by that man."

So, "this," the same pronoun as above but used for the dem. pron. this § 122. Tena, "by that," inst. case of the same word. but here used for that. Kareti, "causes-done." 3rd. pers. sing. pres. tense causative of the root kara, § 197, 198.

# మం రాయం ంలఫి చుర్యం కాంరా sá tassa vachanan sutwá áha

"After she had heard the words of him i. e. his words, she said."

Sá, "she," pron. as above, fem. nom. case. Tassa, "of him. or his," the same word, masc. gen. case, § 122. Sutwá, "after [she] had heard," § 289. As in Sanskrit, the continuative past participle may be often rendered by after.

# ခါ၃ေခု ငမ ရမ္မတိ မငခ္ဝ dánena me rammati mano

"By giving, the mind of me i. e. my mind is made happy."

Dánena. "by giving," noun 1st decl. neut. sing. inst. case § 90. Me "of me, or my," 1st. pers. pron. sing. gen. case. § 120. Rammati. "is made happy," 3rd. pers. sing. passive with active terminations from the root ramu, and agreeing with its nominative case, the noun following, § 179, 183.

# ပယ္ ခါခု ပါရဒီ ပူရိဿတ mahyan dána páramí púrissati

"The giving virtue of me, i. e. my, will be perfected."

Mahyan, "of me, or my," 1st. pers.. pron. sing. gen. case § 120. Dána páramí, "giving virtue," appositional determinate compound § 282. Púrissati, "will be perfected." 3rd. pers. sing. future tense of the root púra, 1st conjugation, § 178.

Digitized by Google

#### Relative Pronoun.

§ 298 The relative pronoun precedes the noun to which it refers, instead of following it as in English, and it is usually followed by a demonstrative pronoun in a correlative clause. It is often used before a personal pronoun to make the latter emphatic.

### ယံ ရက္ခံ ပတိသေဝိဗ္ဂ တံ ပတိသေဝိဿာမိ

yan dukkhan patisevibpan tan patisevissámi

"What affliction ought to be suffered, that I will suffer."

Yan, "which," 126. Patisevibpan, "what ought to be suffered," future pass part. of the root seva with the preposition pati, acc. case governed by the verb following, \$ 235. Patisevissámi. "I will suffer," 1st. pers. sing. fut. tense of the root seva as before. ພວວတဲ့ ບຸເຊ ວວນຊາວ8 ສິດໃນ ລະອີ ລາດວາ, 2000

unit so twan vangan anaquetto kathan karissati "And, thon a person who, dwelling in the city, has, been

"And, thou a person who, dwelling in the city, has, been often frightened, when she heard the howl of the jackal, how will she do when she has followed to the Himalaya?"

Yá, "a person who" rel. pron fem. § 126. Twan thou, § 121. Vassantá, "dwelling," pres. part. fem. sing. nom. case, agreeing with the the pronoun, from the root vassa. Pi, "and," conj. § 242. Sugaya, "of the jackal," noun, 2nd, decl. fem. sing. gen. case, § 95. Saddan sutwana, "when she heard the howl," see § 289. Mahun, "often," adverb. Uttasate, "has been frightened." pass. past part. of the root tasa, with the particle uta denoting intensity. So, "this person." Vangan, "himalaya," the name of a mountain in the himalaya, acc. case. Anupatto, "when she has followed," pass. past part. of the root pada with the preposition anu, masc. § 291. Kathan. "how," adverb. Karissati, "will she do?," § 291. This passage is instructive in reading inscriptions. There is an utter disregard of gender. It begins with the feminine, and ends with the masculine, where it ought to be feminine throughout. The participle, uttasatte, is in the locative case agreeing with pure, instead of being in the nominative and agreeing with  $y\dot{a}$ ; but in some copies the word is written utasate, changing the participle to the 3rd. pers. sing. pres. of the passive voice. Then again the verbs are in the third person agreeing with the relative, while they are sometimes made to agree with the personal pronoun.

## လောဟံ သိဝိနံ ဝစနာ အခုသကံ ပပ္ပၥဇေမိ

yohan sívinan vuchaná adusakan pappájemi 'I who drove away the innocent from the words of the Sivi."

In this example the verb agrees with the personal pronoun, but it is sometimes made to agree winh the relative.

167

#### Verbs and Participles.

§ 299. According to Kachchayano's rules, when a verb has nominatives of different persons, it is put in the first person plural. Thus:

သေဘာ ဂဒီလူ အဟဥ္က ပဋ္ဌာဍ မယ္ ဂဒီ၁ဗ so cha pathati ahanycha pathámi mayan patáma "He reads, and I read," are expressed by "We read." 66 " ထွဥ္က ပၚသိ အဟဥ္က ပဌာရ twanycha pathasi ahanycha patámi . . . "Thou readest and I read ••• " " သော့စ္ ဂဒီလူ ထိုဗီ ဂဒီဘူ အလဗီဂဒီဘူ socha pathati twanycha patasi ahanychapathámi ... "He reads, and thou readest, and I read." ... ... ေတေစ မင္ခ ္ထိ တွဥ္မွ ပၚသိ တူမေျပၚထ သောစ မင္ဂတဲ pathati techa pathanti twanycha pathasi tuhme pathatha socha ahanycha pathámi ෂාරාහි රට්රාත්

"He reads, and they read, and thou readest, and you read, and I read," are referred to collectively by "We read."

§ 300, Participles are of much more frequent occurrence in Pali writings than verbs, and the passive past participle is often nsed in the place of a finite verb. This past participle is also used with the verb to be, to form, as in English, a perfect past, and a perfect future tense. Thus:

# <mark>ဇ္ဘားခါနီ ကာတံု</mark> ဗိုင္ရော အသိ <sup>idáni</sup> kátun difho ari

"Now has been seen to work, thou art!"

Dito, "has been seen," pass. past part. of the root disa, § 227. Asi, "thou art," 2nd. pers. sing. pres. tense of root asa, § 205.

တန္နာ ဖိဖေဖော္ ၀ ဆီနာနဲ ၈န္ အစစ္မာ ပထာ သင္မဘာသူ ထူ

pi idáni madí aranyan gatá tadá jujako bhavissatíti

"Then Jujaka [thought], "Madi having gone to the forest will

be, i. e. will have gone." Tadá, "then," idáni, "now," adverbs, § 238. Aranyan, " to the forest," noun 1st. decl. neut. acc. case: § 90. Gatá, "having gone," pass. past part. of the root gamu, fem. sing. nom. case, agreeing with the noun Madi. § 206. Bhavissati, "will be," 3rd. pers. sing. future tense of the root bhú, § 205. The final i is lengthened by § 42 (b.) Ti, for *iti*, the initial *i* coalesing with the final of the previous word. This particle is used at the close of a sentence expressing the words or thoughts of another, where inverted commas are used in English.

#### Inscription on a gold Scroll.

#### Ancient inscription on a gold Scroll.

§ 301 When two old pagodas were taken down in Tonngoo, in 1863, two gold scrolls were discovered with Pali inscriptions, one five or six octavo pages in length; and from a silver plate with an inscription in Burmese, it appeared that they were deposited there A. D. 1547. The inscriptions are almost exclusively confined to extracts from the Buddhist Scriptures. As it would be difficult to find a palm leaf book one hundred years old, the finding of these inscriptions is like finding a manuscript two or three hundred years older than any extant, and possibly much older, for it is not known when the inscriptions were made.

The inscriptions instead of commencing with the sentence on page 162, as they would if written now, begin with:

## ရေယတု ၆နသဘာနံ

Jeyatu Jinasásanan

"Let the religion of the Jina overcome." "Let the religion of the Victor be victorious."

Extracts from the Pitakapa follow, stating that the Buddha discovered the precise constituents of mind and matter, enumerating them, and tracing all things from nothing to nothing. One of these extracts is here given.

# သင်္ခါရ ပစ္စယာ ၀ိညာဏ

အဝိဇ္ဈါ ပစ္ပယာ သင်္ခါရာ။ avijjá pachchayá sangkhárá

ijjá pachchayá sangkhárá sangkhará pachchayá vinyánan "The effect of ignorance was existance, of existance knowledge,

ອີກວາດ ບອບວ່າ ຊາຍຄູບ ຊາຍຄູບ ບອບວ່າ ລາຊາຍອາດ vinyána pachchayá námarupan námarupa pachchayá satáyatanan of knowledge mind and matter, of mind and matter abodes,

သစ်ာကယ္ဆာ ဂုစိုက္ရာ ဖုတ္သည္

satáyatana puchchayá phasso of manifested abodes contact,

ဝေနော ဂစိကာ လထာ

vedaná pachchayá tah<u>n</u>á, of sensation concupiscience,

### ဥပ္ပါ<del>ဒါခု ပစ္ဆယ</del>္ ဘ**ေဝါ**

upádána pachchayá bhavo of attachment state of being,

### ဖဿ ပစ္ရယာ ေခေခ့ာ

phussa pachchayá vedana of contact sensation,

တဏ္ခာ ပစ္စယာ ဥပ္ပါနါနံ

tah<u>n</u>á pachchayá upádánan of concupiscience attachment,

### ဘဝ ရွပယာ (စာတ

bhava pachchayá játi of state of being birth, രന് ററ്റുമ്പാ ശവാ ധവന വോന ഗിട്ടാ ജന്ദ joti pachchayá jara, marana, soka, parideva, dukkha ടിംപ്പോസ്പ്രിധാവാ യട്ടാം domanssuppáyásá sambhavantı of birth, age, death, sorrow, weeping, suffering, unhappy mind, and exhaustion."

Avijjá pachchayá, "The effect of ignorance was existance; the construction makes these words a governing determinate compound, § 281. The first member is avijja from vijja knowledge, and a privative; and is explained as synonymous with moha, "that spiritual ignorance which leads men to believe in the reality of worldly objects." The second member is pachchayá noun,  $1s^+$ . decl. masc. sing. plur. nom. case. But the first word, instead of being in the genitive case, is put in the nominative plural, as if in apposition with the second. In the other clauses it has the nominative affix sometimes, and sometimes has not.

Sangkhárá, "existance," this word appears to be derived from the root khara to drop, and with the preposition san to flow. The noun seems to denote an inherent power in nature to act before the existance of matter.

Satáyatana, "abodes," from the root sata, to manifest, and the noun áyatana, a house or abode Twelve are enumerated six subjective, the perceptions of seeing, hearing, smelling, tasting, touching, and thinking, and six objective, form, sound, odour, flavour, tangibility, and objects of thought.

At the close of the inscription occurs the following sentence, added by the writer to the extracts from the Pitakapa:

### ဗီဝါ တ ဖတ္ အာဒိတ္မွာ

ရတ္ထိ တဖတ် စန္ရွိမာ

dhivá taphati ádichcho rattin taphati chandimá "The sun is beautiful by day, the moon is beautiful by night,

ဗ္ဘတ္ထိေသာ သခုဒ္ဓေါ တဖတိ

ittiyo 👘 sanaddo taphati

a woman is beautiful in modesty, and a Brahmin in telling beads;

jáyin

## အတ သဗ္မမဟောရတ္ထိ

ဗုငန္မါ တဖတိ တေသော

**ဖားက္မွ**့ ထဂုလ္ ရြက်ဖောာ

taphati brahman

atha sabpamahorattin

buddho taphati tejo

but the Buddha, a brilliant light, was beautiful through all the night.

Divá, "by day," and rattin, "by night," are cases of nouns used adverbially. Tejo, "a brilliant light," is a noun in apposition with buddho, and agreeing with it in gender, number, and case.

The praise here given to Brahmins, which the Buddhists give to Samanas, proves that this inscription was made under Braminical influences.

#### The longest Pali word.

§ 302. Perhaps the longest word in the Pali books is the following Possessive compound, complexly compounded.

## ပဝရသူရာသူရဂရုဒ္**မန္န**ဇဘုဇဂဂန္မပ္ပမက္ဒစ္ရက္စစ္မွစ္ပီတ**ေသ** လသံဃဒိုတစရေအာ

Pavara, súrásúra, garuda, manuja, bujaga, gandhappa, makuta, kuta chumpitá, sela, sanghatita, charano. "The foot on stones which are placed on the summits of the crests of the most excellent of living beings, the inhabitants of heaven, asshurs, gyiffons, men, dragons, and celestial musicians."

The base of this word is:

### သူရာစ အသူရာစ ဂမ္ပခု၁စ မန္နရာစ ဘုုရဂါစ ဂန္မပ္ပါစ

Súrá, cha asúrá, cha garudá cha manujá cha bujagá cha gandhappá cha "Angels, and fallen-angels, and griffons, and men and dragons. and celestial musicians."

It is made into a collective compound according to § 285 (a.) and written:

### သူရၥသူရဂရုဒုမန္မရဘုဇဂဂန္မပ္ပါ

súrásúra, garuda, manuja, bujaga, gandhappá

"Angels, fallen-angels, griffons, men, dragons, celestial musicians."

An adjective, *pavara*, is prefixed, and an appositional determinate compound is formed, § 282. thus:

### ပဝရသူရ၁သူရဂခုဒုမန္နဇဘုဇဂဂန္မပ္ပါ

Pavara, súrásúra, garuda, manuja, bujaga, gandhappá

"Excellent angels, fallen-angels, griffons, men, dragons, celestial musicians."

A noun is affixed governing a genitive case, and a governing determinate compound is formed § 281, Thus:

### ပဝရသူရာသူရဂရုဒုမန္ဒဇာဘုဇာဂဂန္မပ္ပါနံမက္နစ္ခာနီ

Pavara, súrásúra, garuda, manuja, bujaga, gandhappánan makutáni.

"The crests of excellent angels, fallen-angels, griffons, men, dragons, celestial musicians."

Another noun is added and the compound is extended, thus:

ပဝရသူရာသူရဂရခုမႜႜႜႜဨၟၛၯၛၐဂ႙ႜႜၟ႘ၑၮႃၔၟႝၨႜၟၮႃၔႍၟႜႜႜႜႜႜႜႜႜႜႜႜႜ႞ ၭႜႋ Pavara, súrásúra, garada, manuja, bujaga, gandhappa, makutánan, kutáni "The summits of the crests of excellent angels, fallen-angels griffons, men, dragons, celestial musicians."

A passive past participle is next affixed governing the locative, and forming a possessive compound, thus:

లం అన్ని లెంపింది లా కిండింది లా కించింది లా కిండింది లా కింది లా కిండింది లా కిండి లా కిండింది లా కిండి లా కిండి లా కిండి లా కింది లా కిండింది లా కిండి లా కింది లి కింది లా కింది లా కింది లా కింది లి కింది లి కింది లా కింది లా కింది లి కింది లి కింది లి కింది లి కింది లి కింది లి కింది లా కింది లి కింది లి కింది లి కింది ల

A noun agreeing with the participle is now added, thus:

ပဝရသူရာသူရဂ ရခု မန္နဲ့ အတွဲ ၈၀၀ နွင္ပက္ရေတာ့ စုရင္ပြဲတာ သေဆာ

Pavara, súrásúra, garuda, manuja, bujaga, gandhappa, makuta, kuta, chumpitá, sela. "Stones being placed on the summits of the crests of excellent ang els, fallen-angels, griffons, men, dragons, celestial musicians."

To this another passive past participle is affixed governing the instrumentive case, thus:

## ပဝရသူရာသူရဂရခုမန္နဇာဘုဇဂဂန္မပ္ပမကုန္ကကုန္စစုမွတသေ လေဟိသံဃနိတာ

Pavara, súrásúra, garuda, manuja, bujaga, gandhappa, mukuta, kuta, chumpita, selehi sanghatitá. "Are brought in contact with stones placed on the summits of the crests of excellent angels, fallen-angels, griffons, men, dragons, celestial musicians."

Another noun agreeing with the last participle is added, and the application of the clause is brought out by adding the relative pronoun and Tathagata in the genitive singular, thus:

## ပစရသူရာသူရဂရခုမန္နဲ့ရဘုရဂဂဨနွပ္မဟေရာရာစုစုစုတသေ လသံဃဒိုတစရဏာယာသာတထာဂတဿ

Pavara, súrásúra, garuda, manuja, bujaga, gandhappa, makuta, kuta,chumpita, sela, sanghatita, charaná, yassa, tathagatassa. "The feet of one who is a Tathagata are brought in contact with stones placed on the summits of the crests of excellent angels, fallen-angels, griffons, men, dragons, celestial musicians."

#### Gaudama's Famous Sermon.

§ 303. The longest discourse of Gaudama's on record, is one composed in the usual Pali werse of eight syllables. It is said to have been preached at Gaya, in Magudha, on "a flat rock at the top of a hill, which resembles the canopy of an elephant's howdah." "The little mountain of the isolated rock," mention by Fa Hian, the Chinese traveller in the fourth century, was probably the same place. It was addressed to one thousand mendicant friars, all of whom were converted to Rahandas, at its close.

Bishop,Bigandet says, in his exhaustive work on Buddha, and Buddhism: "The philosophical discourse of Budha on the mountain may be considered as the summary of his theory of morals. It is confessedly very obscure, and much above the ordinary level of human understanding." The original text with philological notes, and a literal translation are here given. They may remove some of its obscurities, and make it more easily understood.

finished. That which ought to be done, has been done. Other things there are none."

Passan, "seeing," pres. part. sing. nom. case of the root disa, agreeing with the noun following, § 178, 207. Sutavá, "having heard," active past part. of the root su, § 178. Nibbindati, "he puts restraint on," 3rd. pers. sing. of the root vida, 2nd. conj. with the preposition ni, § 189. The v is changen to b by § 27, and the b is doubled by § 75 This form of the verb is defined in Sanskrit "To consider, to reason." This illustrates the difference in the sighification of the same root in Pali and Sanskrit.

*Virajati*, "he is exempt from desire," 3rd. pers. sing. of the root ranya with the preposition vi, 3rd. conj. § 193. In Sanskrit the root in the corresponding conjugation signifies only "to dye," and when vi is prefixed, "to be averse to dislike," but in Pali, it signifies exemption from both likes and dislikes. *Virágá*, "absence from passion," noun 1st. decl. masc. abl. case, but irregular § 89.

Vimuchchati, "he is liberated," ord, pers. sing. of root mucha with prep. vi prefixed, 3rd conj. § 193. Vusitan. is finished," pass. past part. neut. sing. of the root vusi § 226. (a.) Karaniyan, "that which ought to be done," future pass. part. made by aniya, of the root kara § 235 (c.) Katan, "has been done," pass. past part. neut. gender of the root kara, § 197.

For translations of this famous sermon from the Burmese, see A. O. Journal Vol III page 56, and Bigandet's Life of Gaudama.

178

#### Asoka and Antiochus.

§ 303. The following inscription in which the name of Antiochus occurs, is given as a specimen of what Pali was in the third century before the Christian era. There are a few irregularities for which it is not easy to account, but the marvel is that there are not more. Pali has not changed as much in two thousanl years as English has in two or three hundred.

ዋና የፍገኘኛ ታይጊዬባጥ ባጥታዋ፤ L ሥ သဝတ ဗြောတမြိဳေခဝါနံဗီယသ္ ဗီယုဒုသိန္မော ရာညော savata vijitehmi devánanpiyusa piyadasino rányo ▶ ר א ר ר ק ע ל ל ה ס - צ ל ר ע ע ד ל ע ד ס - צ ל ע ע ד ל ד ל ד ל צ ယဘာ စေါဍါ ပါဍါ သတိယပုဏာ င္လေရဂွဂၢိဳလ္လတ evam ipipischantesu yathá chodá pádá sutiyaputo + א ח ה צ א צ ם ה ב א א י ד <del>ז</del> ד ד ר צ ကေဘာလပ္မတော အတိဗပံဏီ အံတိယဒကာ ယော္မ ရဖ **á ta**nbapan**ní** antiyako yona rája **k**etalaputo လေး ၀ါ ၀ တသ အံတိယကသ သါဖန္တာ ၍ ဇာဇနာ ye vá pi tasa antiyakasa sámanta rajáno သဝတ အဝါနံပိယသ ဒိယဒသိရော ရညော savata devánanpiyasa piyadasino ั้งๆ + ๆ + ү х х ү ฯ + ๆ + ף 4 နေ စိကိဆာ ကဘာ မန္နသ စိကိဆာ စ ပသု စိကိဆာ စ dree chikichhá katá manusa chikichhá cha pasu chikichhá cha יאטד פיד אד אר צוע ד פו צ ထြသဓာနိ စ ယနိ မန္နသော ပဂါနို့ စပသေါ cha yani manusopagáni **os**adháni cha paso 41

Savata, "everywhere," adv. § 238. The double letters of the books are single on the inscription. Vijitehmi, "in the conquered," pass. past part. of the root ji with the preposition vi, sing.locative case, agreeing with a nonn masculine or neuter understood, § 89. Devánan, "of the Devas," noun 1st. decl. masc. plur. gen. case, § 89. Piyasa, "beloved of," adj. masc. gen. case, agreeing with the noun following. The genitive case is marked by sa instead of ssa in the books, but Kachchayano gives sa for the original form of the genitive singular, § 84. Piyadasino, noun 1st decl. sing. gen. case, § 91. In the books this name instead of Piyadasi, as here, is written Fiyádasa, § 296. Rányo, "of king," noun irr. sing. gen. case, § 108. Erama, "so," adv. from evan, the anuswara

Digitized by Google

becomes m before a, according to § 81. Api, "also," conj. § 242. Fachantesu, "in the barbarian countries," noun 1st. decl. plur. loc. case, § 89. Prof. Wilson wrote: "Also even in the bordering countries, not as Prinscp proposes, 'as well as the parts occupied by the faithful." Still there is no reason to question the rendering given above. The word found in books is pachehanta, which by the regular mode of transliteration into the inscription character, making the double letters single, would be precisely the word as found on the stone; and it is defined, in the native Pali vocabularies, "Country of milakkhu," the Sanskrit Mlechela, "barbarian," Yathá, "as," adv. § 238. A, "to," § 240.

Tanbapanní, "Ceylon." There can be no reasonable doubt of the identity of Ceylon, and since it is said, "As far as Ceylon," the places previously mentioned were probally between the writer and Ceylon, and Choda must be Coromandel, and Ketala, or Kerala, Malabar. Antiyako, "Antiochus," a Greek prince, standing apparently for the Yona country, and hence is in the nominative case, like the nouns which precede. Ye. "those who," rel. pron. masc. plur. nom. case. § 126, agreeing with rajano. Tasa, "of that." dem. pron. masc. sing. gen. case, § 122, agreeing with antiyakasa.

Chikichhá, "medical practices," neun 2st. deel. plur. nom. case. Prof Wilson wrote: "The term, chikíchha, is said by Mr. Prinsep to be the Pali form of, chikitsa, the application of remedies, but this is questionable. It would rather be, chikichha, with a short, not a long i; but in fact, the Pali form as it appears in vocalularies is. tikichhá or tikichichhá. The word is more probably the Prakrit form of, chikirsha, the wish or will to co: and the edict in fact announces that it has been the two-fold intention of the Raja to previde, not plysic, lut doed, water, and shade for animals and men". This only proves the imperfection of existing Pali voci bularies. Mr.Prinsep was keyond al doubt correct. The word, as it is need on the stone, is negularly derived from the root ki, taking optionally for its reduplication, ti, or  $chi. \leq 204$ , 272. Katú, "have been made," pass. past part. of the root huna, plur. nom. case, agreeing with clakichhá.  $\leq$  197, 110.

Osacháni, "medicines," noun 1st. decl. neut. piur: § 90. Prof. Wilson wrote: "Mendicaments cannot be meant by osadháni. It is not in fact the Pali form of, aushadha, a mendicamert. but, oshadhi, a deciduous plant" It is fatal to oshadha that it is feminine, while osadháni is neuter, agreeing with osatum of the books, and since t, and dh are sometimes interchanged, § 22, the words are clearly identical, and Prinsep is correct. Hánápitana, "have been carried" pass. past part. of the 100t hara, causative, neut. piur. nom. case. Prof. Wilson wrote "This term is of an unusual form, and doubtful purport." It is the usual form in the Pali Looks, where it signifies, as here, "to carry." Further analysis is unnecessary, because the signification of the other words are not questioned.

#### Translation.

Everywhere in the conquered [country] of king Piyadasi, beloved of the devas, and also in the barbarian countries, as Coromandel, Pada, Satiyaputa, Malabar, even as far as Ceylon, the Yona King Antiochus, and the monarch chieftains of that Antiochus,

Everywhere the two medical practices of king Piyadasi, beloved of the devas, have been made, the medical practice for men, and the medical practice for beasts.

And wherever there were no medicines suitable for men, and suitable for beasts, thither they have been carried, and planted.

And wherever there were no roots and fruits, thither they have been carried, and planted.

And wells have been dug on the roads, and trees have been planted, for the enjoyment of man, and beast.

#### Professor H. H. Wilson's Translation.

"In all the subjugated (territories) of the King Priyadasi, the beloved of the gods, and also in the bordering countries, as (Choda), Palaya, (or Paraya,) Satyaputra, Keralaputra, Tambapani, (it is proclaimed,) and Antiochus by name, the Yona (or Yavana) Raja, and those princes who are near to, (or allied with) that monarch, universally (are apprised) that (two designs have been cherished by Priyadasi: one design) regarding men, and one relating to animals; and whatever herbs are useful to men or useful to animals, wherever there are none, such have been everywhere caused to be conveyed and planted, (and roots and fruits wherever there are none, such have been everywhere conveyed and planted; and on the roads) wells have been caused to be dug, (and trees have been planted) for the respective enjoyment of animals and men."

#### Mr. Prinsep's Translation.

"Everywhere within the conquered province of raja PIYADASI the beloved of the Gods, as well as in the parts occupied by the faithful, such as *Chola*, *Pida*, *Satiyaputra*, and *Ketalaputra*, even as far as *Tambapanni* (Ceylon); and moreover within the dominions of ANTIOCHUS, the Greek, (of which ANTIOCHUS'S generals are the rulers,) —everywhere the heaven-beloved raja PIYADASI'S double system of medical aid is established; —both medical aid for men, and medical aid for animals; together with medicaments of all sorts, which are suitable for men, and suitable for animals. And wherever there is not (such provision)—in all such places they are to be prepared, and to be planted: both root-drugs and herbs, wheresoever there is not (a provision of them) in all such places shall they be deposited and planted."

"" "And in the public highways wells are to be dug, and trees to be planted, for the accommodation of men and animals."
